MCAN Financial

2025 ANNUAL REPORT

Reimagining opportunity to drive growth for Canadians

MCAN Financial

Reimagining opportunity to drive growth for Canadians

At MCAN, we are redefining what's possible for Canadians—inspiring them to dream bigger and build a bolder future.

For our team members, it means unlocking career growth through mentorship and the power of collaboration to drive professional advancement.

For our clients, it's making homeownership attainable while securing their financial future and expanding their investment potential.

We provide investors with exclusive opportunities to invest in Canadian real estate with confidence, backed by our proven track record and visionary leadership.

We are built for resilience—a trusted partner you can rely on for the long term, combining experience with forward-thinking innovation.

Our partners are empowered with programs that fuel their growth and build stronger relationships with the clients who trust them to deliver.

Beyond business, we strengthen communities through impactful partnerships, like planting trees with One Tree Planted and building homes with Habitat for Humanity.

We inspire Canadians to reimagine what is possible. When our communities thrive, so does the future we are shaping together.

MCAN DRIVE

We DRIVE growth with relentless dedication to curiosity, innovation, and performance. Every day we show up with

Diversity
Celebrating our differences, amplifying individual stories that strengthen our unified purpose and build community.

Resilience
Balancing risk with the pursuit of progress and purposeful experimentation, grounded in sound judgment and sustainable growth. We embrace the opportunity and responsibility of ownership, always acting with integrity and purpose.

Imagination
Sparking creative solutions through curiosity, collaboration, and deep expertise. We approach challenges with a smile and solutions with purpose.

Vision
Enabling our clients, colleagues, and community members with what they need to achieve their personal and professional goals. Our impact is measured by their growth and inspired outcomes.

Enthusiasm
Empowering each other to deliver an exceptional experience, ensuring that every interaction cultivates trust, transformation and meaningful connection.

We are reimagining opportunity to drive growth for Canadian communities.

Therefore, we promise that as Canada's leading alternative financial services company, we redefine possibility through agile solutions that adapt to the diverse needs of our clients.

We envision a future where our communities prosper—fostering resilience, growth, and unity.

Everything we do balances risk and ingenuity through strong partnerships and principled stewardship, delivering value through residential real estate that inspires confidence, drives returns and builds trust within our communities.

For our communities, we show up with Diversity, Resilience, Imagination, Vision and Enthusiasm.

MESSAGE TO SHAREHOLDERS

We are committed to providing attractive returns for our shareholders through long-term sustainable growth. Our track record over the last five years boasts an average return on shareholders' equity[1] of almost 14% and a compound annual growth rate of our total shareholder return[1] of almost 20%. We are also happy to announce an increase to our next quarterly cash dividend of 5% to 43 cents per share. Despite geopolitical and economic uncertainty, including a declining interest rate environment from 2024 peak interest rates, we have built a resilient portfolio that we expect will continue to perform well under a more stable interest rate environment. Our team members will continue to work with our partners and brokers to serve our clients and prudently grow the business while managing returns for our shareholders within our risk profile.

Results from our lending business have been steady with growth in our loan balances partially offsetting the headwinds from interest rates that fell from recent highs. We continue to leverage our brand and recognized customer service to grow our portfolios. We achieved growth in our residential mortgage originations and construction and commercial loan advances without sacrificing credit quality. While economic forecasts from the unpredictability of tariffs led to higher provisioning on our loans, actual losses remain insignificant. We believe that we have a quality loan portfolio with conservative loan to value ratios supporting these loans. We continue to manage our spreads with mortgage pricing initiatives and our interest rate risk through the duration of our term deposit funding and related hedging strategies.

We continue to build the pipeline for our construction lending portfolio, as this portfolio provides better risk adjusted returns. We have strong strategic partnerships with originators that provide boots on the ground knowledge in the markets we lend to and assist with default management. We target experienced developers with successful track records of project completion and loan repayment, and they are often repeat clients. We continue to increase our lending in and around the urban markets of Ontario, British Columbia and Alberta. There continues to be demand for more affordable housing and entry level homes in these markets due to household formation driven by population dynamics, and a lack of affordable housing. We are also looking to expand our product offering in response to market demand in this segment.

We had 31% year-over-year growth in our residential mortgage originations which led to growth in our residential mortgage portfolio balance without sacrificing our credit profile. We continued our strategy of diversifying our residential mortgages with increased lending in the Alberta and British Columbia urban markets.

Our investment in and partnership with MCAP continues to remain a key driver of returns for our shareholders - income from MCAP increased 16% year-over-year. MCAP is privately owned and is Canada's largest and preeminent independent mortgage finance company. With its market-leading position, we expect that MCAP will continue to provide great returns for our shareholders.

To support this growth, we continue our strategy to expand and diversify our funding base. We launched our uninsured residential mortgage securitization program and continued to grow our digital and broker GIC channels. We continue to invest in systems and infrastructure with a multi-year strategic focus on efficiencies to build operating leverage and deliver sustainable and profitable growth.

With a strong liquidity and capital position, high level of credit quality, and our strategy of continued diversification of our lending portfolio and funding base, we believe we are well positioned for success in 2026. Our capital base achieved modest growth from our ATM and DRIP programs to support the growth of our businesses. Overall, our assets grew at a faster pace than our equity reflecting our focus on capital optimization. I want to thank all our shareholders, partners, team members and the Board for their ongoing support. While we face geopolitical and economic uncertainty, there are positive signs that Canada will engage in activities to bolster our internal economy so that we are not so reliant on external forces. We remain focused on MCAN's strategic positioning in the Canadian residential mortgage market and preserving long-term value for our shareholders.

Derek Sutherland
Chief Executive Officer

OUR BUSINESS AND STRATEGY

MCAN (TSX: MKP) provides sustainable growth and returns for our shareholders by leveraging our real estate expertise and providing our shareholders with unique access to investments in the Canadian real estate market and the returns that they generate. Our business mainly includes real estate lending and investing, including residential mortgage lending, residential construction lending, non-residential construction lending and commercial lending, and investing in strategic private investments including MCAP Commercial LP ("MCAP") (privately-owned and Canada's largest independent mortgage financing company) in which we own an almost 14% interest. We provide a breadth of expertise in all facets of the real estate cycle that our shareholders benefit from. MCAN is the largest Mortgage Investment Corporation ("MIC") in Canada and the only federally regulated MIC. Our unique tax structure as a flow-through MIC allows us to not be taxed at the corporate level by distributing all of our taxable earnings annually to shareholders. It also means that 67% of our non-consolidated tax assets are to be held in residential mortgages and cash.

MCAN's lines of business include three divisions - MCAN Home, MCAN Capital and MCAN Wealth.

MCAN Home is our residential mortgage lender that partners exclusively with accredited mortgage professionals to offer both insured and uninsured mortgage solutions across Canada. MCAN Home operates through MCAN's wholly owned subsidiary, MCAN Home Mortgage Corporation.

MCAN Capital focuses on unique financing and investment opportunities in construction and commercial loans, and an almost 14% equity interest in MCAP, Canada's largest privately-owned mortgage financing company.

MCAN Wealth offers investors CDIC insured investment solutions at competitive rates, differing term options, and with no fees.

MCAN's Value Proposition

Unique Business Model with Strong Fundamentals	**Attractive Financial Profile & Growth**	**Investment in MCAP - Source of Growing Value**	**Experienced Management Team with Industry Track Record**	**Consistent and Attractive Dividend Yield**

MCAN provides focused investing in products and markets where we have extensive expertise and that are not generally accessible to our shareholders, to generate attractive financial returns. We use our expertise to source our term deposits through a network of independent financial agents, as well as through a direct-to-consumer channel.

Our value proposition helps us achieve our long-term objectives:

- Sustained 13% to 15% average return on average shareholders' equity ("ROE")
- Sustained 10% average annual growth of assets
- Sustained and prudent dividend growth

We have made significant strides over the last several years to grow our business and achieve our long-term objectives. Comparing December 31, 2025 to December 31, 2020, we have:

- Delivered average ROE[1] of 13.83% driven by a 151% increase in our net interest income to $95.8 million from $38.2 million
- Increased our total assets by 137% to $6.5 billion from $2.7 billion driven by a 149% increase in our mortgage portfolio to $5.9 billion from $2.4 billion
- Increased our regular annual cash dividends by 21% to $1.64 per share from $1.36 per share as well as distributed two special stock dividends of $0.97 per share in 2022 and $0.85 per share in 2021. We also had a compound annual growth rate of our total shareholder return[1] for the last 5 years of almost 20%.

Our 2025 Strategic Priorities

We believe we have been successful in executing on our strategic priorities in 2025. Those priorities included:

Strategic Priorities	Results
Grow revenue generating business lines	• Total assets under management increased by 30% to $7.8 billion: ◦ Mortgage balances increased by 22% to $5.9 billion ◦ Maintained our higher-yielding construction and commercial loan balance at $1.2 billion. • 31% increase in residential mortgage originations to a record $1.6 billion. • Increased our residential mortgage lending in the Alberta and British Columbia urban markets.
Optimize financial, liquidity and funding management	• Successfully raised $22 million of capital through our ATM Program to fund growth of our business. • Expanded our fair value hedging program to manage our interest rate risk. • Diversified funding with the launch of our uninsured residential mortgage securitization program sponsored by a major Canadian bank.
Enhance and mature operating capabilities and effectiveness	• Enhanced existing technology applications for continued business efficiencies.
Leadership, people management and culture	• Strengthened our management team and launched a year-round early talent program, investing in MCAN's talent pipeline and culture of innovation. • Further enhanced the multi-streamed Leadership Development Program to align with succession planning by building bench strength and long-term business strategy.

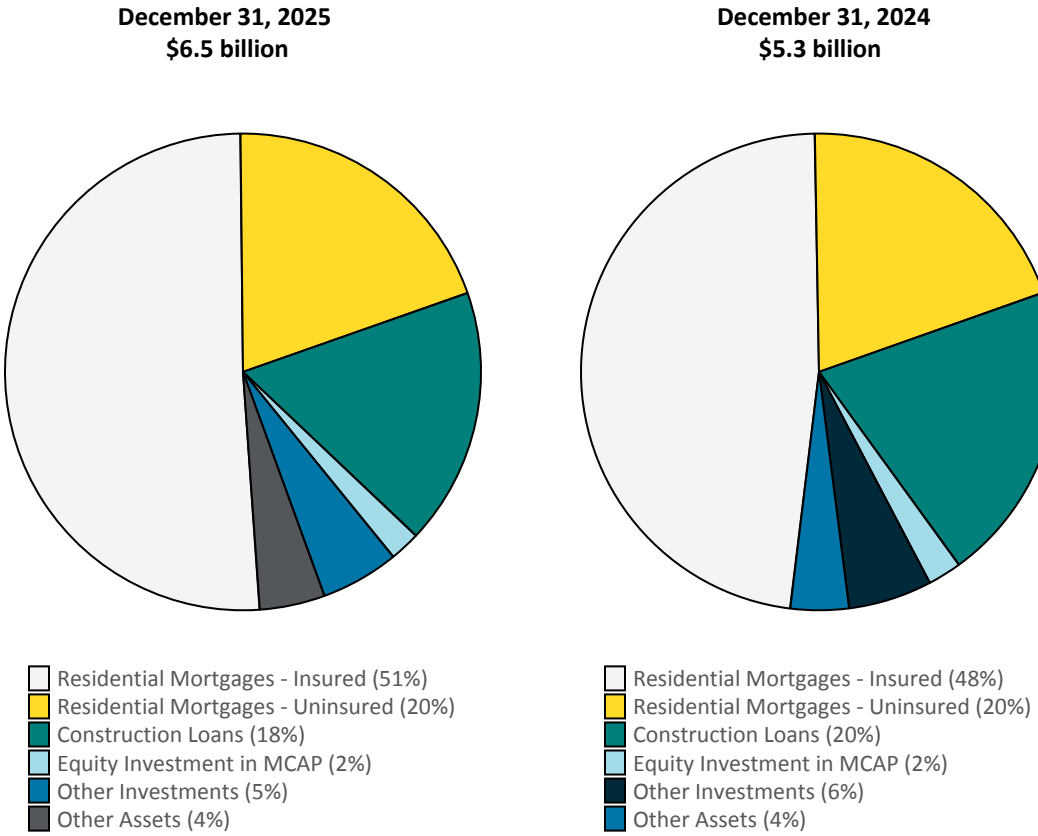

We achieved the following recognitions in 2025:

- Recognized in 2025 Great Places to Work™:
  - Best Workplaces™ in Canada – 100-999 Employees
- Best Places to Work in Ontario for 2025
- Recognized as a Top Mortgage Employer for 2025 by Canadian Mortgage Professional.
- Global Mortgage 100 recognition for Avish Buck, our SVP and COO
- Recognized by Mediacorp Canada Inc. as one of Canada's Top Small and Medium Employers for 2025
- Recognized by Waterstone Human Capital as one of Canada's Most Admired™ Corporate Cultures for 2025 – Mid-Market
- Recognized for Best Workplace Culture and Canadian HR Team of the Year (Finance/Insurance) by HR Directors of Canada and The Canadian HR Reporter for 2025

Our Investment Portfolio

With extensive in-house expertise, MCAN is a strategic investor in the Canadian real estate market. Our portfolio is focused on residential mortgages and residential construction loans. We also have a strategic investment in and a strong partnership with MCAP.

Total Assets

Residential Mortgage Lending (December 31, 2025 - $4.6 billion; December 31, 2024 - $3.7 billion)

We originate insured and uninsured residential mortgages across Canada primarily focused on first time and move up homebuyers. Although we lend across Canada, our geographical focus is in the major urban regions in Ontario and to a lesser extent in Alberta and British Columbia. We have in-house origination, underwriting and boots on the ground in our core markets. These residential mortgages are originated through our strategic relationships with mortgage brokers. We focus our uninsured residential mortgage lending to those customers with credit challenges and to those who are self-employed. Our products include purchases, refinances and renewals. We also have strategies to either originate and securitize our on-balance sheet residential mortgages, which are included in residential mortgages above, or sell our residential mortgage commitments, depending on market conditions.

Construction Lending (December 31, 2025 - $1.1 billion; December 31, 2024 - $1.1 billion)

Residential construction loans are made to developers to finance residential construction projects. We focus our lending on the construction of more affordable housing in urban/suburban growth markets with a preference for proximity to transit. This approach aims to mitigate the impact of price volatility and tightened sales activity in the event of market corrections. As well, these markets are where we, or our originating partners, have experience and local expertise. We have long established strategic relationships with originators, partners and borrowers. In house, we apply our own seasoned experience, underwriting and monitoring. The borrowers that we target are experienced developers with a successful track record of project completion and loan repayment, and often repeat customers. These loans generally have a floating interest rate, with a floor rate set at origination and loan terms typically ranging between 24 and 36 months. We also strategically lend at the land development stage to enhance longer term relationships with borrowers. Non-residential construction loans provide similar construction financing, but for industrial developments, retail shopping developments and office buildings.

Investment in MCAP (December 31, 2025 - $134 million; December 31, 2024 - $122 million)

We have an almost 14% equity interest in MCAP. MCAP is Canada's largest independent mortgage finance company with assets under management of $156 billion, serving many institutional investors and over 400,000 homeowners. This investment allows us to participate in the growth of MCAP that typically provides quarterly distributions on our investment.

Our Loan Portfolio Quality

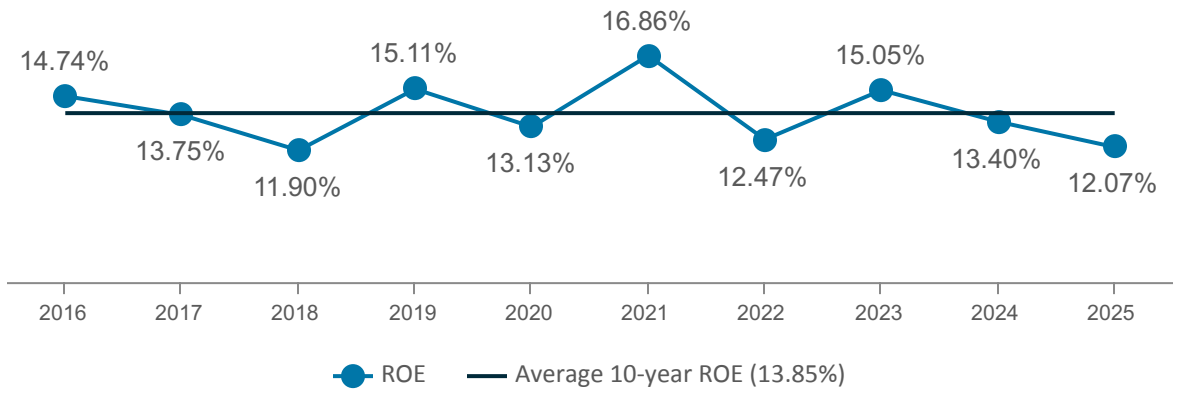

The majority of residential mortgage arrears activity occurs in the 1-30 day category, in which the bulk of arrears are resolved and do not migrate to arrears categories over 30 days. We closely monitor and actively manage these arrears. We believe that we have a quality uninsured residential mortgage loan portfolio with an average loan to value of 66.3% at December 31, 2025 based on an industry index of current real estate values.

We have historically had low arrears related to our construction loan portfolio due to our prudent and selective lending methodology and our account management processes in this product type. We believe that we have a quality construction loan portfolio with an average loan to value of 60.7% at December 31, 2025 based on appraisal values. We have a strong track record with our asset recovery programs as the need arises.

Our Shareholder Returns

ROE is a key performance metric for MCAN. With our diversified asset base, we believe that we are able to generate strong returns for shareholders through various cycles of the real estate market. Despite market volatility in 2025 broadly affecting public company share prices, we recorded a positive total shareholder return[1] (dividends plus share price appreciation) in 2025 of 33% and a compound annual growth rate of our total shareholder return[1] for the last 5 years of almost 20%.

Historical ROE[1]

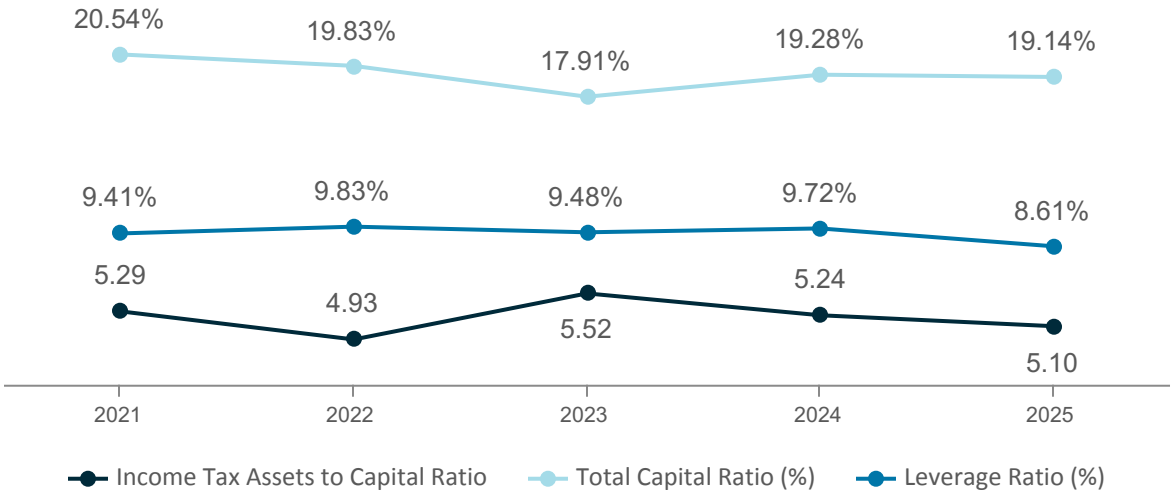

Our long-term objective is sustained 13% to 15% average ROE. The nature of our investing activities may result in fluctuations in our ROE year to year. ROE for this year was mainly impacted by higher provisions for credit losses due to interest provisioning on our impaired residential construction loans, growth in our uninsured residential mortgages and worsening macroeconomic forecasts. In the last 10 years, we have delivered an average ROE[1] of 13.85%.

Our Capital Strength

We manage our capital and asset balances based on the regulations and limits of the *Trust and Loan Companies Act* (the "Trust Act"), *Income Tax Act* (Canada) (the "Tax Act") and the Office of the Superintendent of Financial Institutions Canada ("OSFI"). Our strong capital base over the years has allowed us to pursue our growth strategy while achieving our long-term objectives. We have made a conscious effort to try to optimize our balance sheet in order to position ourselves well for future growth and returns.

Historical Capital Ratios

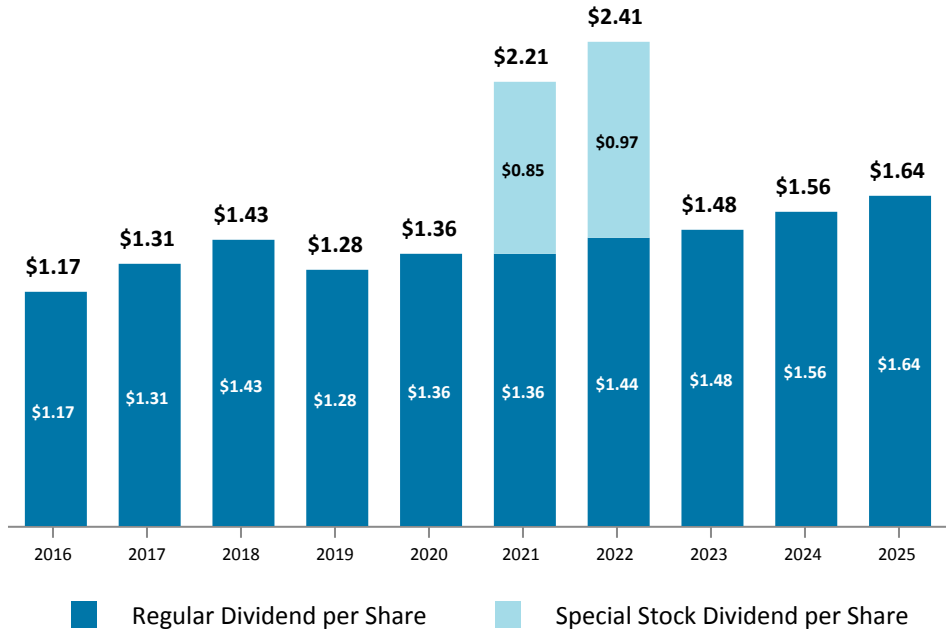

Our capital ratios have adjusted over the years as we have optimized our balance sheet, growing our assets utilizing excess capital room. We had capital growth of $22.5 million due to our at-the-market equity program and $9.4 million from our dividend reinvestment program so far this year. In 2025, shareholders' equity grew by 8% while total assets grew by 21% reflecting an efficient use of our capital. Further growth in our capital will be dependent on equity market conditions and shareholder appetite as well as business growth opportunities. All of our capital and leverage ratios are within our internal risk appetite and regulatory guidelines.

Our Dividends

Uniquely structured as a MIC, our dividend policy is to pay out substantially all of our taxable income to our shareholders. These dividends are taxable to our shareholders as interest income. Should taxable income per share exceed our regular cash dividends per share, we would distribute special cash or stock dividends per our dividend policy. We have been paying regular dividends since our founding in 1992.

Dividend History

The Board of Directors declared a first quarter regular cash dividend of $0.43 per share (an increase of 5% from our fourth quarter 2025 dividend) to be paid March 31, 2026 to shareholders of record on March 13, 2026.

[1] Considered to be a non-GAAP and other financial measure. For further details, refer to the "Non-GAAP and Other Financial Measures" of our 2025 MD&A available below or on SEDAR+ at www.sedarplus.ca. MANAGEMENT'S DISCUSSION AND ANALYSIS OF OPERATIONS

MCAN Mortgage Corporation is doing business as ("d/b/a") MCAN Financial Group ("MCAN", the "Company" or "we"). This Management's Discussion and Analysis of Operations ("MD&A") should be read in conjunction with the consolidated balance sheets and accompanying notes at December 31, 2025 and December 31, 2024 and the consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for the years then ended, which have been prepared in accordance with International Financial Reporting Standards ("IFRS"), which are the Generally Accepted Accounting Principles ("GAAP") in Canada, and presented in Canadian currency. This MD&A has been presented as of February 23, 2026.

Additional information regarding MCAN, including copies of our continuous disclosure materials such as the Annual Information Form, are available on the System for Electronic Document Analysis and Retrieval ("SEDAR+") at www.sedarplus.ca and our website at www.mcanfinancial.com.

A CAUTION ABOUT FORWARD-LOOKING INFORMATION AND STATEMENTS

This MD&A contains forward-looking information within the meaning of applicable Canadian securities laws. All information contained in this MD&A, other than statements of current and historical fact, is forward-looking information. All of the forward-looking information in this MD&A is qualified by this cautionary note. Often, but not always, forward-looking information can be identified by the use of words such as "may," "believe," "will," "anticipate," "expect," "planned," "estimate," "project," "future," and variations of these or similar words or other expressions that are predictions of, or indicate, future events and trends and that do not relate to historical matters. Forward-looking information in this MD&A includes, among others, statements and assumptions with respect to:

- the current business environment, economic environment and outlook;
- possible or assumed future results;
- our ability to create shareholder value;
- our business goals and strategy;
- the potential impact of new regulations and changes to existing regulations as well as any changes in tax legislation;
- the stability of home prices;
- the effect of challenging conditions on us;
- the performance of our investments;
- factors affecting our competitive position within the housing lending market;
- international trade, including changes in tariffs, international economic uncertainties, failures of international financial institutions and geopolitical uncertainties and their impact on the Canadian economy;
- sufficiency of our access to liquidity and capital resources;
- the timing and effect of interest rate changes on our cash flows; and
- the declaration and payment of dividends.

Forward-looking information is not, and cannot be, a guarantee of future results or events. Forward-looking information reflects management's current beliefs and is based on information currently available to management. Forward-looking information is based on, among other things, opinions, assumptions, estimates and analyses that, while considered reasonable by us at the date the forward-looking information is provided, inherently are subject to significant risks, uncertainties, contingencies and other factors that may cause actual results and events to be materially different from those expressed or implied by the forward-looking information.

The material factors or assumptions that we identified and were applied by us in drawing conclusions or making forecasts or projections set out in the forward-looking information, include, but are not limited to:

- our ability to successfully implement and realize on our business goals and strategy;
- government regulation of our business and the cost to us of such regulation;
- factors and assumptions regarding interest rates, including the effect of Bank of Canada actions already taken;
- the effect of supply chain issues;
- the effect of inflation;
- housing sales and residential mortgage borrowing activities;
- the effect of household debt service levels;
- the effect of competition;
- systems failure or cyber and security breaches;
- the availability of funding and capital to meet our requirements;
- investor appetite for securitization products;
- the value of mortgage originations;
- the expected spread between interest earned on mortgage portfolios and interest paid on deposits;
- the relative uncertainty and volatility of real estate markets;
- acceptance of our products in the marketplace;
- the stage of the real estate cycle and the maturity phase of the mortgage market;
- impact on housing demand from changing population demographics and immigration patterns;
- our ability to forecast future changes to borrower credit and credit scores, loan to value ratios and other forward-looking factors used in assessing expected credit losses and rates of default;
- availability of key personnel;
- our operating cost structure;
- the current tax regime; and
- operations within, and market conditions relating to, our equity and other investments.

External geopolitical conflicts and government and Bank of Canada economic policy have resulted in uncertainty relating to the Company's internal expectations, estimates, projections, assumptions and beliefs, including with respect to the Canadian economy, employment conditions, interest rates, supply chain issues, international trade, inflation, levels of housing activity and household debt service levels. There can be no assurance that such expectations, estimates, projections, assumptions and beliefs will continue to be valid. The impacts that any further or escalating geopolitical conflicts will have on our business is uncertain and difficult to predict.

Reliance should not be placed on forward-looking information because it involves known and unknown risks, uncertainties and other factors, which may cause actual results to differ materially from anticipated future results expressed or implied by such forward-looking information. Factors that could cause actual results to differ materially from those set forth in the forward-looking information include, but are not limited to, the risk that any of the above opinions, estimates or assumptions are inaccurate and the other risks and uncertainties referred to in our Annual Information Form for the year ended December 31, 2025, this MD&A and our other public filings with the applicable Canadian regulatory authorities.

Subject to applicable securities law requirements, we undertake no obligation to publicly update or revise any forward-looking information after the date of this MD&A whether as a result of new information, future events or otherwise or to explain any material difference between subsequent actual events and any forward-looking information. However, any further disclosures made on related subjects in subsequent reports should be consulted.

[1] Considered to be a non-GAAP and other financial measure. For further details, refer to the "Non-GAAP and Other Financial Measures" section of this MD&A. Non-GAAP and other financial measures and ratios used in this document are not defined terms under IFRS and, therefore, may not be comparable to similar terms used by other issuers.
[2] For further information refer to the "Taxable Income" and "Income Tax Capital" sections of this MD&A. Tax balances are calculated in accordance with the Tax Act.
[3] This measure has been calculated in accordance with OSFI's Leverage Requirements guidelines. Mortgages securitized through the market MBS program and CMB program for which derecognition has not been achieved are included in regulatory assets in the leverage ratio. For further information, refer to the "Capital Management" section of this MD&A.
[4] These measures have been calculated in accordance with OSFI's Capital Adequacy Requirements guidelines.

Annual Trends

- For 2025 compared to 2024, our net income reflected significant growth in our assets under management offset by the impact of lower net interest margin from a decline in interest rates. We also had higher income from our investment in MCAP Commercial LP ("MCAP") and higher fair value on our securities partially offset by provisions for credit losses due to uncertainty in the forecasted economic and geopolitical environment. We continued to increase our capital base from our at-the-market equity program ("ATM Program").

- For 2024 compared to 2023, our net income increased slightly due to growth in our mortgage portfolios, higher equity income from our investment in MCAP, and higher spread on our securitized mortgages. This was partially offset by a lower spread on our non-securitized mortgages in a declining interest rate environment and unrealized losses on our non-marketable securities. Our mortgage assets continued to grow into 2024 compared to 2023 due to higher net origination volumes and solid renewals, supported by growth in our capital base from our overnight marketed offering and our ATM Program.

- Taxable income per share fluctuations in the three year period are mainly due to growth in our mortgage business and volatility in taxable income recorded from our investment in MCAP due to timing differences between tax and accounting income.

Quarterly Trends

- In 2024, we saw the beginning of interest rate cuts which helped initially with a recovery on REIT stock prices; however, Q4 2024 saw larger unrealized losses on our REITS and our non-marketable securities mainly related to the economic environment and its impact on valuations. In 2025, income from MCAP has been higher and we increased our provision for credit losses mainly due to interest provisioning on our impaired construction loans and forward looking macroeconomic impacts in the current economic and geopolitical environment.

- In Q1 2024, the higher interest rate environment had increased rates in our floating rate residential construction portfolio above their floor rates. We also focused on changing the laddering of the duration of our term deposits which kept average term deposit rates from rising faster than our mortgage rates. This increased our spread of non-securitized mortgages over term deposit interest and expenses. Beginning in Q2 2024, we saw a larger decline in our spread of non-securitized mortgages over term deposit interest and expenses as rates on our non-securitized mortgages fell faster than our term deposits in the declining interest rate environment. In Q4 2024 and Q1 2025, we saw increases in our spread of non-securitized mortgages over term deposit interest and expenses due to our hedging strategies and pricing initiatives which lowered our term deposit costs more than our non-securitized mortgage rates. Beginning in Q2 2025, the decline is mainly due to prime rate cuts impacting our floating rate residential construction loans, with some improvements from new hedging positions in Q4 2025.

- Common Equity Tier 1 ("CET 1"), Tier 1 Capital and Total Capital to risk-weighted assets ratio reductions are generally due to our growing risk-weighted assets compared to our capital base as we optimize the amount of capital held. In 2024 and 2025, we raised $7 million and $22 million, respectively, of capital through our ATM Program. Improvement to our ratios in Q1 2024 was due to a successful $29 million capital raise by way of an overnight marketed offering. Our Dividend Reinvestment Program ("DRIP") provides us with a reliable source of capital each quarter. All of our capital and leverage ratios are within our internal risk appetite and regulatory guidelines.

- Mortgage arrears have varied on a quarterly basis given the nature of the 1-30 day arrears. The majority of residential mortgage arrears activity occurs in the 1-30 day category, in which the bulk of arrears are resolved and do not migrate to arrears categories over 30 days. Our greater than 30 days arrears increased in Q4 2025 in our uninsured residential mortgages; however, we believe overall that we have a quality uninsured residential mortgage loan portfolio with an average loan to value ("LTV") of 66.3% at December 31, 2025 based on an industry index of current real estate values. For our residential construction loan arrears, we expect them to be brought current or we have initiated asset recovery programs. We have a strong track record with our default management processes and asset recovery programs as the need arises. Our realized loan losses on our construction portfolio have been negligible.

BUSINESS OVERVIEW AND OUTLOOK

We focus over the long term on sustainably growing our business and shareholder returns. We believe that our long-term strategy will continue to serve us well, although we always consider the current market conditions in the execution of that strategy. In the short term, we are focused on managing our shareholder returns in light of continued geopolitical and economic uncertainty. Over the mid-term, our focus is to grow our business and our shareholder returns within our risk appetite, working with our strategic partners, and investing in infrastructure and process improvements to drive efficiencies and operating leverage in all our operations. We believe that our greater than three decade history demonstrates that we are a prudent and disciplined lender to the Canadian residential real estate markets with a strong credit profile with conservative LTV ratios. We have key relationships with our brokers and strategic partners that are foundational to our strategy. This strategy and long-term outlook are based on assumptions learned from our over three decades of experience, our market knowledge, and sources we consider reliable.

Economic Outlook

Canadian economic growth is expected to further stabilize with continued job growth and improvement in overall household finances. However, affordability is hurting some Canadians more than others with weakness in certain sectors directly impacted by international trade. The economy overall is showing signs of resilience with modest domestic product ("GDP") per-capita growth, helped by increased government economic support and Bank of Canada rate cuts. Unemployment has likely peaked as improved business confidence suggests hiring demand is stabilizing. The magnitude and duration of any further changes in tariffs on international trade present a risk for the Canadian economy with the potential for weaker GDP and higher unemployment. Most economists believe that interest rates will remain at current levels given uncertainty. Slower immigration growth and an aging population will also create a drag on GDP growth. We expect geopolitical uncertainty and its impact on the economy to be the dominant concern for the year ahead.

Housing Market Outlook

Housing affordability continues to be a concern across Canada. Pressure on housing prices in some cities and regions will be tempered by the recent interest rate cuts providing some relief to homebuyers in the short-term. In the long term, we believe that the continued supply-demand imbalance for housing will provide upward pressure on sale and home price growth, particularly in and around our core markets of (i) the Greater Toronto Area; (ii) the Capital Region; and (iii) the Greater Vancouver area. Housing affordability and reduced immigration will likely limit some of this growth. Housing affordability (including housing supply) continues to be a critical issue for all levels of government and in all provinces where we do business. The lack of supply of affordable housing is not easily resolved in the short term, as there are multiple factors to building new supply (i.e. local/municipal government processes, skilled labour shortages, increased construction costs including higher construction financing rates, lack of new construction technologies, etc.) that limit how many homes can be built in the short term.

Business Outlook

We believe that our business is well structured with its focus on multiple facets of the Canadian residential real estate market and diversified funding. This gives us some flexibility in terms of income generation and allows us to balance the volatility that we may experience at certain points and in certain areas of our business. We believe that there is an opportunity to expand our core businesses without taking on significantly more risk. We will also continue to place an emphasis on investing in our infrastructure and process improvements to drive operating leverage. We will remain nimble, however, in dealing with any market changes or opportunities that may arise in any of our businesses in the short term. With a strong liquidity and capital position, high level of credit quality, and our strategy of continued diversification of our lending portfolio and funding base, we believe we are well positioned for continued growth.

MCAN Capital Division

Our MCAN Capital division manages our construction, commercial and uninsured - completed inventory lending portfolios. We expect continued high demand for more affordable housing, which is our main strategy. We have seen growth in the MCAN Capital portfolio, which is over $1.3 billion, and we are building our pipeline to manage runoff from completed projects and maintain controlled growth, despite headwinds in the housing market. We are also looking at new products within the construction and commercial space to further diversify this portfolio. We continue to monitor the entire portfolio and the market very closely, and we will continue to use our credit management practices in the context of the prevailing market. Tariffs on international trade may further increase construction costs. All these factors have, and may continue to have, an impact on the timing of repayments as loans remain outstanding longer; however, they have not changed the overall expected success of these construction projects or the performance of the loans within this portfolio. Our philosophy within our MCAN Capital division is to apply a prudent approach to our underwriting criteria in line with our risk appetite, with a focus on well-located and more affordable residential products, near transit corridors, with experienced borrowers and developers where we have existing relationships. We will continue to remain vigilant in our underwriting and loan management practices and look to onboard new borrowers and developers that fit within our lending philosophy.

MCAN Home Division

Our MCAN Home division manages our residential lending business. Given the geopolitical and economic environment, our risk management, credit monitoring and assessment activities continue to have a heightened focus in operating our business. We continue to focus on proactively protecting our net interest margins on our residential mortgages with our credit underwriting to ensure that we are adequately compensated for the level of risk we may take. We expect a moderate increase in home purchase activity, and more competition in our market in order to attract what demand is coming in for both originations and renewals; however, the economic impact of the current geopolitical environment remains uncertain. Despite the noted uncertainty, we have continued to grow our business while taking a prudent approach to mortgage originations. We are also looking to further grow our uninsured residential mortgage originations as we scale our new uninsured residential mortgage securitization program with a Canadian Schedule I Chartered bank. In 2025, we securitized $340 million under this program for the first time. This is an integral part of our funding diversification and capital optimization strategy. We remain dedicated to continuously improving our service for our borrowers and the broker community, and as such, we will continue to invest in our current and new systems and business infrastructure to further enhance our service experience. We will also look to expand to other urban markets within Canada. We will continue to keep abreast of the many changes in the market, the regulatory environment and in our portfolios that could impact our business or that could create opportunities in line with our risk appetite.

MCAN Wealth Division

Our MCAN Wealth division manages our term deposit business. We issue both retail and wholesale term deposits that are eligible for CDIC deposit insurance that are sourced through a network of independent brokers and financial agents, as well as through our digital direct-to-consumer platform. We expect originations of term deposits to maintain the level of mortgage growth we have achieved. We expect there will continue to be volatility in the Government of Canada bond yield curve and, therefore, volatility in pricing in the term deposit market due to changing demand from interest rate changes and financial institution appetite for term deposits. We continue to look for opportunities to adjust the maturity terms of our term deposits relative to our mortgage portfolio in line with interest rate forecasts. We will continue to utilize our hedging strategies to minimize interest rate risk in this rate environment, particularly if our floating rate construction lending portfolio floats down to floor rates. We will continue to expand our broker networks, grow our direct-to-consumer platform and look for other channels to source term deposits. We have invested in, and expect to continue to invest in, our current and new systems and business infrastructure and processes to drive efficiencies.

We are expanding and maturing our capital markets, investor relations and funding diversification strategies over the long term to continue our growth. That growth will be dependent on business growth opportunities as well as equity market conditions and shareholder appetite. We will continue to leverage our ATM and DRIP programs, and other share offerings when it makes sense. MCAN's management and Board are committed to proactively and effectively managing and evolving all our strategies, business activities and team members to achieve 10% average annual growth in assets over the long term, 13% to 15% average return on average shareholders' equity, and sustained and prudent dividend growth.

This Outlook contains forward-looking statements. For further information, refer to the "A Caution About Forward-looking Information and Statements" section of this MD&A.

HIGHLIGHTS

Q4 2025

- Net income totalled $17.6 million in Q4 2025, an increase of $9.9 million (128%) from $7.7 million in Q4 2024. Our Q4 2025 results were mainly impacted by higher fair value gains on our marketable and non-marketable securities partially offset by higher provisions for credit losses compared to Q4 2024.

- Pre-provision pre-tax income ("PPPT")[1] totalled $23.0 million in Q4 2025, an increase of $15.4 million (204%) from $7.6 million in Q4 2024. PPPT was mainly impacted by the same factor as net income described above excluding provisions for credit losses.

- Earnings per share totalled $0.44 in Q4 2025, an increase of $0.24 (120%) from $0.20 in Q4 2024.

- Return on average shareholders' equity[1] was 11.02% in Q4 2025, an increase from 5.14% in Q4 2024.

- Net interest income of $24.7 million was little changed from Q4 2024.

    - Net interest income - non-securitized assets decreased by $0.8 million in Q4 2025 from Q4 2024 as there was a shift from non-securitized to securitized assets of $1.2 million as we securitized uninsured residential mortgages as part of a securitization program sponsored by a Canadian Schedule I Chartered bank. We also had a higher average non-securitized mortgage portfolio balance from mortgage portfolio growth that offset by a reduction in the spread of non-securitized mortgages over term deposit interest and expenses. The decrease in the spread of non-securitized mortgages over term deposit interest and expenses is mainly due to a larger decrease in our mortgage rates, particularly our floating rate residential construction portfolio as prime rates have continued to decline, compared to our term deposits. This was partially offset by residential mortgage pricing initiatives and continuing to manage our interest rate risk through the duration of our term deposit funding and related hedging strategies.

    - Net interest income - securitized assets increased by $0.8 million in Q4 2025 from Q4 2024 due to a higher average securitized mortgage portfolio balance from higher securitization volumes of residential mortgages exceeding maturities. There was also a shift in net interest income from non-securitized to securitized assets as noted above.

- Provision for credit losses on our portfolio was $6.1 million in Q4 2025 mainly due to interest provisioning on our impaired residential construction loans and growth in our uninsured residential mortgages. We believe that we have a quality uninsured residential mortgage loan portfolio with an average LTV of 66.3% at December 31, 2025. In Q4 2024, we had a provision for credit losses of $1.2 million mainly due to growth in our mortgage portfolio and provisioning on impaired residential construction loans partially offset by improvements to economic forecasts, particularly falling interest rates and a recovery in the housing price index.

- Equity income from MCAP totalled $7.8 million in Q4 2025, an increase of $0.6 million (8%) from $7.2 million in Q4 2024, which was primarily due to higher securitization income from higher average portfolio balances and lower non-securitized interest expenses as interest rates have declined.

- Net change in unrealized fair value loss on our marketable securities of $0.2 million in Q4 2025 compared to a $7.8 million net change in unrealized fair value loss in Q4 2024. We continue to realize the benefits of regular cash flows and distributions from these investments.

- Net realized and change in unrealized fair value gain on our non-marketable securities of $1.1 million in Q4 2025 mainly relating to net gains from updated property valuations as well as actual execution on leasing activities. In Q4 2024, we had a $3.6 million net realized and change in unrealized fair value loss on

our non-marketable securities investments due to updated property valuations in an uncertain economic environment.

Fiscal 2025

- Net income totalled $74.9 million for 2025, a decrease of $2.7 million (3%) from $77.6 million for 2024. Our 2025 results mainly reflected significant growth in our assets under management offset by the impact of lower net interest margin from a decline in interest rates. We also had higher income from our investment in MCAP and higher fair value on our securities partially offset by provisions for credit losses due to uncertainty in the forecasted economic and geopolitical environment.

- PPPT[1] totalled $88.1 million for 2025, an increase of $8.3 million (10%) from $79.8 million for YTD 2024. PPPT was impacted by the same factors as net income described above excluding provisions for credit losses.

- Earnings per share totalled $1.89 for YTD 2025, a decrease of $0.17 (8%) from $2.06 in 2024.

- Return on average shareholders' equity[1] was 12.07% for 2025 compared to 13.40% in 2024.

- Net interest income decreased slightly by $0.6 million compared to 2024 as the impact of higher non-securitized assets was offset by lower net interest margins from lower interest rates.

    - Net interest income - non-securitized assets decreased by $3.0 million from 2024 due to a shift in net interest income from non-securitized to securitized assets of $1.9 million. Beginning in 2025, we securitized uninsured residential mortgages as part of a securitization program sponsored by a Canadian Schedule I Chartered bank. In addition, a reduction in the spread of non-securitized mortgages over term deposit interest and expenses was partially offset by a higher average non-securitized mortgage portfolio balance from continued originations and renewals. For 2025, the decrease in the spread of non-securitized mortgages over term deposit interest and expenses is mainly due to the same factors as for Q4 2025 mentioned above.

    - Net interest income - securitized assets increased by $2.4 million from 2024 due to the above noted shift from non-securitized to securitized uninsured assets noted above. In addition, a higher average securitized mortgage portfolio balance from higher securitization volumes of residential mortgages exceeding maturities.

- Provision for credit losses on our portfolio was $13.5 million for 2025 mainly due to the same factors as Q4 2025 as well as worsening macroeconomic forecasts. For 2024, there was a provision for credit losses of $3.3 million mainly due to the same factors as described for Q4 2024 mentioned above.

- Equity income from MCAP totalled $33.4 million for 2025, an increase of $4.6 million (16%) from $28.8 million for 2024. For 2025, the increase was mainly due to higher securitization income from higher average portfolio balances and lower non-securitized interest expenses as interest rates have declined.

Business Activity and Balance Sheet

- Our mortgage portfolio totalled $5.9 billion at December 31, 2025, a net increase of $622 million (12%) from September 30, 2025 and a net increase of $1.1 billion (22%) from December 31, 2024.

- Securitized mortgages totalled $3.5 billion at December 31, 2025, a net increase of $678 million (24%) from September 30, 2025 and a net increase of $1.0 billion (43%) from December 31, 2024.

    - Securitized insured residential mortgages totalled $3.1 billion at December 31, 2025, a net increase of $526 million (20%) from September 30, 2025 and a net increase of $727 million (30%) from December 31, 2024. As we have seen favourable securitization spreads, we opted to securitize our insured residential mortgages as opposed to selling them at the commitment stage. Overall, total insured residential mortgage origination volumes are higher supported by outstanding service to our brokers and customers. Further interest rate decreases would help

first time home buyers, who would be a significant portion of the borrowers of our insured residential mortgages. We use various channels in funding the insured residential mortgage portfolio, in the context of market conditions and net contributions over the life of the mortgages, in order to support our overall business.

- Securitized uninsured residential mortgages totalled $311 million at December 31, 2025, a net increase of $152 million (95%) from September 30, 2025. Beginning in Q3 2025, we securitized uninsured residential mortgages as part of a securitization program sponsored by a Canadian Schedule I Chartered bank. We plan to grow this portfolio in order to support our overall business and optimize our balance sheet.

- Non-securitized mortgages totalled $2.5 billion at December 31, 2025, a net decrease of $56 million (2%) from September 30, 2025 and a net increase of $15 million (1%) from December 31, 2024 mainly due to a shift into securitized assets from the launch of our uninsured residential mortgage securitization program in Q3 2025.

    - Construction loan portfolios totalled $1.1 billion at December 31, 2025, a net decrease including repayments of $64 million (5%) from September 30, 2025 and a net increase including repayments of $48 million (4%) from December 31, 2024. The movement in the portfolio is attributed to new loan advances and repayments on completing projects. Originations have been steady this year with some extensions of projects due to normal construction delays or normal delays relating to the permitting and zoning process. To date, projects continue to progress toward completion.

    - Uninsured residential mortgage portfolio totalled $1.0 billion at December 31, 2025, a net decrease of $92 million (9%) from September 30, 2025 and a net decrease of $135 million (12%) from December 31, 2024 from the launch of our uninsured residential mortgage securitization program noted above. Considering both securitized and non-securitized uninsured residential mortgages, total uninsured residential mortgages totalled $1.3 billion and grew by 16% in the year. We continue to see higher uninsured originations and steady uninsured residential mortgage renewals supported by our outstanding service to our brokers and customers. We actively manage origination and renewal volumes in order to optimize our net interest margins and net income.

Dividend

- The Board declared a first quarter regular cash dividend of $0.43 per share (an increase of 5% from our fourth quarter 2025 dividend) to be paid March 31, 2026 to shareholders of record on March 13, 2026. As a MIC, we are entitled to deduct the dividends that we pay to shareholders from our taxable income.

Credit Quality

- Arrears total mortgage ratio[1] was 2.22% at December 31, 2025 compared to 2.87% at September 30, 2025 and 2.06% at December 31, 2024. The majority of our residential mortgage arrears activity occurs in the 1-30 day category, in which the bulk of arrears are resolved and do not migrate to arrears categories over 30 days. Our greater than 30 days arrears has increased in our uninsured residential mortgages compared to last quarter and we believe overall that we have a quality uninsured residential mortgage loan portfolio with an average LTV of 66.3% at December 31, 2025 compared to 65.4% at September 30, 2025 and 63.7% at December 31, 2024 based on an industry index of current real estate values. With respect to our construction loan portfolio, we have a strong track record with our default management processes and asset recovery programs as the need arises.

- Impaired non-securitized mortgage ratio[1] was 1.69% at December 31, 2025 compared to 2.61% at September 30, 2025 and 2.46% at December 31, 2024. At December 31, 2025, impaired mortgages represent impaired construction loans as well as uninsured residential mortgages where asset recovery programs have been initiated or we expect the loans to be brought current. We monitor the delinquency and impairment status of our loans and take appropriate steps with our borrowers to ensure an optimal

resolution. The decrease in the quarter is mainly due to successful resolution in our impaired construction loans.

- Impaired total mortgage ratio[1] was 0.70% at December 31, 2025 compared to 1.25% at September 30, 2025 and 1.25% at December 31, 2024.

Capital

- We manage our capital and asset balances based on the regulations and limits of both the *Income Tax Act* (Canada) (the "Tax Act") and the Office of the Superintendent of Financial Institutions Canada ("OSFI").

- We have a Base Shelf prospectus allowing us to make certain public offerings of debt or equity securities during the period that it is effective, through Prospectus Supplements. We have an ATM Program, established pursuant to a Prospectus Supplement to our Base Shelf prospectus, allowing us to issue up to $75 million common shares to the public from time to time at the market prices prevailing at the time of sale. We issued $6.8 million in new common shares through the ATM Program in Q4 2025 compared to $4.1 million in Q4 2024. In 2025, we issued $23.4 million compared to $7.4 million in 2024. The volume and timing of distributions under the ATM Program are determined at MCAN's sole discretion.

- We issued $9.4 million in new common shares through the Dividend Reinvestment Plan ("DRIP") in 2025 compared to $14.8 million in 2024. The DRIP participation rate for 2025 dividends was 15% compared to 22% in 2024.

- Income tax assets to capital ratio[3] was 5.10 at December 31, 2025 compared to 5.45 at September 30, 2025 and 5.24 at December 31, 2024.

- Common Equity Tier 1 ("CET 1") and Tier 1 Capital to risk-weighted assets ratios[2] were 18.82% at December 31, 2025 compared to 19.01% at September 30, 2025 and 19.02% at December 31, 2024. Total Capital to risk-weighted assets ratio[2] was 19.14% at December 31, 2025 compared to 19.32% at September 30, 2025 and 19.28% at December 31, 2024. Leverage ratio[2] was 8.61% at December 31, 2025 compared to 9.27% at September 30, 2025 and 9.72% at December 31, 2024. All of our capital and leverage ratios are within our regulatory and internal risk appetite guidelines.

[1] *Considered to be a non-GAAP and other financial measure. For further details, refer to the "Non-GAAP and Other Financial Measures" section of this MD&A. Non-GAAP and other financial measures and ratios used in this document are not defined terms under IFRS and, therefore, may not be comparable to similar terms used by other issuers.*

[1] Considered to be a Non-GAAP and other financial measure. The net non-securitized mortgage spread income and the spread of non-securitized mortgages over term deposit interest and expenses are indicators of the profitability of income earning assets less the cost of funding. Net non-securitized mortgage spread income is calculated as the difference between non-securitized mortgage interest and term deposit interest and expenses, both of which are IFRS measures. Average rate is equal to income/expense divided by the average balance over the period on an annualized basis. Income/expense incorporates items such as penalty income, commitment fee income, origination expense, commission expense and term deposit hedging gains or losses. The average rate as presented may not necessarily be equal to "Income/Expense" divided by "Average Balance", as non-recurring items such as prior period adjustments are excluded from the calculation of the average rate as applicable. For further details, refer to the "Non-GAAP and Other Financial Measures" section of this MD&A. Non-GAAP and other financial measures and ratios used in this document are not defined terms under IFRS and, therefore, may not be comparable to similar terms used by other issuers.

[1] Construction, commercial and completed inventory originations represent all advances on loans.
[2] Includes residential mortgage commitments sold that the Company originated.

Overview

For Q4 2025 and the year ended 2025, the decrease in the spread of non-securitized mortgages over term deposit interest and expenses compared to Q4 2024 and the year ended 2024 is due to the decrease in our mortgage rates, mainly in our floating rate residential construction portfolio as prime rates have declined 250 bps since mid-2024, generally exceeding the pace of decrease in our average term deposit rates and related hedges due to the timing of new hedging positions. For Q4 2025 compared to Q3 2025, we have seen a slight improvement in our spread as a result of our hedging strategies. We actively manage our interest rate risk by continually reviewing, and if necessary, changing the laddering of the duration of our term deposits relative to our non-securitized mortgage portfolio as well as utilizing our hedging strategies to lock-in spreads. For information on our term deposit fair value hedging, see "Derivatives and Hedging" sub-section below.

Residential Mortgage Lending

Residential mortgages provide comparatively lower yields than construction and commercial loans given their risk profile, with uninsured residential mortgages providing higher yields than insured residential mortgages. We opportunistically invest in our residential uninsured - completed inventory portfolio which often migrate from our own construction book.

Excluding residential mortgages uninsured - completed inventory, which is invested in opportunistically as deals arise, total residential mortgage origination volumes in 2025 were higher compared to Q4 2024 and YTD 2024 as rates have begun to decline in the current environment, as well as our outstanding service to our brokers and customers. We also saw steady uninsured residential mortgage renewals as borrowers continue to find it more convenient to stay with their existing lender in the current market environment.

Our insured adjustable rate residential mortgage product also saw an increase in the current year, as many borrowers believe that interest rates have peaked and that there could be further interest rate cuts this year. Of note, unlike traditional insured variable rate mortgages, payments on our insured adjustable rate residential mortgages change as interest rates move with no changes to loan amortization. We also underwrite our insured adjustable rate mortgages for credit quality accordingly and our borrowers expect their payments under this product to change as interest rates change.

We continue to enhance our internal sales and marketing capabilities, and strengthen relationships and customer service with the broker community. We will continue to invest in new technology and add new products that fit within our risk appetite to further enhance our service experience and broaden our offering to our customers.

We have agreements whereby we can sell our (i) insured and uninsured residential mortgage commitments; and (ii) uninsured residential mortgage whole loans. We originated and sold $34 million in commitments in Q4 2025 (Q3 2025 - $19 million; Q4 2024 - $15 million) and $106 million in 2025 (2024 - $16 million) under these agreements. In 2025, we sold $21 million of uninsured residential mortgage whole loans (2024 - $45 million).

We securitize our insured residential mortgages opportunistically through the CMHC National Housing Act ("NHA") Mortgage-Backed Securities ("MBS") program. Our Q4 2025 insured residential mortgage securitization volumes were $757 million (Q3 2025 - $392 million; Q4 2024 - $211 million) and $1,413 million in 2025 (2024 - $803 million). As we have seen favourable securitization spreads, we opted to securitize our insured residential mortgages as opposed to selling them at the commitment stage. Overall, total insured residential mortgage origination volumes are higher supported by outstanding service to our brokers and customers. Further interest rate decreases would help first time home buyers, who would be a significant portion

of the borrowers of our insured residential mortgages. Renewals of securitized mortgages fluctuate each period depending on the maturities in the securitization portfolio.

Beginning in 2025, we securitized uninsured residential mortgages as part of a securitization program sponsored by a Canadian Schedule I Chartered bank. Uninsured residential mortgage securitization volumes were $176 million in Q4 2025 (Q3 2025 - $163 million) and $340 million in 2025. We plan to grow this portfolio in order to support our overall business and optimize our balance sheet.

Mortgage Renewal Rights

Through our origination platform, we retain the renewal rights to internally originated residential mortgages that are held as non-securitized or securitized mortgages or have been sold to third parties and derecognized from the consolidated balance sheet. At maturity, we have the right to renew these mortgages, which we believe will contribute to future income including renewal income. At December 31, 2025, we had the renewal rights to $4.1 billion of residential mortgages (September 30, 2025 - $4.0 billion; December 31, 2024 - $3.6 billion).

Construction and Commercial

We continue to focus on growing our balances in our residential construction portfolio in selected markets, with our preferred borrowers and risk profile as they tend to provide comparatively higher yields given their risk profile. For Q4 2025 and the year ended 2025 compared to Q3 2025, Q4 2024 and the year ended 2024, the decrease in average rates is mainly due to Bank of Canada interest rate cuts reducing our mostly floating rate construction loans and competitive pricing for quality deals. Higher average balances offset by lower average residential construction rates from the declining interest rate environment contributed to a slightly lower non-securitized mortgage interest compared to prior periods. Since this portfolio is entirely at prime-based floating rates, we are utilizing our hedging strategies on term deposits to manage spreads on our construction and commercial loans in a decreasing interest rate environment. For information on our term deposit fair value hedging, see "Derivatives and Hedging" sub-section below.

Some projects may experience construction delays for a variety of factors including extended permitting, presale or contracting activities given the current state of the housing market. To date, projects continue to progress toward completion within our expected margins. Current impaired construction mortgages include mortgages where asset recovery programs have already been initiated. We have a strong track record with our default management processes and asset recovery programs as the need arises. Our realized loan losses on our construction portfolio have been negligible. Our prudent underwriting approach requires satisfactory borrower liquidity, guarantor net worth and presale requirements as applicable to the respective markets.

Term Deposit Interest and Expenses

The reduction in term deposit interest and expenses for Q4 2025, Q3 2025, and YTD 2025 compared to prior year periods was mostly due to lower average term deposit rates and related hedges from a declining interest rate environment. We have been actively managing our interest rate risk during this period of changing interest rates by changing the laddering of the duration of our term deposits relative to our non-securitized mortgage portfolio and utilizing hedging strategies. Term deposit expenses include costs related to insurance, operating infrastructure and administration. For information on our term deposit fair value hedging, see "Derivatives and Hedging" sub-section below.

Derivatives and Hedging

Cash Flow Hedging

We may enter into Government of Canada bond forward contracts to hedge interest rate risk arising from the impact of (i) movements in interest rates between the time insured residential mortgages are funded and the time that these mortgages are securitized; and (ii) movements in interest rates between the time term deposit funding is forecasted to be required and the time that the actual funding occurs. Hedges are structured such that the fair value movements of the hedge instruments offset, within a reasonable range, the changes in fair value of either the pool of fixed-rate mortgages or term deposits due to interest rate fluctuations. The term of our cash flow hedges is generally less than 60 days. The derivative instruments are settled at either the time of securitization or funding of the term deposits, as applicable. We apply cash flow hedge accounting to these derivative transactions with the intention to recognize the effective matching of the gain or loss on the derivative transactions with the recognition of the related interest expense for either the securitization or term deposit funding.

At December 31, 2025, we had $0.2 million of unrealized fair value gains on derivatives financial assets outstanding relating to cash flow hedges (September 30, 2025 - $nil; December 31, 2024 - $nil) on our consolidated balance sheets. In Q4 2025, we had net fair value gains of $0.7 million (Q3 2025 - $0.2 million fair value losses; Q4 2024 - $nil fair value gains), and in 2025, we had net fair value gains of $1.1 million (2024 - $1.9 million fair value losses) on our derivative transactions recognized in accumulated other comprehensive income.

Fair Value Hedging

We may enter into interest rate swaps to hedge interest rate risk arising from fair value changes in our fixed-rate term deposits due to movements in interest rates. Hedges are structured such that the fair value movements of the hedge instruments offset, within a reasonable range, the changes in fair value of the pool of term deposits due to interest rate fluctuations. The terms of our fair value hedges are generally less than two years but may go up to five years. The derivative instruments are settled at the time of maturity of the pool of term deposits. We apply fair value hedge accounting to these derivative transactions with the intention to recognize the effective matching of the fair value gain or loss on the derivative transactions with the fair value gain or loss on the pool of term deposits, within a reasonable range. Any unmatched fair value is recorded in term deposit interest and expenses as hedge ineffectiveness.

At December 31, 2025, the Company had $1.7 million of net unrealized fair value gains on derivatives outstanding relating to fair value hedges (September 30, 2025 - $4.4 million gains; December 31, 2024 - $2.5 million gains).

Achieving hedge accounting for both our cash flow and fair values hedges allows us to reduce our net income volatility related to changes in interest rates. All of our derivative transactions are with highly rated Canadian financial institutions.

For further information, refer to Note 13 to the consolidated financial statements.

Net Interest Income - Securitization Assets

Net investment income from securitization assets relates to (i) our participation in the market MBS program and the Canada Housing Trust ("CHT") Canada Mortgage Bonds ("CMB") program; and (ii) an agreement with a Canadian Schedule I Chartered bank to participate in an uninsured residential mortgage securitization program sponsored by the bank. Under this agreement, we can sell qualifying uninsured residential mortgages that meet certain requirements into the program and they remain in the program until maturity. We securitize our residential mortgages opportunistically through these programs.

As securitization spreads continue to be favourable, we expect to continue to be aggressive in originating insured and uninsured residential mortgages for securitization.

For further information on our securitization programs, refer to the "Financial Position" section of this MD&A.

[1] Considered to be a non-GAAP and other financial measure. For further details, refer to the "Non-GAAP and Other Financial Measures" section of this MD&A. Non-GAAP and other financial measures and ratios used in this document are not defined terms under IFRS and, therefore, may not be comparable to similar terms used by other issuers.

Table 7: Net Mortgage Interest Income and Average Rate for Securitized Mortgage Portfolio - Quarterly

For the Quarters Ended	December 31, 2025			September 30, 2025			December 31, 2024		
(in thousands except %)	Average Balance[1]	Interest Income	Average Rate [1]	Average Balance [1]	Interest Income	Average Rate [1]	Average Balance [1]	Interest Income	Average Rate [1]
Mortgage interest - insured	$2,662,211	$ 22,825	3.42 %	$2,494,008	$ 20,827	3.34 %	$2,332,862	$ 18,535	3.18 %
Interest on financial liabilities from securitization - insured	2,708,346	20,049	2.96 %	2,538,426	18,260	2.87 %	2,352,941	15,511	2.64 %
Net securitized insured mortgage spread income [1]		$ 2,776			$ 2,567			$ 3,024	
Spread of securitized insured mortgages over liabilities [1]			0.46 %			0.47 %			0.54 %
Mortgage interest - uninsured	$ 217,862	$ 3,319	6.07 %	$ 76,008	$ 1,219	6.39 %	$ —	$ —	— %
Interest on financial liabilities from securitization - uninsured	195,814	2,156	3.65 %	64,470	463	4.38 %	—	—	— %
Net securitized uninsured mortgage spread income [1]		$ 1,163			$ 756			$ —	
Spread of securitized uninsured mortgages over liabilities [1]			2.42 %			2.01 %			— %
Mortgage interest - securitized assets		$ 26,144			$ 22,046			$ 18,535	
Interest on financial liabilities from securitization		22,205			18,723			15,511	
Total net securitized mortgage spread income [1]		$ 3,939			$ 3,323			$ 3,024	

Table 8: Net Mortgage Interest Income and Average Rate for Securitized Mortgage Portfolio - Annual

For the Years Ended December 31	2025			2024		
(in thousands except %)	Average Balance [1]	Interest Income	Average Rate [1]	Average Balance [1]	Interest Income	Average Rate [1]
Mortgages - securitized insured	$ 2,468,414	$ 81,354	3.30 %	$ 2,134,694	$ 63,163	2.97 %
Financial liabilities from securitization	2,505,144	70,620	2.82 %	2,152,141	53,255	2.48 %
Net securitized insured mortgage spread income [1]		$ 10,734			$ 9,908	
Spread of securitized insured mortgages over liabilities [1]			0.48 %			0.49 %
Mortgages - securitized uninsured	$ 74,071	$ 4,538	6.13 %	$ —	$ —	— %
Financial liabilities from securitization	65,606	2,620	3.80 %	—	—	— %
Net securitized uninsured mortgage spread income [1]		$ 1,918			$ —	
Spread of securitized uninsured mortgages over liabilities [1]			2.33 %			— %
Mortgage interest - securitized assets		$ 85,892			$ 63,163	
Interest on financial liabilities from securitization		73,240			53,255	
Total net securitized mortgage spread income [1]		$ 12,652			$ 9,908	

[1] Considered to be a non-GAAP and other financial measure. The net securitized mortgage spread income and spread of securitized mortgages over liabilities are indicators of the profitability of securitized assets less securitized liabilities. Net securitized mortgage spread income is calculated as the difference between securitized mortgage interest and interest on financial liabilities from securitization, both of which are IFRS measures. Average rate is equal to income/expense divided by the average balance over the period on an annualized basis. Income/expense incorporates items such as penalty income, indemnity expense and cash flow hedging gain/loss. The average rate as presented may not necessarily be equal to "Income/Expense" divided by "Average Balance", as non-recurring items such as prior period adjustments are excluded from the calculation of the average interest rate, as applicable. For further details, refer to the "Non-GAAP and Other Financial Measures" section of this MD&A. Non-GAAP and other financial measures and ratios used in this document are not defined terms under IFRS and, therefore, may not be comparable to similar terms used by other issuers.

In 2025, we have seen spreads little changed on insured securitizations compared to prior periods, although movements can occur from volatility in the current economic environment. Our spreads on our uninsured securitizations remain favourable. Over the long-term, we expect these uninsured securitization spreads to normalize in-line with our non-securitized uninsured residential mortgages.

Non-interest Income

Equity Income from MCAP

In Q4 2025, MCAP's origination volumes were $5.5 billion, a decrease from $6.3 billion in Q4 2024. For 2025, MCAP's origination volumes were $23.9 billion, an increase from $22.7 billion in 2024. At November 30, 2025 (we account for MCAP on a one-month lag basis), MCAP had $155.8 billion of assets under management compared to $157.1 billion at August 31, 2025 and $154.6 billion at November 30, 2024. Equity income from MCAP totalled $7.8 million in Q4 2025, an increase of $0.6 million from $7.2 million in Q4 2024. For Q4 2025, the increase in equity income from MCAP was primarily due to higher securitization income from higher average portfolio balances and lower non-securitized interest expenses as interest rates have declined. For fiscal 2025, equity income from MCAP totalled $33.4 million, an increase of $4.6 million from $28.8 million in 2024. For fiscal 2025, the increase in equity income from MCAP was due to the same factors as for Q4 2025 mentioned above.

We recognize equity income from MCAP on a one-month lag such that our 2025 equity income from MCAP is based on MCAP's net income for the year ended November 30, 2025. For further information on our equity investment in MCAP, refer to the "Equity investment in MCAP" sub-section of the "Financial Position" section of this MD&A.

Distribution Income from Securities

Non-marketable: We received distribution income from our Real Estate Debt Funds of $1.9 million in Q4 2025 (Q4 2024 - $2.0 million) and $6.8 million in 2025 (2024 - $7.8 million).

Marketable: Marketable securities income consists mainly of distributions from our REIT portfolio. In Q4 2025, we received distributions of $0.7 million from our REITs compared to $0.8 million in Q4 2024. In 2025, we received distributions of $3.2 million from our REITs compared to $3.1 million in 2024.

We continue to realize the benefits of regular cash flows and distributions from these investments. For further information, refer to the "Other Non-securitized Assets" section of this MD&A.

Fees

Fee income can vary between quarters given the fact that certain fees such as loan amendment and extension fees do not occur on a routine basis.

Net Gain (Loss) on Securities

In Q4 2025, we recorded a net change in unrealized fair value loss on our marketable securities of $0.2 million in Q4 2025 compared to a $7.8 million net unrealized fair value loss in Q4 2024. In fiscal 2025, we recorded a net realized and unrealized fair value gain on our marketable securities of $3.5 million compared to a $0.8 million net unrealized fair value gain for 2024. In 2025, we saw REIT prices increase marginally due to continued economic uncertainty despite a declining interest rate environment. We continue to realize the benefits of regular cash flows and distributions from these investments.

In Q4 2025, we recorded a net realized and change in unrealized fair value gain on our non-marketable securities of $1.1 million in Q4 2025 compared to a $3.6 million net realized and change in unrealized fair value loss in Q4 2024 both consisting of gains and losses from certain underlying property investments as a result of (i) updated appraisals/property valuations, net of related property debt and debt service costs; and (ii) actual executions on construction and leasing stabilization and value-add activities. In Q4 2025, we had a $0.5 million realized gain related to the sale of an underlying property. For fiscal 2025, we recorded a net realized and change in unrealized fair value loss on our non-marketable securities of $1.4 million mainly related to the same factors as for Q4 2025 mentioned above. For fiscal 2024, we had a $7.1 million net realized and change in unrealized fair value loss on our non-marketable securities investments due to the same factors as described for Q4 2024 mentioned above. Our non-marketable securities are either held for long-term capital appreciation or distribution income. Our real estate development fund investments tend to have less predictable cash flows that are predicated on the completion of the development projects within these funds.

Gain on Dilution of Investment in MCAP

In Q4 2025 and fiscal 2025, MCAP issued no additional class B units to team members of MCAP. In Q2 2024, MCAP issued additional class B units to team members of MCAP which decreased our equity interest. As a result of the issuance of new units at prices in excess of the per-unit carrying value of the investment, we recorded a dilution gain of $0.7 million in the prior year.

Provision for (Recovery of) Credit Losses

Table 9: Provision for (Recovery of) Credit Losses and Write-offs

(in thousands except basis points and %) For the Periods Ended	Q4 2025	Q3 2025	Change (%)	Q4 2024	Change (%)	Annual 2025	Annual 2024	Change (%)
Provision for (recovery of) impaired non-securitized mortgages								
Residential mortgages								
Uninsured	$ 303	344	(12%)	(76)	499%	$ 2,436	$ 863	182%

Multi-family residential	177	—	n/a	(123)	244%	142	(207)	169%
Other commercial	215	—	n/a	—	n/a	215	(2)	10,850%
	602	(249)	342%	330	82%	2,423	(703)	445%
Other provisions (recoveries)	2,522	220	1,046%	(24)	10,608%	2,741	—	n/a
Total non-securitized provision for (recovery of) credit losses	5,969	1,991	200%	1,160	415%	13,276	3,258	307%
Provision for (recovery of) performing securitized uninsured mortgages	119	65	83%	—	n/a	184	—	n/a
Total provision for (recovery of) credit losses	$ 6,088	$ 2,056	196%	$ 1,160	425%	$13,460	$ 3,258	313%
Non-securitized mortgage portfolio data:								
Provision for (recovery of) credit losses, net	$ 3,447	$ 1,771	95%	$ 1,184	191%	$10,535	$ 3,258	223%
Net write offs	$ 127	$ 155	(18%)	$ 232	(45%)	$ 817	$ 251	225%
Net write offs (basis points)	2.0	2.3	(13%)	3.7	(46%)	3.2	1.0	220%

Provisions are based on a statistical modelling methodology incorporating both internal portfolio characteristics and forward-looking macroeconomic information. Loans are segmented into homogenous risk bands based on internal risk characteristics including (but not limited to) credit scores, delinquency history, loan type and location. Historical regression methodology is used to relate expected credit loss ("ECL") to key macroeconomic indicators including house price indices, unemployment rates, interest rates and gross domestic product. Economic forecasts of these variables are then used to produce forward-looking estimates of ECL under multiple scenarios. Scenarios are probability weighted by management to obtain an aggregated forward looking view. Additionally, we may incorporate management judgment, where appropriate, in the calculation of provisions. Accordingly, provisions are expected to vary between periods.

We had a provision for credit losses on our portfolio of $6.1 million in Q4 2025, which was mainly due to interest provisioning on our impaired residential construction loans and growth in our uninsured residential mortgages. In Q4 2024, we had a provision for credit losses of $1.2 million mainly due to growth in our mortgage portfolio and provisioning on impaired residential construction loans partially offset by improvements to economic forecasts, particularly falling interest rates and a recovery in the housing price index. We had a provision for credit losses on our portfolio of $13.5 million for the year ended 2025 and $3.3 million for the year ended 2024 mainly due to the same factors as described for Q4 2025 and Q4 2024, respectively, as well as changes to macroeconomic forecasts. The current geopolitical environment has increased the level of uncertainty with respect to management's judgments and estimates including the probability weights assigned to each scenario, the impacts of monetary policy on macroeconomic indicators and the mortgage portfolio. These judgments and uncertainties have been made or assessed with reference to the facts, projections and other circumstances at December 31, 2025. IFRS 9, Financial Instruments ("IFRS 9") does not permit the use of hindsight in measuring provisions for credit losses. Since December 31, 2025, forecasts around these uncertainties have continued to evolve. Any new forward-looking information subsequent to December 31, 2025, will be reflected in the measurement of provisions for credit losses in future periods, as

appropriate. This may add significant variability to provisions for credit losses in future periods. We continue to monitor our portfolio in arrears on a regular basis to detect specific significant stress or deterioration.

Non-interest Expenses

Table 10: Non-interest Expenses

(in thousands except %) For the Periods Ended	Q4 2025	Q3 2025	Change (%)	Q4 2024	Change (%)	Annual 2025	Annual 2024	Change (%)
Salaries and benefits	$ 6,425	$ 6,933	(7%)	$ 8,791	(27%)	$ 27,350	$ 27,762	(1%)
General and administrative	8,184	8,172	—%	7,782	5%	31,825	26,275	21%
	$ 14,609	**$ 15,105**	**(3%)**	**$ 16,573**	**(12%)**	**$ 59,175**	**$ 54,037**	**10%**

The slight decrease in salaries and benefits in 2025 is mainly due to lower share-based payment accruals and severance accruals partially offset by additional resources and regular pay increases.

The increase in general and administrative expenses in 2025 is primarily due to higher mortgage servicing expenses from growth in our loan portfolios and our new office lease and leasehold improvements.

Taxable Income

The table below provides a reconciliation between consolidated net income (loss) for accounting purposes and non-consolidated taxable income (loss). Taxable income is calculated in accordance with the Tax Act. In order to take advantage of the tax benefits of our MIC status, we pay out all of MCAN's non-consolidated taxable income to shareholders through dividends. As a MIC, we are entitled to deduct dividends paid up to 90 days after year end from taxable income. Dividends that are deducted in the calculation of taxable income are not included in the table below.

Table 11: Taxable Income Reconciliation

(in thousands) For the Periods Ended	Q4 2025	Q4 2024	Annual 2025	Annual 2024
Consolidated net income for accounting purposes	$ 17,589	$ 7,725	$ 74,871	$ 77,586
Adjustments to calculate taxable income (loss):				
Reverse: Equity income from MCAP - accounting purposes	(7,780)	(7,227)	(33,444)	(28,803)
Add: MCAP taxable income (loss)	4,952	7,872	(11,187)	8,425
Add: Tax re-organization of investment in MCAP	5,000	—	17,500	—
Reverse: Provision for (recovery of) credit losses [2]	994	392	3,555	(324)
Add: Amortization of upfront securitization program costs [3]	3,468	2,711	12,999	13,437
Deduct: Securitization program mortgage origination costs [3]	(6,302)	(5,928)	(27,833)	(14,368)
Add: Securitization program premium (discount)	324	(192)	(1,349)	2,598
Reverse: Net realized and unrealized gain (loss) on securities [4]	201	11,326	(3,536)	6,343
Add: Capital gains (losses)	—	915	1,590	915
Reverse: Loss (income) earned in subsidiaries [5]	5,729	2,582	11,485	4,943
Deduct: Gain on dilution of MCAP [6]	—	—	—	(680)
Other items	804	(545)	4,011	(134)
Taxable Income (Loss)[1]	**$ 24,979**	**$ 19,631**	**$ 48,662**	**$ 69,938**

[1] Taxable income is presented above on a non-consolidated basis for the MIC entity. The current year amounts presented above represent estimates as they are not finalized until the completion of our corporate tax filings.
[2] Provisions on performing mortgages are excluded from the calculation of taxable income; provisions on impaired mortgages are 90% deductible for tax purposes.
[3] Securitization program mortgage origination costs are deductible in full for tax purposes as mortgages are securitized but are capitalized and amortized for accounting purposes. Therefore, amortization is added back in the calculation of taxable income.
[4] Excluded from the calculation of taxable income; only includes net realized gains and losses recognized in the MIC entity.
[5] Represents the component of consolidated income that is earned outside of the MIC entity, therefore excluded in the calculation of taxable income.
[6] Not recognizable in the calculation of taxable income.

Taxable income for YTD 2025 compared to YTD 2024 was lower due to lower taxable income from our investment in MCAP partially offset by the taxable capital gain recognized on an internal reorganization of our equity investment in MCAP. As a MIC, we pay out at least all of our taxable income to shareholders through dividends.

FINANCIAL POSITION

Assets

Table 12: Assets

(in thousands except %)	December 31 2025	September 30 2025	Change (%)	December 31 2024	Change (%)

Cash held in trust	71,856	62,924	14%	47,249	52%
Mortgages	3,458,671	2,781,009	24%	2,419,871	43%
Other assets	42,093	32,395	30%	20,128	109%
	3,572,620	**2,876,328**	**24%**	**2,487,248**	**44%**
	$ 6,477,470	**$ 5,909,251**	**10%**	**$ 5,347,565**	**21%**

Our total assets increased compared to September 30, 2025 and December 31, 2024 primarily due to origination volumes, including renewal activity in our residential mortgage portfolio, outpacing maturities.

In selecting residential construction projects to finance, we focus more on the affordable segments of the housing market, such as first time and move up homebuyers. These segments are characterized by affordable price points, lower price volatility and steady sales volumes based on continued family formation and migration primarily in major urban markets and their surrounding areas in proximity to transit. We focus on a diverse portfolio of predominantly first mortgage positions with 65-75% LTVs in our normal segment of lending. At December 31, 2025, the average outstanding construction loan balance was $11 million (September 30, 2025 - $11 million; December 31, 2024 - $11 million) with a maximum individual loan commitment of $40 million (September 30, 2025 - $40 million; December 31, 2024 - $38 million).

Securitized Mortgages

Securitization assets consist of (i) insured residential mortgages that have been securitized through our internal market MBS program and the CHT CMB program. We are an NHA MBS issuer, which involves the securitization of insured mortgages to create MBS; and (ii) uninsured residential mortgages securitized through a securitization program sponsored by a Canadian Schedule I Chartered bank. We can sell qualifying uninsured residential mortgages that meet certain requirements into the program and they remain in the program until maturity. Securitization is an integral part of our diversification and capital optimization strategy.

For further information, refer to Note 11 to the consolidated financial statements.

We securitized $757 million in Q4 2025 (Q3 2025 - $392 million; Q4 2024 - $211 million) and $1.4 billion in 2025 (2024 - $803 million) of insured residential mortgages through the market MBS program and CMB program. Overall, total insured residential mortgage origination volumes are higher supported by outstanding service to our brokers and customers. Further interest rate decreases would help first time home buyers, who would be a significant portion of the borrowers of our insured residential mortgages.

We may issue market MBS through the NHA MBS program and retain the underlying MBS security for liquidity purposes rather than selling the MBS to a third party. At December 31, 2025, we held $38 million of retained MBS on our balance sheet (September 30, 2025 - $39 million; December 31, 2024 - $46 million), which is included in the insured residential mortgage portfolio in non-securitized mortgages.

We securitized $128 million in Q4 2025 (Q3 2025 - $217 million; Q4 2024 - $94 million) and $604 million in 2025 (2024 - $94 million) of insured multi-family mortgages through the CMB program. At the time of the insured multi-family securitization, the Company derecognized the mortgages from its balance sheet and recorded a gain on the sale of the mortgages of $0.5 million in Q4 2025 (Q4 2024 - $0.1 million) and $2.0 million in 2025 (2024 - $0.1 million).

We securitized $176 million in Q4 2025 (Q3 2025 - $163 million) and $340 million in 2025 of uninsured residential mortgages through a securitization program sponsored by a Canadian Schedule I Chartered bank. Under this program, we can sell qualifying uninsured residential mortgages that meet certain requirements into the program and they remain in the program until maturity.

Any mortgages securitized through the market MBS program, CMB program or bank-sponsored uninsured securitization program for which derecognition is not achieved remain on the consolidated balance sheet as securitized assets and are also included in total exposures in the calculation of our leverage ratio. However, for income tax purposes, all mortgages securitized by MCAN are excluded from income tax assets. For further details on total exposures, regulatory capital and income tax assets and capital, refer to the "Capital Management" section of this MD&A.

Table 13: Mortgage Summary

(in thousands except %)	December 31 2025	September 30 2025	Change (%)	December 31 2024	Change (%)

[1] includes originations, including insured residential mortgage commitments originated and sold, renewals and transfers in from our securitization portfolio.

We continue to be selective and will reposition our loan portfolio in terms of product composition, geographic mix and exposure as required to meet changing market conditions and align to our risk appetite. We have strong strategic partnerships and relationships and we maintain a high quality of underwriting. We have also enhanced our internal sales and marketing capabilities, strengthened relationships and customer service with the broker community and increased underwriting capacity. We continue to focus on our construction and commercial portfolio growing it in selected markets, with our preferred borrowers and risk profile given they tend to provide higher yields compared to our residential mortgages.

[1] Considered to be a non-GAAP and other financial measure. For further details, refer to the "Non-GAAP and Other Financial Measures" section of this MD&A. Non-GAAP and other financial measures and ratios used in this document are not defined terms under IFRS and, therefore, may not be comparable to similar terms used by other issuers.

Figure 3: Arrears and Impaired Mortgage Ratios[1]

The majority of our residential mortgage arrears activity occurs in the 1-30 day category, in which the bulk of arrears are resolved and do not migrate to arrears categories over 30 days. While greater than 30 days arrears has increased in our uninsured residential mortgages, we believe overall that we have a quality uninsured residential mortgage loan portfolio with an average LTV of 66.3% at December 31, 2025 based on an industry index of current real estate values. With respect to our construction loan portfolio, we have a strong track record with our default management processes and asset recovery programs as the need arises. The impaired ratios, as presented above, reflect impaired (stage 3) mortgages under IFRS 9 as a percentage of the non-securitized or total mortgage portfolios, as applicable. At December 31, 2025, impaired mortgages are mainly construction mortgages as well as uninsured residential mortgages where asset recovery programs have been initiated or we expect the loans to be brought current. We monitor the delinquency and impairment status of our loans and takes appropriate steps with our borrowers to ensure an optimal resolution. Our realized loan losses on our construction portfolio have been negligible.

In the event of a protracted economic downturn due to the current geopolitical conflicts, or for any other reason, we would expect to observe an increase in overall mortgage default and arrears rates as realization periods on collateral become longer and borrowers adjust to the new economic conditions and potentially changing real estate values in such an event. An economic downturn could also result in an increase in our allowance for credit losses. MCAN utilizes a number of risk assessment and mitigation strategies to lessen the potential impact for loss on residential mortgages; however, traditional actions may not be available or effective.

For further information regarding non-securitized mortgages by risk rating, refer to Note 7 to the consolidated financial statements.

[1] Considered to be a non-GAAP and other financial measure. For further details, refer to the "Non-GAAP and Other Financial Measures" section of this MD&A. Non-GAAP and other financial measures and ratios used in this document are not defined terms under IFRS and, therefore, may not be comparable to similar terms used by other issuers.

Additional Information on Residential Mortgages and Home Equity Lines of Credit ("HELOCs")

In accordance with OSFI Guideline B-20 - *Residential Mortgage Underwriting Practices and Procedures*, additional information is provided on the composition of MCAN's residential mortgage portfolio by insurance status and province, as well as amortization periods and LTV by province. LTV is calculated as the ratio of the outstanding loan balance on an amortized cost basis to the value of the underlying collateral at the time of origination.

Insured mortgages include individual mortgages that are insured by CMHC or other approved mortgage insurers at origination and mortgages that are portfolio-insured after origination. Uninsured mortgages include both residential uninsured and residential uninsured - completed inventory loans.

The HELOC balances displayed below relate to insured residential mortgages that were acquired by MCAN previously. We do not originate HELOCs at this time.

Securitized mortgage portfolio	78.1 %	79.9 %
	72.5 %	**72.4 %**

[1] *MCAN's* non-securitized *uninsured residential mortgage portfolio (including completed inventory loans) is secured with a weighted average LTV at origination of 69.0% at December 31, 2025 (December 31, 2024 - 68.7%). Based on an industry index that incorporates current real estate values, the ratios would be 66.3% at December 31, 2025 (December 31, 2024 - 63.7%).*

Other Non-securitized Assets

Cash and Cash Equivalents

At December 31, 2025, our cash balance was $80 million (September 30, 2025 - $142 million; December 31, 2024 - $62 million). As part of liquidity management, we align our liquidity position to our liquidity and funding requirements. Cash and cash equivalents, which include cash balances with banks and overnight term deposits, provide liquidity to meet maturing term deposits and new mortgage funding commitments. We actively manage our cash and cash equivalents in the context of our prudent liquidity and cash management practices. See "Liquidity and Funding Risk" sub-section of this MD&A.

Marketable Securities

Marketable securities, consisting of REITs and Government of Canada bonds, provide additional liquidity at yields in excess of cash and cash equivalents. We actively manage our portfolio, as appropriate. At December 31, 2025, the portfolio balance was $54 million (September 30, 2025 - $54 million; December 31, 2024 - $66 million). In 2025, we sold $16 million of REITs for a realized gain of $2.6 million. We continue to realize the benefits of regular cash flows and distributions from these investments.

Non-marketable Securities

At December 31, 2025, our non-marketable securities balance was $127 million (September 30, 2025 - $125 million; December 31, 2024 - $117 million). The movement to our security balance from the beginning of the year mainly relates to funding of capital advances and a $1 million net realized and unrealized loss consisting of gains and losses from certain underlying property investments as a result of (i) updated appraisals/property valuations, net of related property debt and debt service costs; and (ii) actual executions on construction and leasing stabilization and value-add activities. Our non-marketable securities are either held for long-term capital appreciation or distribution income. Our real estate development funds tend to have less predictable cash flows that are predicated on the completion of the development projects within these funds. We have $40 million in remaining capital advances for non-marketable securities expected to fund mainly over the next five years. Some of the real estate funds that we are invested in, have been slower to deploy committed capital than initially expected as finding the right opportunities in the current market environment takes more time.

For further information, refer to Note 8 to the consolidated financial statements.

Equity Investment in MCAP

We have a strategic investment in MCAP, which is Canada's largest independent mortgage finance company serving many institutional investors and over 400,000 homeowners. We hold a 13.89% equity interest in MCAP (September 30, 2025 - 13.89%; December 31, 2024 - 13.88%), which represents 4.0 million units held by MCAN at December 31, 2025 (September 30, 2025 - 4.0 million; December 31, 2024 - 4.0 million) of the 28.8 million total outstanding MCAP partnership units (September 30, 2025 - 28.8 million; December 31, 2024 - 28.8 million). The investment had a net book value of $134 million at December 31, 2025 (September 30, 2025 - $133 million; December 31, 2024 - $122 million). The net book value is not indicative of the fair market value of our equity interest in MCAP.

During Q4 2025, we received $6.7 million of unitholder distributions from MCAP (Q3 2025 - $6.3 million; Q4 2024 - $4.7 million). In 2025, we have received $21.7 million of unitholder distributions from MCAP (2024 - $18.6 million). As we account for this investment using the equity method, the receipt of distributions reduces the carrying value of the investment in MCAP.

Pursuant to the MCAP partnership agreement, the majority partner in MCAP has the right to acquire MCAN's entire partnership interest in MCAP at "fair market value", which would be determined by an independent valuator agreed upon by both parties. Any sale by MCAN of its units in MCAP pursuant to this majority partner right, could result in a taxable gain, which could be material.

Other Securitization Assets

Other securitization assets include cash held in trust, which represents securitized mortgage principal and interest collections from borrowers that are payable to MBS holders.

Term Deposits

Our primary source of funding for our non-securitized operations is the issuance of term deposits that are eligible for CDIC deposit insurance. We source term deposits through a broker distribution network across Canada consisting of third party deposit agents and financial advisors, as well as a direct-to-consumer channel through our MCAN Wealth GIC platform. Deposits cannot be cashed prior to maturity or paid on demand except in the event of the death of a depositor or financial hardship. We believe that our term deposits provide a reliable low-cost funding source that can be strategically matched against the non-securitized mortgage portfolio. The role of term deposits in managing liquidity and funding risk is discussed in the "Liquidity and Funding Risk" sub-section of the "Risk Factors" section of this MD&A.

Loans Payable

We have a secured demand revolver facility from a Canadian Schedule I Chartered bank with a facility limit of $220 million. The facility is due and payable upon demand. Under the facility, there is a sublimit for issued letters of credit which are used for the purpose of supporting developer obligations to municipalities in conjunction with residential construction loans.

We have a senior secured mortgage warehouse facility from a Canadian Schedule I Chartered bank with a facility limit of $100 million. The facility is used to fund insured residential mortgages prior to securitization activities.

Financial Liabilities from Securitization

Financial liabilities from securitization relate to our participation in (i) the market MBS and CMB programs, where we have sold MBS to third parties; and (ii) an uninsured residential mortgage securitization program sponsored by a Canadian Schedule I Chartered bank. We have not derecognized these related mortgages from our balance sheet. For further information on our securitization programs, refer to the "Financial Position" section of this MD&A.

Share Capital

Share capital activity may reflect new common shares issued through the DRIP, Executive Share Purchase Plan and other share offerings and their related costs, as applicable. For further information, refer to the "Description of Capital Structure" section of this MD&A and Note 18 to the consolidated financial statements.

Retained Earnings

Retained earnings activity for Q4 2025 consists of net income of $17.6 million (Q3 2025 - $20.5 million; Q4 2024 - $7.7 million) less dividends of $16.6 million (Q3 2025 - $16.3 million; Q4 2024 - $15.1 million). Retained earnings activity in 2025 consists of a net income of $74.9 million (2024 - $77.6 million) less dividends of $65.0 million (2024 - $58.7 million).

Accumulated Other Comprehensive Income

We may enter into Government of Canada bond forward contracts to hedge interest rate risk arising from the impact of (i) movements in interest rates between the time insured residential mortgages are funded and the time that these mortgages are securitized; and (ii) movements in interest rates between the time term deposit funding is forecasted to be required and the time that the actual funding occurs. Achieving hedge accounting allows us to reduce our net income volatility related to changes in interest rates. For further information, refer to the "Derivatives and Hedging" sub-section of this MD&A and Note 13 to the consolidated financial statements.

CAPITAL MANAGEMENT

Our primary capital management objectives are to maintain sufficient capital for regulatory purposes and to earn acceptable and sustainable risk-weighted returns for our shareholders. Through our risk management and corporate governance framework, we assess current and projected asset growth, economic conditions, housing market activity, the interest rate environment and changes to credit quality to determine appropriate levels of capital. We expect to pay out all of MCAN's non-consolidated taxable income over time through dividends subject to final review and declaration by the Board. Capital growth is achieved through retained earnings, the DRIP, Executive Share Purchase Plan, rights offerings, public share offerings and, if appropriate, stock dividends. Our capital management is primarily driven by the guidelines set out by the Tax Act and OSFI.

Income Tax Capital

As a MIC under the Tax Act, we are limited to an income tax liabilities to capital ratio of 5:1 (or an income tax assets to capital ratio of 6:1), based on our non-consolidated balance sheet in the MIC entity measured at its tax value. Securitization assets and liabilities (less accrued interest) are both excluded from the calculation of the income tax assets to capital ratio. We calculate our income tax capital in accordance with the Tax Act.

Table 25: Income Tax Capital

(in thousands except ratios)

	December 31 2025	December 31 2024
Income tax assets		
Consolidated assets	$ 6,477,470	$ 5,347,565
Adjustment for assets in subsidiaries	58,279	35,924
Non-consolidated assets in MIC entity	6,535,749	5,383,489
Add: mortgage allowances	10,996	7,844
Less: securitization assets [1]	(3,477,956)	(2,454,257)
Adjustments to equity investments in MCAP and subsidiaries	(93,089)	(69,378)
Other adjustments	(2,093)	313
	$ 2,973,607	$ 2,868,011
Income tax liabilities		
Consolidated liabilities	$ 5,832,622	$ 4,748,376
Adjustment for liabilities in subsidiaries	(16,601)	(10,040)
Non-consolidated liabilities in MIC entity	5,816,021	4,738,336
Less: securitization liabilities [1]	(3,425,967)	(2,418,059)
	$ 2,390,054	$ 2,320,277
Income tax capital	$ 583,553	$ 547,734
Income tax capital ratios		
Income tax assets to capital ratio	5.10	5.24
Income tax liabilities to capital ratio	4.10	4.24

[1] *The majority of securitization assets and liabilities on the balance sheet are excluded from income tax assets, liabilities and capital as they are derecognized for income tax purposes in accordance with the Tax Act.*

Regulatory Capital

As a Loan Company under the Trust Act, OSFI oversees the adequacy of our capital. For this purpose, OSFI has imposed minimum capital-to-regulatory (or risk-weighted) assets ratios and a minimum leverage ratio which is calculated on a different basis from the income tax assets to capital ratio discussed in the "Income Tax Capital" sub-section above.

Both OSFI and the Basel Committee on Banking Supervision promote a resilient banking sector and strong global capital standards. Key components of Basel III impact MCAN through the Capital Adequacy Requirements and Leverage Requirements Guidelines.

Our CET 1 capital consists of share capital, contributed surplus and retained earnings. We do not hold any additional Tier 1 capital instruments; therefore, our CET 1 capital is equal to our Tier 1 capital. Our Tier 2 capital consists of Stage 1 and Stage 2 mortgage allowances calculated under IFRS. Total Capital equals CET 1 or Tier 1 capital plus Tier 2 capital. OSFI expects all federally regulated financial institutions to meet the minimum capital to risk-weighted asset ratios of 7% CET 1 Capital, 8.5% Tier 1 Capital and 10.5% Total Capital.

At December 31, 2025, we were in compliance with our internal target minimum CET 1, Tier 1 and Total Capital to risk weighted asset and leverage ratios. We maintain prudent capital planning practices to ensure that we are adequately capitalized and continue to satisfy minimum standards and internal targets.

Table 26: Regulatory Capital [3]

(in thousands except %)

	December 31 2025	December 31 2024
OSFI Regulatory Ratios		
Share capital	$ 491,015	$ 456,683
Contributed surplus	510	510
Retained earnings	153,442	143,620
Accumulated other comprehensive income	(119)	(1,624)
Deduction from equity investment in MCAP [1]	(69,510)	(62,346)
Common Equity Tier 1 and Tier 1 Capital (A)	575,338	536,843
Tier 2 Capital	10,076	7,250
Total Capital (D)	$ 585,414	$ 544,093
Total Exposure/Regulatory Assets		
Consolidated assets	$ 6,477,470	$ 5,347,565
Less: deduction for equity investment in MCAP [1]	(69,510)	(62,346)
Other adjustments [2]	11,264	8,472
Total On-Balance Sheet Exposures	6,419,224	5,293,691
Mortgages and non-marketable securities funding commitments	239,344	208,440
Letters of credit	20,967	22,147
Total Off-Balance Sheet Items	260,311	230,587
Total Exposure/Regulatory Assets (B)	$ 6,679,535	$ 5,524,278
Leverage ratio (A / B)	8.61 %	9.72 %
Risk-weighted assets (C)	$ 3,057,823	$ 2,822,418
Regulatory Capital Ratios		
Common Equity Tier 1 capital to risk-weighted assets ratio **(A / C)**	18.82 %	19.02 %
Tier 1 capital to risk-weighted assets ratio **(A / C)**	18.82 %	19.02 %
Total capital to risk-weighted assets ratio **(D / C)**	19.14 %	19.28 %

[1] The deduction for the equity investment in MCAP is equal to the equity investment balance less 10% of shareholders' equity and eligible stage 1 and stage 2 mortgage allowances.
[2] Certain items, such as negative cash balances and derivatives, are adjusted from total exposures but included in consolidated assets.
[3] These measures have been calculated in accordance with OSFI's Capital Adequacy Requirements and Leverage Requirements guidelines.

Table 27: Regulatory Risk-Weighted Assets [1]

(in thousands except %)	December 31, 2025			December 31, 2024		
	Amounts	Average Rate	Risk-Weighted Assets	Amounts	Average Rate	Risk-Weighted Assets
On-Balance Sheet Assets						
Cash and cash equivalents	$ 79,828	21 %	$ 16,374	$ 61,703	21 %	$ 12,654
Cash held in trust	71,856	20 %	14,371	47,249	20 %	9,450
Marketable securities	54,146	72 %	39,025	66,345	100 %	66,345

Mortgages - securitized	3,458,671	5 %	175,604	2,419,871	6 %	136,693
Non-marketable securities	126,592	172 %	218,124	117,428	162 %	190,120
Equity investment in MCAP Commercial LP	133,995	120 %	161,212	122,265	123 %	149,797
Deferred tax asset	1,650	100 %	1,650	1,430	100 %	1,430
Other assets	69,237	100 %	69,237	44,675	100 %	44,675
Derivative Financial Instruments	1,907	— %	—	2,508	— %	—
	6,477,470		2,587,620	5,347,565		2,311,378
Off-Balance Sheet Items						
Letters of credit	41,934	50 %	20,967	44,295	50 %	22,148
Commitments	598,360	31 %	186,145	521,100	45 %	234,666
Derivative Financial Instruments	611,451	3 %	17,516	793,439	3 %	24,288
			224,628			281,102
Charge for operational risk [2]			245,575			229,938
Risk-Weighted Assets			**$ 3,057,823**			**$ 2,822,418**

[1] This measure has been calculated in accordance with OSFI's Capital Adequacy Requirements guidelines.
[2] We use the simplified standard approach for operational risk in accordance with OSFI's Capital Adequacy Requirements guidelines. The RWA for operational risk is determined by multiplying the operational risk capital charge by 12.5.

Other Capital Management Activity

In conjunction with the annual strategic planning and budgeting process, we complete an Internal Capital Adequacy Assessment Process ("ICAAP") in order to ensure that we have sufficient capital to support our business plan and risk appetite. The ICAAP assesses the capital necessary to support the various inherent risks that we face, including liquidity and funding, credit, interest rate, market, operational, regulatory compliance, strategic and reputational risks. Our business plan is also stress-tested under various adverse scenarios to determine the impact on our results from operations and financial condition. The ICAAP is reviewed by both management and the Board and is submitted to OSFI annually. In addition, the Company performs stress testing on our internal forecasts for capital adequacy on a quarterly basis, and the results of such testing are reported to the Board.

RISK FACTORS

For a detailed description of all risk factors associated with the Company, refer to the "Risk Governance and Management" section of our 2025 Annual Information Form, which is available on the Company's profile on SEDAR+ at www.sedarplus.ca. Incidents related to any of the Company's risks could adversely affect our ability to achieve our business objectives or execute our business strategies, and may result in a loss of earnings, capital and/or damage to our reputation. Our Enterprise Risk Management Framework addresses these risks by establishing effective policies, limits, and internal controls to monitor and mitigate these risks.

The shaded areas of this MD&A below represent a discussion of risk factors and risk management policies and procedures relating to liquidity, credit, interest rate and market risks as required under IFRS 7, *Financial Instruments: Disclosures*. The relevant MD&A sections are identified by shading within boxes and the content forms an integral part of the consolidated financial statements.

Liquidity and Funding Risk

Liquidity risk is the risk that cash and liquid assets are insufficient to honour all cash outflow commitments (both on- and off-balance sheet) as they come due. Funding risk is the risk that available sources of liquidity and long term funding are insufficient to sustain business growth or mitigate funding gaps.

On a daily basis, we monitor our liquidity position to ensure that the level of liquid assets held, together with our ability to raise new deposits and other funding sources, are sufficient to meet our commitments, deposit maturity obligations, and other financial obligations.

On a monthly basis, we plan out our funding using a 12-month rolling forecast of expected business growth and balance sheet obligations. This provides us with a forward-looking perspective on the adequacy of our funding and liquidity channels.

Stress testing is performed using multiple scenarios incorporating simultaneous impacts to the Company's funding sources and uses. MCAN's stress testing is designed to assess the viability of liquidity and funding channels, as well as contingency funding to remain within Board-approved liquidity risk limits. At December 31, 2025, the Company held sufficient funding and liquidity to meet all requirements under the stress test scenarios.

The Board is accountable for the approval of the Liquidity Risk Management Framework ("LRMF"). The LRMF establishes a framework to maintain sufficient funding and liquidity, including holding a portfolio of high-quality liquid assets to meet commitments as they come due. The LRMF provides guidance for the daily, monthly and quarterly analyses that are performed by management, and includes a framework for daily funding requirements, gap analysis between assets and liabilities, deposit concentration levels, liquidity risk limits, and stress testing requirements, in alignment with both the standards set under the Trust Act and regulations and guidelines issued by OSFI. Further to the LRMF, the Company maintains a Contingency Funding Plan that details the strategies and action plans to respond to stress events that could materially impair its access to funding and liquidity.

ALCO, which is comprised of management, is accountable for liquidity management oversight. On a monthly basis, or more frequently as required, ALCO reviews the Company's funding and liquidity risk profile, including funding strategies, performance against established liquidity risk limits, stress testing and contingency funding plan status. Results of the monitoring of liquidity risk are reported to the Board and any exceptions or breach of key limits are immediately reported by ALCO to the ERM&CC. At December 31, 2025, the Company was in full compliance with the LRMF, key liquidity risk limits and regulatory requirements.

We have access to liquidity through our ability to issue term deposits eligible for CDIC deposit insurance. These term deposits also provide us with the ability to fund asset growth as needed.

The Company maintains a secured demand revolver facility to meet its short-term obligations as required. Under the facility, there is a sublimit for issued letters of credit, which may be used to support the obligations of borrowers to municipalities in conjunction with construction loans. The facility limit is $220 million.

We also have an agreement with a Canadian Schedule I Chartered bank that enables the Company to execute repurchase agreements for liquidity purposes. This facility provides liquidity and allows the Company to encumber certain eligible securities for financing purposes. As part of the agreement, the Company may sell assets to the counterparty at a specified price with an agreement to repurchase at a specified future date. The interest rate on the borrowings is driven by market spot rates at the time of borrowing. The Company will execute these repurchase agreements to provide alternative sources of liquidity when it is efficient and effective to do so.

We have a credit agreement with a Canadian Schedule I Chartered bank for a $100 million senior secured mortgage warehouse facility. The facility is used to fund insured residential mortgages prior to securitization activities. This facility provides improved funding in response to our continued growth.

We have agreements whereby the Company can sell insured and uninsured residential mortgages and mortgage commitments. These agreements provide liquidity and the opportunity to fund other core business activities in line with our strategy.

The Company continues to enhance monitoring of its liquidity risk profile, its funding markets such as the term deposit and securitization markets and its liquidity risk position.

OSFI's Liquidity Adequacy Requirements guideline currently establishes two minimum standards based on the Basel III framework with national supervisory discretion applied to certain treatments: the Liquidity Coverage Ratio ("LCR") and Net Cumulative Cash Flow ("NCCF") metrics. At December 31, 2025, we were in compliance with the LCR and NCCF metrics.

Our sources and uses of liquidity are outlined in the table below. For information on our off-balance sheet commitments refer to the "Off-Balance Sheet Arrangements" section of this MD&A.

Table 28: Liquidity Analysis

At December 31, 2025						
(in thousands)	Within 3 months	> 3 Months to 1 Year	> 1 to 3 Years	> 3 to 5 Years	> 5 Years	Total
Sources of liquidity						
Cash and cash equivalents	$ 79,828	$ —	$ —	$ —	$ —	$ 79,828
Marketable securities	54,146	—	—	—	—	54,146
Mortgages - non-securitized	698,495	995,264	681,813	72,548	31,468	2,479,588
Non-marketable securities	—	—	—	—	126,592	126,592
Other loans	6,451	—	—	—	—	6,451
	838,920	995,264	681,813	72,548	158,060	2,746,605
Uses of liquidity						
Term deposits	324,785	904,888	826,183	284,627	—	2,340,483
Loans payable	19,438	—	—	—	—	19,438
Other liabilities	30,608	53	1,026	1,098	5,987	38,772
	374,831	904,941	827,209	285,725	5,987	2,398,693
Net liquidity surplus (deficit)	**$ 464,089**	**$ 90,323**	**$ (145,396)**	**$ (213,177)**	**$ 152,073**	**$ 347,912**

Note: The above table excludes securitized assets and liabilities and pledged assets as their use is restricted to securitization program operations.

Credit Risk

Credit risk is the risk of financial loss resulting from the failure of a counterparty, for any reason, to fully honour its financial or contractual obligations to the Company, primarily arising from our investments and lending activities. Fluctuations in interest rates may impact real estate values and may also reduce the net realizable value of the collateral property to the Company. These risks may result in defaults and credit losses, which may result in a loss of earnings.

Credit risk is managed through risk management policies and procedures that emphasize the quality and diversification of our investments and lending activities. Credit policies include credit risk limits in alignment with the Risk Appetite Framework ("RAF"). These credit risk limits include, but are not limited to, concentration by asset class, geographic region, dollar amount and borrower. These policies are amended on an ongoing basis and approved by the Board to reflect changes in market conditions and risk appetite.

Capital Commitments Committee, which is comprised of management, is accountable for decision-making on credit risk issues and provides oversight of proposed investments for the construction, commercial and marketable and non-marketable securities portfolios.

Credit and commitment exposure are closely monitored by the First and Second Lines of Defence. The Risk and Compliance Committee, which is comprised of management, monitors and challenges credit risk exposures, monitors portfolio and underwriting quality and performance against credit risk limits on a quarterly basis. The ERM&CC reviews all material risks affecting the Company on a quarterly basis, which includes the identification, assessment, and monitoring of material credit risks.

We identify potential risks in our mortgage portfolio by way of regular review of market and portfolio metrics, which are a key component of quarterly market reports provided to the Board by management. Existing risks in our mortgage portfolio are identified by arrears reporting, portfolio diversification analysis, post funding monitoring and risk rating trends of the entire

mortgage portfolio. The aforementioned reporting and analysis provide adequate monitoring of and control over our exposure to credit risk.

We assign a credit score and risk rating for all mortgages at the time of underwriting based on the assessed credit quality of the borrower and the value of the underlying real estate. Risk ratings are reviewed annually at a minimum, and more frequently whenever there is an amendment, or a material change such as a default or impairment.

As part of our credit risk management process, we monitor our loan portfolio for early indicators of potential concern. The "monitored/arrears" category includes construction and commercial loans that may experience events such as slow sales, cost overruns or are located in geographic markets in which concerns have arisen. Loans in this category are included in stage 2. Considering factors such as borrower equity, portfolio LTV ratios and project liquidity, at December 31, 2025 and 2024, there have been no indications at the portfolio level of potential loss of principal in excess of the allowances for credit losses recorded for mortgages in stage 1 and 2. These collective allowances are based on forward-looking economic assumptions and other factors discussed in Note 4 to the consolidated financial statements.

As a response to economic uncertainty, the Company has increased the frequency of monitoring and reporting of our credit risk profile, including enhanced arrears reporting and pipeline monitoring. Real estate prices may continue to be impacted by macroeconomic headwinds, which may adversely impact asset values and the ability for borrowers to make timely payments on mortgages.

The maximum credit exposure on our individual financial assets is equal to the carrying value of the respective assets, except for our non-securitized mortgage portfolio, where maximum credit exposure also includes outstanding commitments for future mortgage fundings and our investments in non-marketable securities, where maximum credit exposure includes our total remaining commitments.

Credit Risk - Impairment Assessment Under IFRS 9

The analysis of MCAN's IFRS 9 impairment assessment and measurement approach discussed below should be read in conjunction with Note 4 to the consolidated financial statements.

Impairment calculations are based on a forward-looking ECL methodology. ECL is composed of 3 submodels; Probability of Default ("PD"), Loss Given Default ("LGD") and Exposure at Default ("EAD"). Each of these submodels produce quarterly projections of the respective metric under various macroeconomic scenarios.

Probability of default

PD is an estimate of the likelihood of default over a given time horizon. The PD model is comprised of (i) forward-looking macroeconomic projections and (ii) internal risk rating-based segmentation. Forward-looking macroeconomic projections are built utilizing statistical regression to determine relationships between default rates and macroeconomic variables. Internal risk rating-based segmentation views the portfolio by internal risk rating and credit scores to provide PD differentiation at the borrower level.

Loss given default

LGD is an estimate of the loss arising in the case where a default occurs. LGD is built utilizing statistical regression to determine a relationship between LGD and macroeconomic variables, using external LGD data from comparable historical portfolios to forecast LGD under macroeconomic scenarios. Like the PD model, the construction and commercial LGD model also segments the portfolio by internal risk ratings to differentiate LGDs at the borrower level. The uninsured single family LGD model segments the portfolio by loan to value ratios to differentiate LGDs at the borrower level as well.

Exposure at default

EAD is the estimate of exposure at a future default date at the borrower level, taking into account expected changes in the exposure after the reporting date. EAD is the borrower level exposure in the event of default, determined by forecasting advances and repayments on the portfolio. The forecast is determined utilizing historical advance and repayment trends and is segmented by product type. EAD is forecasted up to the expected lifetime of each individual loan, capped at 12 months for IFRS 9 stage 1 loans.

Grouping financial assets measured on a collective basis

The Company calculates ECLs either on a collective or specific basis for the non-securitized mortgage portfolio based on the line of business (per Note 7 to the consolidated financial statements). ECLs are calculated on a specific basis for all mortgages in stage 3 and are calculated on a collective basis for all mortgages in stage 1 and stage 2.

Analysis of inputs into the ECL model under multiple economic scenarios

An overview of the approach to estimating ECLs is set out in Notes 4 and 5 to the consolidated financial statements. As part of the model input process, macroeconomic data are obtained from third party sources (e.g. rating agencies, bank economic forecasts, etc.), and our Risk Management department assesses the quality of data and assumptions in the Company's ECL models including determining the weights attributable to the multiple scenarios.

Interest Rate Risk

Interest rate risk is the potential impact of changes in interest rates on our earnings and capital. Interest rate risk arises when our assets and liabilities, both on- and off-balance sheet, have mismatched repricing and maturity dates. Changes in interest rates where we have mismatched repricing and maturity dates may have an adverse effect on our financial condition and results of operations.

The Interest Rate Risk Management Framework, which is reviewed and approved by the Board, provides guidance on MCAN's interest rate risk measurement tools, including stress testing, roles and accountabilities, and monitoring and reporting requirements. Additionally, it establishes interest rate risk limits and articulates appetite for interest rate exposures.

We evaluate our exposure to a variety of changes in interest rates across the term spectrum of our assets and liabilities including both parallel and non-parallel changes in interest rates. By managing and strategically matching the terms of non-securitized assets and term deposits, we seek to reduce the risks associated with interest rate changes. In conjunction with liquidity management policies and procedures, we also manage cash flow mismatches. ALCO reviews our interest rate exposure on a monthly basis using a duration-based framework to measure structural risk and sensitivity analysis based on various scenarios. This information is also formally reviewed by the Board each quarter.

We are exposed to interest rate risk on: (i) movements in interest rates between the time residential mortgages are committed to borrowers and the time that the mortgage is funded; (ii) movements in interest rates between the time insured residential mortgages are funded and the time that these mortgages are securitized; (iii) movements in interest rates between the time term deposit funding is forecasted to be required and the time that the actual funding occurs; and (iv) movements in interest rates during the term of the fixed-rate term deposits and floating rate construction and commercial portfolios. To manage these risks, we may employ various hedging strategies. For further information, refer to "Derivatives and Hedging" sub-section of this MD&A and Note 13 to the consolidated financial statements.

An immediate and sustained parallel 1% increase to market interest rates on interest-bearing financial instruments at December 31, 2025 would have an estimated positive effect of $0.8 million (September 30, 2025 - adverse effect of $0.6 million; December 31, 2024 - positive effect of $1.2 million) to net income over the following twelve month period. An immediate and sustained parallel 1% decrease to market interest rates at December 31, 2025 would have an estimated positive effect of $1.8 million (September 30, 2025 - positive effect of $2.3 million; December 31, 2024 - adverse effect of $0.3 million) to net income over the following twelve month period.

The following tables present the assets and liabilities of the Company by interest rate sensitivity at December 31, 2025 and December 31, 2024 and do not incorporate mortgage and loan prepayments. This analysis is subject to significant change in subsequent periods based on changes in customer preferences and in the application of asset/liability management policies. Floating rate assets and liabilities are immediately sensitive to changing interest rates while other assets are sensitive to changing interest rates periodically, either as they mature or as contractual repricing events occur. Non-interest sensitive items include marketable securities, equity investment in MCAP and other assets and liabilities. Yield spread represents the difference between the weighted average interest rate of the assets and liabilities in a certain category.

Table 29: Interest Rate Sensitivity at December 31, 2025

At December 31, 2025								
(in thousands except %)	Floating Rate	Within 3 Months	> 3 Months to 1 Year	> 1 to 3 Years	> 3 to 5 Years	> 5 Years	Non Interest Sensitive	Total
Assets

Market Risk

Market risk is the exposure to adverse changes in the value of financial assets. Market risk includes price risk on marketable securities, execution risk and real estate values, among others.

Market risk is the exposure to adverse changes in the value of financial assets. Market risk includes price risk on marketable securities, execution risk and real estate values, among others. Any changes in these market risk factors may negatively affect the value of our financial assets, which may have an adverse effect on our financial condition and results of operations. We do not undertake trading activities as part of our regular operations, and therefore are not exposed to risks associated with activities such as market making, arbitrage or proprietary trading.

Our marketable securities portfolios are susceptible to market price risk arising from uncertainties about future values of the securities. We manage the equity price risk through diversification and limits on both individual and total securities. Portfolio reporting is submitted to management on a regular basis and to the Board on a quarterly basis.

Our non-marketable securities portfolios are focused on equity and debt investments in Canadian real estate focused funds. The portfolio is susceptible to the overall outlook of the real estate market, execution risk from respective fund managers, and other market conditions, such as spreads, housing prices, land prices, construction costs and adverse changes in interest rates or capitalization rates.

DESCRIPTION OF CAPITAL STRUCTURE

Our authorized share capital consists of an unlimited number of common shares with no par value. These common shares are the only voting securities of MCAN. At December 31, 2025, there were 40,471,074 common shares outstanding (September 30, 2025 - 40,162,809; December 31, 2024 - 38,717,004). At February 23, 2026, there were 40,583,822 common shares outstanding.

We issued $2.5 million in 2025 (2024 - $1.2 million) in new common shares through standard issuances under our Executive Share Purchase Plan.

We issued $9.4 million in 2025 (2024 - $14.8 million) in new common shares under the DRIP, which has historically provided MCAN with a reliable source of new capital and existing shareholders an opportunity to acquire additional shares at a discount to market value. Under the DRIP, dividends paid to shareholders are automatically reinvested in common shares issued out of treasury at the weighted average trading price for the five days preceding such issue less a discount of 2% until further notice from MCAN. The DRIP participation rate for 2025 dividends was 15% (2024 - 22%).

We have a Base Shelf prospectus allowing us to make certain public offerings of debt or equity securities during the period that it is effective, through Prospectus Supplements.

- We have an ATM Program, established pursuant to a Prospectus Supplement to our Base Shelf prospectus, allowing us to issue up to $75 million common shares to the public from time to time at the market prices prevailing at the time of sale. In Q4 2025, we sold 308,265 common shares at a weighted average price of $22.08 for gross proceeds of $6.8 million and net proceeds of $6.7 million including $0.1 million of agent commission paid and $12 thousand of other share issuance costs under the ATM Program. In 2025, we sold 1,120,565 common shares at a weighted average price of $20.90 for gross proceeds of $23.4 million and net proceeds of $22.5 million including $0.5 million of agent commission paid and $0.5 million of other share issuance costs under the ATM Program. At December 31, 2025, we have $59.2 million remaining available to be issued through our ATM Program. The volume and timing of distributions under the ATM Program are determined at MCAN's sole discretion.

For additional information related to share capital, refer to Note 18 to the consolidated financial statements.

OFF-BALANCE SHEET ARRANGEMENTS

We have contractual obligations relating to outstanding commitments for future fundings of non-securitized mortgages and our investments in non-marketable securities. Only a portion of the mortgage commitments that we issue are expected to fund. Accordingly, these amounts do not necessarily represent the future cash requirements of the Company.

Table 31: Contractual Commitments

At December 31, 2025						
(in thousands)	Within 3 months	Months to 1 Year	> 1 to 3 Years	> 3 to 5 Years	> 5 Years	Total
Commitment - Mortgage Fundings	$ 390,990	$ 114,338	$ 24,688	$ —	$ —	$ 530,016
Commitment - Real Estate Debt Funds	1,500	14,452	9,974	4,974	3,100	$ 34,000
Commitment - Other Real Estate Limited Partnerships	550	1,650	3,300	—	28,844	$ 34,344
	$ 393,040	**$ 130,440**	**$ 37,962**	**$ 4,974**	**$ 31,944**	**$ 598,360**

We retain mortgage servicing obligations relating to securitized insured multi-family mortgages where balance sheet derecognition has been achieved. At December 31, 2025, these derecognized securitized insured multi-family mortgages totalled $891 million. For further information on our securitization activities, refer to Note 11 to the consolidated financial statements.

We provide letters of credit, which are not reflected on the consolidated balance sheet, for the purpose of supporting developer obligations to municipalities in conjunction with residential construction loans. If the developer defaults in its obligation to the municipalities, the municipalities may draw on the letters of credit, in which case we are obligated to fund the letters of credit. For further information, refer to Note 22 to the consolidated financial statements.

DIVIDEND POLICY AND RECORD

Our dividend policy is to pay out substantially all of our taxable income to our shareholders. These dividends are taxable to our shareholders as interest income. In addition, as a MIC, we can pay certain capital gains dividends which are taxed as capital gains to our shareholders. We intend to continue to declare and pay dividends on a quarterly basis. The Company has generally paid out dividends in cash but has the option to pay out its dividends in the form of cash or shares. In the event of a significant increase in taxable income relative to accounting income, the Company may look to pay out a combination of regular dividends in the form of cash and special dividends in the form of cash or shares. This is consistent with our dividend policy and our obligations as a MIC, while at the same time providing a cost effective source of capital for the Company to support future growth and business operations.

Regular cash dividends per share over the past three years are shown in the table below:

Table 32: Dividends Per Share

For the Years Ended December 31	2025	2024	2023
First quarter - regular cash	$ 0.41	$ 0.39	$ 0.36
Second quarter - regular cash	0.41	0.39	0.36
Third quarter - regular cash	0.41	0.39	0.38
Fourth quarter - regular cash	0.41	0.39	0.38
Total regular cash dividends	**1.64**	**1.56**	**1.48**

The Board declared a first quarter regular cash dividend of $0.43 per share (an increase of 5% from our fourth quarter 2025 dividend) to be paid March 31, 2026 to shareholders of record on March 13, 2026.

TRANSACTIONS WITH RELATED PARTIES

Related party transactions for the years ended December 31, 2025 and December 31, 2024 and related party balances at December 31, 2025 and December 31, 2024 are discussed in Notes 9 and 21 to the consolidated financial statements.

FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

The majority of our consolidated balance sheet consists of financial instruments, and the majority of net income (loss) is derived from the related income, expenses, gains and losses. Financial instruments include cash and cash equivalents, cash held in trust, marketable securities, mortgages, non-marketable securities, other loans, financial liabilities from securitization, term deposits and loans payable, which are discussed throughout this MD&A.

The use of financial instruments exposes us to liquidity and funding, credit, interest rate and market risk. A discussion of these risks and how they are managed is found in the “Risk Factors” section of this MD&A.

Information on the financial statement classification and amounts of income, expenses, gains and losses associated with financial instruments are located in the “Results of Operations” and “Financial Position” sections of this MD&A. Information on the determination of the fair value of financial instruments is located in the “Critical Accounting Estimates and Judgments” section of this MD&A.

CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of the Company’s consolidated financial statements requires management to make judgments, estimations and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. Estimates are considered carefully and reviewed at an appropriate level within MCAN. We believe that our estimates of the value of our assets and liabilities are appropriate. However, changes in these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

Critical Accounting Estimates

Fair value of financial instruments

For non-marketable securities, fair value is determined using a variety of approaches including independent appraisals, recent transactions and incremental investments in the funds. We consider various factors in the determination of fair value including, but not limited to, recent appraisals, the status of underlying construction project and recent capital calls. Judgment is applied in the determination of the appropriate valuation approach, depending on the nature of the investment. On a quarterly basis,

we review the fair value of the investments in conjunction with reports produced by the fund administrators, recent development activity and any other market-driven triggers.

For all other financial instruments where the fair values of financial assets and financial liabilities recorded in the consolidated financial statements cannot be derived from active markets, they are determined using a variety of appropriate valuation techniques that may include discounted cash flow method, comparison to similar instruments for which market observable prices may exist and other relevant valuation models. The inputs are derived from observable market data where possible, but where observable market data is not available, estimates are required to establish fair values. These estimates include considerations of liquidity and model inputs such as discount rates, prepayment rates and default rate assumptions for certain investments.

Allowances for credit losses

The allowance for credit losses reduces the carrying value of mortgage assets by an estimate of the principal amounts that borrowers may not repay in the future. In assessing the estimated realizable value of assets, we must rely on estimates and exercise judgment regarding matters for which the ultimate outcome is unknown. A number of factors can affect the amount that we ultimately collect, including the quality of our own underwriting process and credit criteria, the diversification of the portfolio, the underlying security relating to the loans and the overall economic environment. Allowances on impaired mortgages include all of the accumulated provisions for losses to reduce the assets to their estimated realizable value. Allowances depend on asset class, as different classes have varying underlying risks. Future changes in circumstances could materially affect net realizable values and lead to an increase or decrease in the allowance for credit losses.

The measurement of impairment losses under IFRS 9 across all categories of financial assets requires judgment, in particular, the estimation of the amount and timing of future cash flows and collateral values and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Company's ECL calculations are model outputs with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgments and estimates include:

- The Company's criteria for assessing if there has been a significant increase in credit risk which results in allowances being measured on a lifetime versus 12 month ECL basis;
- The segmentation of financial assets for the purposes of assessing ECL on a collective basis;
- Development of ECL models, including the various formulas and the choice of inputs;
- Determination of associations between macroeconomic scenarios and economic inputs such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs; and
- Forward-looking information used as economic inputs.

We review our ECL models on a quarterly basis. We continue to monitor asset performance and economic conditions, including considering regionally specific issues to assess the adequacy of the current provisioning policies.

The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the consolidated financial statements. To reflect this, we may make temporary qualitative adjustments or overlays using credit judgment when such differences are material.

Mortgage prepayment rates

In calculating the rate at which borrowers prepay their mortgages, the Company makes estimates based on its historical experience. These assumptions impact the timing of revenue recognition and the amortization of mortgage premiums, as applicable, using the effective interest rate method.

Impairment of financial assets

As applicable, the Company reviews financial assets at each consolidated financial statement date to assess whether an impairment loss should be recorded. In particular, estimates by management are required in the calculation of the amount and timing of future cash flows associated with these assets when determining the impairment loss. These estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the fair value of the asset.

Critical Accounting Judgments

Significant influence

In determining whether it has significant influence over an entity, the Company makes certain judgments based on the applicable accounting standards. These judgments form the basis for the Company's policies in accounting for its equity method investments.

DISCLOSURE CONTROLS AND PROCEDURES AND INTERNAL CONTROLS OVER FINANCIAL REPORTING

Disclosure Controls and Procedures ("DC&P")

A disclosure committee (the "Disclosure Committee"), comprised of members of our senior management is responsible for establishing and maintaining adequate DC&P. As of December 31, 2025, we have evaluated the effectiveness of the design and operation of our DC&P in accordance with requirements of National Instrument 52-109 of the Canadian Securities Administrators – *Certification of Disclosure in Issuers' Annual and Interim Filings* ("NI 52-109"). Our CEO and CFO supervised and participated in this evaluation. Based on the evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports we file or submit is recorded, processed, summarized and reported within the time periods specified in securities legislation and is accumulated and communicated to our management, including our CEO and CFO, to allow timely decisions regarding required disclosure.

Internal Controls over Financial Reporting ("ICFR")

The Disclosure Committee is responsible for establishing and maintaining adequate ICFR. Under the supervision and with the participation of the Disclosure Committee, including our CEO and CFO, we evaluated the effectiveness of our ICFR in accordance with the Integrated (2013) Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, a recognized control model, and the requirements of NI 52-109. Based on the evaluation, our CEO and CFO concluded that our ICFR were effective as of December 31, 2025.

Ernst & Young LLP, our Independent Registered Chartered Professional Accountants, have audited our consolidated financial statements for the year ended December 31, 2025.

Changes in ICFR

There were no changes in our ICFR that occurred during the period beginning on January 1, 2025 and ending on December 31, 2025 that have materially affected, or are reasonably likely to materially affect, our control framework.

Inherent Limitations of Controls and Procedures

All internal control systems, no matter how well designed, have inherent limitations. As a result, even systems determined to be effective may not prevent or detect misstatements on a timely basis, as systems can provide only reasonable assurance that the objectives of the control system are met. In addition, projections of any evaluation of the effectiveness of ICFR to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may change.

NON-GAAP AND OTHER FINANCIAL MEASURES

We prepare our consolidated financial statements in accordance with IFRS, which is current GAAP. We use a number of financial measures and ratios to assess our performance. Some of these measures are not calculated in accordance with IFRS, are not defined by IFRS and do not have standardized meanings that would ensure consistency and comparability between other issuers using these measures. The non-GAAP and other financial measures used in this MD&A are defined as follows:

Non-GAAP Financial Measures

Net Non-securitized Mortgage Spread Income: Non-GAAP financial measure that is an indicator of net interest profitability of income-earning non-securitized mortgage assets less cost of funding for our non-securitized mortgage portfolio. It is calculated as the difference between non-securitized mortgage interest and term deposit interest and expenses as reported on the consolidated statements of income.

Net Securitized Mortgage Spread Income: Non-GAAP financial measure that is an indicator of net interest profitability of income-earning securitized assets less cost of securitized liabilities for our securitized mortgage portfolio. It is calculated as the difference between securitized mortgage interest and interest on financial liabilities from securitization as reported on the consolidated statements of income.

Pre-Provision Pre-Tax Income and Pre-Provision Pre-Tax Basic and Diluted Earnings per Share: This is net income or basic and diluted earnings per share excluding (i) provisions for (recoveries of) credit losses; and (ii) provisions for (recoveries of) income taxes.

Average Rates: Supplementary financial measures that are an indicator of interest profitability of income-earning assets or the cost of liabilities. It is calculated as income or expense as a percentage of average interest-earning assets or liabilities balance. This financial measure includes average interest rates for (i) mortgages - non-securitized portfolios; (ii) term deposit interest and expenses; (iii) mortgages - securitized portfolio; and (iv) financial liabilities from securitization. The average income-earning asset or liability balance that is incorporated into the average interest rate calculations is calculated on either a daily or monthly basis depending on the nature of the asset or liability.

Spread of Non-securitized Mortgages over Term Deposit Interest and Expenses: Supplementary financial measure that is an indicator of net interest profitability of income-earning non-securitized assets less cost of funding. The spread of non-securitized mortgages over term deposit interest and expenses is calculated by taking the total non-securitized mortgage interest as a percentage of the average non-securitized mortgage average portfolio balance less the average term deposit interest and expenses rate.

Spread of Securitized Mortgages over Liabilities: Supplementary financial measure that is an indicator of net interest profitability of income-earning securitized assets less cost of securitized liabilities. The spread of securitized mortgages over liabilities is calculated by taking the securitized mortgage portfolio average interest rate less the financial liabilities average interest rate.

Return on Average Shareholders' Equity: Supplementary financial measure that measures profitability by presenting the annualized net income available (loss attributable) to shareholders as a percentage of the average capital deployed to earn the income (loss). It is calculated as net income (loss) divided by average shareholders' equity. Average shareholders' equity is calculated as a monthly average using all components of shareholders' equity.

Arrears and Impaired Mortgage Ratios: Supplementary financial measures that represent the ratio of arrears and impaired mortgages to mortgage principal for both the non-securitized and total (non-securitized and securitized) portfolios.

Distribution Yield: Supplementary financial measure that is an indicator of profitability on marketable and non-marketable securities. It is calculated by dividing the distribution income as a percentage of the average balance.

Book Value per Common Share: Supplementary financial measure that is calculated as total shareholders' equity divided by the number of common shares outstanding as of that date.

Total Shareholder Return: Supplementary financial measure that is defined as the total return of one share to a shareholder including stock appreciation and dividends.

Assets under Management: Supplementary financial measure that is defined as total on-balance sheet assets and assets derecognized but still managed by MCAN, including multi-family securitizations and residential mortgage commitments sold.

Compound Annual Growth Rate: Supplementary financial measure that is defined as the average annual growth rate over a set period, taking into account the effects of compounding.

GLOSSARY

CET 1, Tier 1, Tier 2 and Total Capital, Total Exposures, Regulatory Assets, Leverage Ratio and Risk-Weighted Asset Ratios: These measures are calculated in accordance with OSFI's Capital Adequacy Requirements and Leverage Requirements guidelines.

Income Tax Capital Measures: Income tax assets, income tax liabilities and income tax capital represent assets, liabilities and capital as calculated on a non-consolidated basis using the provisions of the Tax Act applicable to a MIC. The calculation of the income tax assets to capital ratio and income tax liabilities to capital ratio are based on these amounts.

Market Capitalization: Market capitalization is calculated as the number of common shares outstanding multiplied by the closing common share price as of that date.

STATEMENT OF MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL INFORMATION

The accompanying consolidated financial statements of MCAN Mortgage Corporation ("MCAN" or the "Company") are the responsibility of management and have been approved by the Board of Directors. Management is responsible for the information and representations contained in these consolidated financial statements, the Management's Discussion and Analysis of Operations and all other sections of the annual report. The consolidated financial statements have been prepared by management in accordance with International Financial Reporting Standards ("IFRS"), including the accounting requirements of our regulator, the Office of the Superintendent of Financial Institutions Canada.

The Company's accounting system and related internal controls are designed, and supporting procedures are maintained to provide reasonable assurance that the Company's financial records are complete and accurate and that assets are safeguarded against loss from unauthorized use or disposition.

The Office of the Superintendent of Financial Institutions Canada makes such examination and enquiry into the affairs of MCAN as deemed necessary to be satisfied that the provisions of the *Trust and Loan Companies Act* (Canada) are being duly observed for the benefit of depositors and that the Company is in sound financial condition.

The Board of Directors is responsible for ensuring that management fulfills its responsibility for financial reporting and is ultimately responsible for reviewing and approving the consolidated financial statements. These responsibilities are carried out primarily through an Audit Committee of unrelated directors appointed by the Board of Directors. The Chief Financial Officer reviews internal controls, control systems and compliance matters and reports thereon to the Audit Committee.

The Audit Committee meets periodically with management and the external auditors to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues. The Audit Committee reviews the consolidated financial statements and recommends them to the Board of Directors for approval. The Audit Committee also recommends to the Board of Directors and Shareholders the appointment of external auditors and approval of their fees.

The consolidated financial statements have been audited by the Company's external auditors, Ernst & Young LLP, in accordance with Canadian generally accepted auditing standards. Ernst & Young LLP has full and free access to the Audit Committee.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders and Directors of **MCAN Mortgage Corporation**

Opinion

We have audited the consolidated financial statements of MCAN Mortgage Corporation and its subsidiaries (the "Company"), which comprise the consolidated balance sheets as at December 31, 2025 and 2024, and the consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of material accounting policy information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company as at December 31, 2025 and 2024, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards ("IFRS").

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in the audit of the consolidated financial statements of the current period. These matters were addressed in the context of the audit of the consolidated financial statements as a whole, and in forming the auditor's opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Allowance for expected credit loss

Key audit matter

MCAN describes its significant accounting judgments and estimates in relation to the allowance for expected credit loss ("ECL") in Note 5 of the 2025 consolidated financial statements. As disclosed in Note 7, 10, and Note 12 to the 2025 consolidated financial statements, MCAN recognized $25,826 thousand in ECL on its consolidated balance sheet using an ECL model. ECLs represent an unbiased and probability-weighted amount, which is determined by evaluating a range of possible outcomes and reasonable and supportable information about past events, current conditions and forecasts of future economic conditions. Forward-looking information ("FLI"), which involves significant judgment, is explicitly incorporated into the estimation of ECLs. ECLs are measured at amounts equal to either (i) 12 month ECL; or (ii) lifetime ECL for those financial instruments that have experienced a significant

increase in credit risk ("SICR") since initial recognition or when there is objective evidence of impairment.

Auditing the ECLs was complex and required the application of significant judgment because of the forward-looking nature of the key assumptions, and the inherent interrelationship of the critical variables used in measuring the ECLs. Key areas of judgment included evaluating: (i) the models and methodologies used for measuring both the 12 month and lifetime expected credit losses; (ii) the assumptions used in the ECL scenarios including FLI and assigning probability weights; (iii) assessing SICR; and (iv) the qualitative adjustments applied to the modelled ECL based on management's expert credit judgment.

How our audit addressed the key audit matter

We obtained an understanding and evaluated the design of management's controls over the ECLs. We tested the controls over data completeness and accuracy of information used in determining the ECLs. To test the ECLs, our audit procedures included, among others, involving our credit risk modelling specialists to assist in assessing the methodology and assumptions used in the models that estimate the ECLs across various portfolios and to assess management's SICR triggers. For a sample of key FLI variables, we compared the base forecasts produced by management against publicly available information, and also assessed the reasonability of the upside and downside scenarios within the current environment. We independently recalculated the ECLs and reperformed the staging to validate that the model methodology and staging triggers were correctly applied. With the assistance of our credit risk modelling specialists, we evaluated management's methodology over the qualitative adjustments contributing to the ECLs based on the application of expert credit judgment including management's assessment of regional differences in defaults. Furthermore, we assessed the adequacy of the presentation and disclosures of the ECLs in the notes to the consolidated financial statements.

Non-Marketable Securities

Key audit matter

MCAN describes its significant accounting judgments and estimates in relation to non-marketable securities in Note 5 of the 2025 consolidated financial statements. As disclosed in Note 8 to the 2025 consolidated financial statements, MCAN recognized $48,527 thousand in fair value on its consolidated balance sheet for its portfolio of limited partnership real estate funds within the overall non-marketable securities portfolio ("the Funds"). The valuation process involves judgement in determining the appropriate valuation approach to be used, and in estimating the fair value. The fair value is determined using independent appraisals, recent transactions and considers incremental investments in the Funds. The Funds are considered level 3 investments and are not traded in active markets.

Auditing the fair value of the Funds was complex, required the application of auditor judgment and involved the use of our Valuation Specialists, due to the judgement required to determine the fair value of the Funds.

How our audit addressed the key audit matter

We involved Valuations Specialists with specialized skills and knowledge to evaluate management's estimate of fair value for a sample of Funds. We assessed the reasonableness of inputs and assumptions used in the appraisals of the underlying properties in the Funds. We also reviewed comparable transactions, where applicable and market data from our research of independent third-party sources to assess the fair value. We obtained confirmations from fund administrators for each of the Funds to confirm the proportionate share of MCAN's investment in each Fund. We reviewed quarterly updates provided by each of the Funds to identify events or transactions that would impact fair value and assessed how management included in the determination of fair value if relevant. We also considered changes in market conditions and events affecting the Funds to assess the adjustments, or lack of adjustments, made by MCAN in arriving at the fair value of each Fund.

Other Information

Management is responsible for the other information. The other information comprises:

- Management's Discussion and Analysis
- The information, other than the consolidated financial statements and our auditor's report thereon, in the Annual Report

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information, and in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

We obtained Management's Discussion & Analysis and the Annual Report prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact in this auditor's report. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such

disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Andrea Feddema.

1. Corporate Information

MCAN Mortgage Corporation doing business as ("d/b/a") MCAN Financial Group (the "Company" or "MCAN") is a Loan Company under the *Trust and Loan Companies Act* (Canada) (the "Trust Act") and a Mortgage Investment Corporation ("MIC") under the *Income Tax Act* (Canada) (the "Tax Act"). As a Loan Company under the Trust Act, the Company is subject to the guidelines and regulations set by the Office of the Superintendent of Financial Institutions Canada ("OSFI"). MCAN is incorporated in Canada with its head office located at 200 King Street West, Suite 700, Toronto, Ontario, Canada. MCAN is a public company listed on the Toronto Stock Exchange under the symbol MKP.

MCAN's objective is to generate a reliable stream of income by investing in a diversified portfolio of Canadian mortgages, including residential, residential construction, non-residential construction and commercial loans, as well as other types of securities, loans and real estate investments, including our investment in MCAP Commercial LP ("MCAP"). MCAN issues term deposits that are eligible for Canada Deposit Insurance Corporation deposit insurance and are sourced through a network of independent financial agents. The Company manages its capital and asset balances based on the regulations and limits of both the Tax Act and OSFI.

MCAN's wholly owned subsidiary, MCAN Home Mortgage Corporation, is an originator of residential mortgage products across Canada.

The consolidated financial statements were approved in accordance with a resolution of the Board of Directors (the "Board") on February 23, 2026.

2. Basis of Preparation

The consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

The consolidated financial statements have been prepared on a historical cost basis, except for certain items carried at fair value as discussed in Note 4. The consolidated financial statements are presented in Canadian dollars.

The disclosures that accompany the consolidated financial statements include the material accounting policy information applied (Note 4) and the significant accounting judgments and estimates (Note 5) applicable to the preparation of the consolidated financial statements. Certain disclosures are included in the shaded sections of the "Risk Factors" section of Management's Discussion and Analysis of Operations (the "MD&A"), as permitted by IFRS, and form an integral part of the consolidated financial statements.

The Company separates its assets into its non-securitized and securitization portfolios for reporting purposes. Non-securitized assets are funded by term deposits and share capital. Securitization assets consist of (i) insured residential mortgages that have been securitized through the *National Housing Act* ("NHA") Mortgage-Backed Securities ("MBS") program and subsequently sold to third parties; and (ii) uninsured residential mortgages securitized through a bank-sponsored program. Both of these transactions do not achieve derecognition of the mortgages. These assets are funded by the cash received from the sale of the associated securities or notes, from which the Company records a financial liability from securitization.

3. Basis of Consolidation

The consolidated financial statements include the balances of MCAN and its wholly owned subsidiaries, after the elimination of intercompany transactions and balances. The Company consolidates those entities that it controls. The Company has control when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies.

4. Material Accounting Policy Information

The following are the material accounting policies applied by the Company in the preparation of its consolidated financial statements.

(1) Accounting for financial instruments under IFRS 9, *Financial Instruments* ("IFRS 9")

Classification and measurement
All financial instruments are measured initially at their fair value plus, in the case of financial instruments not subsequently recorded at fair value through the consolidated statements of income, directly attributable transaction costs. To determine their classification and measurement category, IFRS 9 requires all financial assets to be assessed based on a combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics.

All financial assets and liabilities are initially recognized on the trade date, which is the date that the Company becomes a party to the contractual provisions of the instrument.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. Transaction costs are capitalized and amortized over the expected life of the instrument using the effective interest rate method ("EIM"), except for transaction costs that are related to financial assets or financial liabilities at fair value through profit or loss ("FVPL"), which are expensed.

a. Debt instruments at amortized cost

The Company only measures debt instruments at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows.
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding.

Business model assessment
The Company determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective. The business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the Company's key management personnel;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed;
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected); and
- The expected frequency, value and timing of sales.

The SPPI test
As a second step of its classification process, the Company assesses the contractual terms of financial instruments to identify whether they meet the SPPI test.

"Principal" for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortization of the premium/discount).

In contrast, contractual terms that introduce more than a minimal exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are SPPI on the principal amount outstanding. In such cases, the financial asset is required to be measured at FVPL.

Debt instruments at amortized cost include all non-securitized and securitized mortgages, and Government of Canada bonds held by the Company.

b. Financial assets at FVPL

Financial assets in this category are those that are not held for trading purposes and have been either designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9.

Financial assets at FVPL are recorded in the consolidated balance sheets at fair value. Changes in fair value are recorded in profit and loss. Interest earned on instruments designated at FVPL is accrued in interest income. Interest earned on assets mandatorily required to be measured at FVPL is recorded using contractual interest rates. Dividend income from equity instruments measured at FVPL is recorded in profit and loss when the right to the payment has been established.

Financial assets at FVPL include real estate investment trusts and non-marketable securities held by the Company.

c. Financial liabilities

After initial recognition, interest-bearing financial liabilities other than those classified at FVPL are subsequently measured at amortized cost using the EIM. Amortized cost is calculated by taking into account any discount or premium, fees or other costs using the EIM. The amortization is included in the related line in the consolidated statements of income. Unamortized premiums and discounts are recognized in the consolidated statements of income upon extinguishment of the liability.

Financial liabilities include all term deposits and financial liabilities from securitization held by the Company.

Impairment

IFRS 9 requires the Company to record an allowance for expected credit loss ("ECL") for all mortgages and other debt financial assets not held at FVPL, together with mortgage commitments and financial guarantee contracts not measured at FVPL.

Overview of ECL principles

The ECL allowance is based on the 12-month ECL of the asset, unless there has been a significant increase in credit risk ("SICR") since origination in which case the allowance is based on the lifetime ECL.

The Company groups its financial assets into stage 1, stage 2 and stage 3, as described below:

- Stage 1: When mortgages are first recognized, the Company recognizes an allowance based on 12-month ECLs, which represent the portion of ECLs that would occur over the life of the mortgage related to default events that are possible to occur within 12 months after the reporting date. Stage 1 mortgages also include facilities reclassified from stage 2 or stage 3 where the credit risk has subsequently improved such that the increase in credit risk since initial recognition is no longer significant.

- Stage 2: When a mortgage has shown a SICR since origination, the Company records an allowance for the ECLs that result from all possible default events over the expected life of the asset. Stage 2 mortgages also include facilities reclassified from stage 3 where the credit risk has improved or the facility is no longer credit-impaired.

- Stage 3: The Company records an allowance for the lifetime ECLs for mortgages considered to be credit-impaired (as outlined below in "Definition of default and cure").

Both lifetime ECLs and 12-month ECLs are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments.

SICR

The Company has established a policy to assess, at the end of each reporting period, whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument. The primary indicators of SICR are relative changes in credit scores for residential mortgages and changes in internal risk ratings for construction and commercial mortgages. The Company may also apply a secondary qualitative method for identifying a SICR, such as changes in macroeconomic circumstances or the application of management's judgment. In certain cases, the Company may also consider that certain events are a SICR as opposed to a default. For a definition of default and cure, refer to the "Definition of default and cure" subsection of this note. IFRS 9 provides a rebuttable presumption that a SICR has occurred if contractual payments are more than 30 days past due. The Company has not rebutted this presumption.

Calculation of ECLs

The Company calculates ECLs based on three probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the effective interest rate. The cash shortfall is the difference between the cash flows that are due to the Company in accordance with the contract and the cash flows that the Company expects to receive if the borrower defaults.

The mechanics of the ECL calculations are outlined below and the key elements are as follows:

- PD: The Probability of Default ("PD") is an estimate of the likelihood of default over a given time horizon. Default is only assessed if the facility has not been previously derecognized and is still in the portfolio. The PD model comprises forward-looking macroeconomic projections and internal risk rating-based segmentation.

- LGD: The Loss Given Default ("LGD") is an estimate of the loss arising in the case where a default occurs. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive in the event of default, including from the realization of any collateral.

- EAD: The Exposure at Default ("EAD") is an estimate of the exposure at a future default date at the borrower level, taking into account expected changes in the exposure after the reporting date, including advances and repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.

The ECLs are calculated through three probability-weighted forward-looking scenarios (base, favourable and unfavourable). Each of these is associated with different PDs, LGDs and EADs. The assessment of multiple scenarios also incorporates how defaulted mortgages are expected to be recovered, including the probability that the mortgages will cure and the value of collateral or the amount that might be received from selling the asset. Outcomes under the favourable and unfavourable scenarios are generated based on management judgment, looking at the likelihood of a range of macroeconomic variables. A cross-functional internal management committee reviews the proposed probability weights assigned to each of the three scenarios. The above committee applies judgment to adjust the weights when changes are noted in relevant macroeconomic variables.

The maximum period for which the credit losses are determined is the contractual life of a financial instrument unless the Company has the legal right to call the instrument earlier.

Mortgage commitments and letters of credit

Undrawn mortgage commitments and letters of credit are commitments under which, over the duration of the commitment, the Company is required to advance funds to the borrower. These contracts are in the scope of the ECL requirements. The contractual value of letters of credit and undrawn mortgage commitments, where the mortgage agreed to be provided is on market terms, are not recorded in the consolidated balance sheets. When estimating lifetime ECLs for undrawn mortgage commitments, the Company estimates the portion of the mortgage commitment that will be drawn down over its expected life.

Definition of default and cure

The Company considers a financial instrument defaulted and therefore stage 3 (credit-impaired) for ECL calculations in all cases when the borrower becomes 90 days past due on their contractual payments. In certain other cases, where qualitative thresholds indicate unlikeliness to pay as a result of a credit event, the Company carefully considers whether the event should result in an assessment at stage 2 or stage 3 for ECL calculations.

The combined impact of several events may cause financial assets to become defaulted as opposed to one discrete event. It is the Company's policy to consider a financial instrument as "cured" and, therefore, reclassified out of stage 3 when none of the default criteria remain present at the end of each quarter. The decision whether to classify an asset as stage 1 or stage 2 once cured depends on the current assessment of SICR.

Forward-looking information

In its ECL models, the Company relies on a broad range of forward-looking information as macroeconomic variables, such as but not limited to:

- House price indices
- Unemployment rates
- Gross domestic product
- Interest rates

The macroeconomic variables and models used for calculating ECLs may not always capture all characteristics of the market at the dates of the consolidated financial statements. To reflect this, the Company may make temporary qualitative adjustments or overlays using expert credit judgment.

Modified financial assets

In a case where the borrower experiences financial difficulties, the Company may grant certain concessionary modifications to the terms and conditions of a mortgage. If the Company determines that a modification results in an expiry of cash flows, the original financial asset is derecognized while a new asset is recognized based on the new contractual terms. SICR is assessed relative to the risk of default on the date of modification. If the Company determines

that a modification does not result in derecognition, SICR is assessed based on the risk of default at initial recognition of the original asset. Expected cash flows arising from the modified contractual terms are considered when calculating the ECL for the modified asset. For mortgages that have been modified while having a lifetime ECL, the mortgages can revert to having a 12-month ECL after a period of performance and improvement in the borrower's financial condition.

Write-offs

Financial assets are written off either partially or in their entirety only when the Company believes that there are no reasonably expected future recoveries. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to provisions for losses.

Hedge accounting

The Company makes use of bond forwards and interest rate swaps to manage interest rate exposures. In order to manage particular risks, the Company applies hedge accounting for transactions that meet specified criteria.

In order to qualify for hedge accounting, a hedge relationship must be designated and formally documented in accordance with IFRS 9. The Company's documentation, in accordance with these requirements, includes a specific risk management objective and strategy being applied, the specific cash flow or fair value being hedged and how hedge effectiveness is assessed. To qualify for hedge accounting, there must be a correlation between the changes in the cash flows or fair value between the hedged and hedging item.

Hedge effectiveness is assessed at the inception of the hedging relationship and on an ongoing basis. Hedge ineffectiveness occurs when the changes in cash flows or fair value of the hedging item differ from the cash flows or fair value changes in the hedged risk in the hedged item.

The Company uses bond forwards and interest rate swaps to manage interest rate risk. Hedge accounting is applied only when the hedging relationship meets all IFRS 9 criteria. Otherwise, derivative instruments are measured at FVPL, and changes in fair value are included in non-interest income.

Cash flow hedges

The Company's cash flow hedges use bond forwards to hedge changes in future cash flows attributable to interest rate fluctuations arising in highly probable forecasted issuances of fixed-rate liabilities. The effective portion of the change in fair value of the bond forward is recognized in other comprehensive income (loss) ("OCI") until the forecasted cash flows being hedged are recognized in income in future accounting periods. When the forecasted cash flows are recognized in income, the cash flow hedge reserve related to those cash flows is reclassified from OCI to term deposit interest and expenses on the consolidated statements of income. Hedge ineffectiveness is recognized immediately in net gain (loss) on securities.

If the hedging instrument expires, or is settled or sold, or if the hedge no longer meets the criteria for hedge accounting under IFRS 9, the hedge relationship is terminated. Any cumulative gain or loss recognized at the time remains in OCI until the forecasted transaction impacts the consolidated statements of income. When the forecasted transaction is no longer expected to occur, the cumulative gain or loss that was recognized in OCI is immediately recognized in non-interest income.

Fair value hedges

The Company's fair value hedges use interest rate swaps to hedge changes in fair value of fixed-rate term deposits, which are impacted by changes in market interest rates. The change in fair value of the interest rate swap and the change in fair value of the pool of term deposits are recorded as part of the change in their carrying value and in term deposit interest and expenses.

If the hedging instrument expires, or is settled or sold, or if the hedge no longer meets the criteria for hedge accounting under IFRS 9, the hedge relationship is terminated. Any fair value adjustment on the pool of term deposits is amortized over their remaining term. If the term deposits are settled before their remaining term, the unamortized fair value adjustment is recognized immediately in net gain (loss) on securities.

(2) Determination of fair value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Financial assets and liabilities are classified into three levels, as follows: quoted prices in an active market (Level 1), fair value based on directly or indirectly observable inputs other than quoted prices (Level 2) and fair value based on inputs that are not based on observable data (Level 3).

For non-marketable securities, fair value is determined using a variety of approaches including independent appraisals, recent transactions and incremental investments in the funds. The Company considers various factors in the determination

of fair value including, but not limited to, recent appraisals, the status of underlying construction project and recent capital calls. Judgment is applied in the determination of the appropriate valuation approach, depending on the nature of the investment. On a quarterly basis, the Company reviews the fair value of the investments in conjunction with reports produced by the fund administrators, recent development activity and any other market-driven triggers.

For all other financial instruments where the fair values of financial assets and financial liabilities recorded in the consolidated financial statements cannot be derived from active markets, they are determined using a variety of appropriate valuation techniques that may include discounted cash flow method, comparison to similar instruments for which market observable prices may exist and other relevant valuation models. The inputs are derived from observable market data where possible, but where observable market data is not available, estimates are required to establish fair values. These estimates include considerations of liquidity and model inputs such as discount rates, prepayment rates and default rate assumptions for certain investments.

Changes in fair value are recognized in net gain (loss) on securities in the consolidated statements of income.

(3) Derecognition of financial assets and financial liabilities

(i) Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- The rights to receive cash flows from the asset have expired; or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a qualifying "pass-through" arrangement; and either:
    - The Company has transferred substantially all the risks and rewards of ownership of the financial asset, or
    - The Company has neither transferred nor retained substantially all the risks and rewards of ownership of the financial asset, but has transferred control of the financial asset.

When substantially all the risks and rewards of ownership of the financial asset have been transferred, the Company will derecognize the financial asset and recognize separately as assets or liabilities any rights and obligations created or retained in the transfer. When substantially all the risks and rewards of ownership of the financial asset have been retained, the Company continues to recognize the financial asset and also recognizes a financial liability for the consideration received. In these circumstances, certain transaction costs incurred are also capitalized and amortized using the EIM. When the Company has neither transferred nor retained substantially all the risks and rewards of ownership of the financial asset nor transferred control of the financial asset, the financial asset is recognized to the extent of the Company's continuing involvement in the financial asset. In that case, the Company also recognizes an associated liability.

The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

(ii) Financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statements of income.

Only the Company's insured multi-family mortgage securitizations achieve derecognition (Note 11). Realized gains and losses from the derecognition of these financial assets and financial liabilities are recognized in other non-interest income in the consolidated statements of income.

(4) Taxes

As a MIC under the Tax Act, the Company is able to deduct from income for tax purposes dividends paid within 90 days of year-end. The Company intends to maintain its status as a MIC and intends to pay sufficient dividends to ensure that it is not subject to income taxes in the MIC entity on a non-consolidated basis. Accordingly, the Company does not record a provision for current or deferred taxes within the MIC entity; however, provisions are recorded as applicable in all subsidiaries of MCAN.

(i) Current tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the consolidated financial statement dates.

(ii) Deferred tax

The Company follows the asset and liability method of accounting for income taxes, whereby deferred tax assets and liabilities are recognized for the expected future tax impact of temporary differences between the carrying amounts of certain assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted or substantively enacted tax rates applicable to taxable income in the period in which those temporary differences are expected to be recovered or settled. Deferred tax assets are only recognized for deductible temporary differences and the carry forward of unused tax losses to the extent that it is probable that taxable income will be available and the carry forward of unused tax losses can be used.

(5) Dividends on common shares

Dividends on common shares are deducted from shareholders' equity at the time that they are declared. Dividends that are approved after the consolidated financial statement date are not recognized as a liability in the consolidated financial statements but are disclosed as a subsequent event.

(6) Investment in associate

The Company's investment in MCAP is accounted for using the equity method. An associate is an entity over which the Company has significant influence.

Under the equity method, the investment in the associate is carried on the consolidated balance sheets at cost plus post-acquisition changes in the Company's share of net assets of the associate.

The consolidated statements of income reflect the Company's proportionate share of the results of operations of the associate. Unrealized gains and losses resulting from transactions between the Company and the associate are eliminated to the extent of the interest in the associate.

The most recent available financial statements of the associate are used by the Company in applying the equity method. When the financial statements of an associate used in applying the equity method are prepared as of a different date from that of the Company, adjustments are made for the effects of significant transactions or events that occur between that date and the date of the Company's consolidated financial statements.

Where necessary, adjustments are made to harmonize the accounting policies of the associate with those of the Company.

The Company determines at each consolidated financial statement date whether there is any objective evidence that the investment in the associate is impaired. The Company calculates the amount of impairment as the difference between the recoverable amount of the investment in the associate and its carrying value, and recognizes the amount in the consolidated statements of income, thus reducing the carrying value by the amount of impairment.

(7) Revenue recognition

Interest income or expense

For all financial assets measured at amortized cost and interest-bearing financial assets measured at FVPL under IFRS 9, interest income or expense is accrued in interest income or expense. The calculation takes into account the contractual interest rate, along with any fees or incremental costs that are directly attributable to the instrument and all other premiums or discounts. Interest income or expense is included in the appropriate component of the consolidated statements of income.

Revenue from contracts with customers

Revenue from contracts with customers is recognized at an amount that reflects the consideration that the Company expects to receive in exchange for transferring goods or services to a customer.

(8) Cash and cash equivalents

Cash and cash equivalents (including cash held in trust) on the consolidated balance sheets comprise cash held at banks and short-term deposits with original maturity dates of less than 90 days.

(9) Share-based compensation payment transactions

The cost of cash-settled transactions is measured initially at fair value at the grant date. The obligations are accrued over the vesting period and adjusted for fluctuations in the market price of the Company's common shares. Changes in the obligations are recorded as salaries and benefits in the consolidated statements of income with a corresponding change to other liabilities. The liability is remeasured at fair value at each consolidated financial statement date up to and including the settlement date.

(10) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new ordinary shares are shown in equity as a deduction, net of tax, from the proceeds.

(11) Provisions

Provisions for legal claims are recognized when: (a) the Company has a present legal or constructive obligation as a result of past events; (b) it is probable that an outflow of resources will be required to settle the obligation; and (c) the amount has been reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is included in interest expense.

(12) Leases

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Right-of-use assets and lease liabilities are recognized at the lease commencement date, that is, on the date when the underlying asset is available for use by the Company. The Company's right-of-use asset relating to its premises lease does not meet the definition of investment property.

Right-of-use assets are initially and subsequently measured at cost and depreciated over the shorter of the asset's useful life and the lease term, on a straight-line basis. The right-of-use assets are remeasured in the event of impairment in accordance with IAS 36, *Impairment of Assets*.

Lease liabilities are initially and subsequently measured at the present value of the lease payments, which are unpaid as of the commencement date. The future lease payments are discounted using the interest rate implicit in the lease, if readily determinable. If not readily determinable, the Company's incremental borrowing rate is used, which is the rate to borrow over a similar term and with similar security, the funds necessary to obtain an asset of similar value to the right-of-use asset. After the commencement date, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset. Adjustments to the carrying amount of the lease obligation as a result of remeasurement are accounted for as a corresponding adjustment to the right-of-use asset.

(13) Future changes in accounting policies

The following standard and amendments have been issued but are not yet effective on the date of issuance of the Company's consolidated financial statements.

Presentation and Disclosure in Financial Statements

In April 2024, the IASB issued IFRS 18, *Presentation and Disclosure in Financial Statements* ("IFRS 18"), which replaces the guidance in IAS 1, *Presentation of Financial Statements* and sets out requirements for presentation and disclosure of information, focusing on providing relevant information to users of the financial statements. IFRS 18 introduces changes to the structure of the statements of income, aggregation and disaggregation of financial information, and management-defined performance measures to be disclosed in the notes to the consolidated financial statements. It will be effective for the Company's annual period beginning January 1, 2028. Early application is permitted. The standard will be applied

retrospectively with restatement of comparatives. The Company is currently assessing the impact of adopting this standard.

5. Summary of Significant Accounting Judgments and Estimates

The preparation of the Company's consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the affected assets or liabilities in future periods.

Significant influence

Significant influence represents the power to participate in the financial and operating policy decisions of an investee but does not represent control or joint control over the entity. In determining whether it has significant influence over an entity, the Company makes certain judgments to form the basis for the Company's policies in accounting for its equity investments. Although MCAN's voting interest in MCAP was less than 20% at December 31, 2025, MCAN uses the equity basis of accounting for the investment as it has significant influence in MCAP per IAS 28, *Investments in Associates and Joint Ventures*, as a result of its entitlement to a position on MCAP's Board of Directors.

Fair value of financial instruments

Where the fair values of financial assets and financial liabilities recorded in the consolidated financial statements cannot be derived from active markets, they are determined using a variety of valuation techniques that may include the use of:

- Mathematical models - the inputs to mathematical models are derived from observable market data where possible, but where observable market data is not available, estimates are required to establish fair values. These estimates include considerations of liquidity and model inputs such as discount rates, prepayment rates and default rate assumptions for certain investments.
- Market approach - the inputs include the use of recently observable market transactions and appraisals.
- Cost approach - for new property developments, the inputs include the cost of the land and construction costs.

Impairment of financial assets

The measurement of impairment losses under IFRS 9 across all categories of financial assets requires judgment, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Company's ECL calculations are model outputs with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgments and estimates include:

- The Company's criteria for assessing if there has been a SICR that results in allowances being measured on a lifetime versus 12-month ECL basis;
- The segmentation of financial assets for the purposes of assessing ECL on a collective basis;
- Development of ECL models, including the various formulas and the choice of inputs;
- Determination of associations between macroeconomic scenarios and economic inputs, such as unemployment levels and collateral values, and the effect on PD, EAD and LGD; and
- Forward-looking information used as economic inputs.

The Company may also make qualitative adjustments or overlays using expert credit judgment in the calculations of ECLs, which represent accounting judgments and estimates that have been heightened due to the current economic and geopolitical environment. Key judgments and estimates, including around probability weights to assign to each scenario and the impacts of government policy and stimulus measures, will be heavily influenced by the extent and severity of these events. These judgments have been made with reference to the facts, projections and other circumstances at the consolidated balance sheet dates. IFRS 9 does not permit the use of hindsight in measuring provisions for credit losses. Any new forward-looking information subsequent to the consolidated balance sheet dates are reflected in the measurement of provisions for credit losses in future periods, as appropriate.

Mortgage prepayment rates

In calculating the rate at which borrowers prepay their mortgages, the Company makes estimates based on its historical experience. These assumptions impact the timing of revenue recognition and the amortization of mortgage premiums using the EIM.

6. Marketable Securities

At December 31	2025	2024
Real estate investment trusts	$ 39,025	$ 51,331
Government of Canada bonds	15,121	15,014
	$ 54,146	**$ 66,345**

For details of net gains and losses on marketable securities, refer to Note 20.

7. Mortgages - Non-securitized

(a) Summary

At December 31, 2025	Gross Principal	Allowance Stage 1	Allowance Stage 2	Allowance Stage 3	Allowance Total	Net Principal
Non-securitized Portfolio:						
Residential mortgages						
Insured	$ 171,895	$ —	$ —	$ —	$ —	$ 171,895
Uninsured	985,065	1,795	2,350	2,861	7,006	978,059
Uninsured - completed inventory	167,518	1,485	—	—	1,485	166,033
Construction loans	1,149,649	3,441	210	10,368	14,019	1,135,630
Commercial loans						
Multi-family residential	17,366	177	—	—	177	17,189
Other commercial	10,997	215	—	—	215	10,782
	$ 2,502,490	**$ 7,113**	**$ 2,560**	**$ 13,229**	**$ 22,902**	**$ 2,479,588**

At December 31, 2024	Gross Principal	Allowance Stage 1	Allowance Stage 2	Allowance Stage 3	Allowance Total	Net Principal
Non-securitized Portfolio:						
Residential mortgages						
Insured	$ 126,528	$ —	$ —	$ —	$ —	$ 126,528
Uninsured	1,117,095	1,149	1,314	1,260	3,723	1,113,372
Uninsured - completed inventory	120,410	982	—	—	982	119,428
Construction loans	1,096,023	3,770	—	4,692	8,462	1,087,561
Commercial loans						
Multi-family residential	17,237	10	25	—	35	17,202
	$ 2,477,293	**$ 5,911**	**$ 1,339**	**$ 5,952**	**$ 13,202**	**$ 2,464,091**

Gross principal as presented in the tables above includes unamortized capitalized transaction costs and accrued interest.

Uninsured - completed inventory loans are extended to developers to provide interim mortgage financing on residential units (condominium or freehold) that are completed or close to completion. Qualification criteria for the completed inventory classification include no substantial remaining construction risk, commencement of occupancy permits, potential sale and closing with a purchaser within three to four months or units near completion.

(b) Mortgages by risk rating

The Company's internal risk rating system involves judgment and combines multiple factors to arrive at a borrower-specific score to assess the borrower's probability of default and ultimately classify the mortgage into one of the categories listed below. For residential mortgages, these factors include, but are not limited to, the loan to value ratio, the borrower's ability to service debt, property location and credit score. For construction, commercial and uninsured completed inventory loans, these factors include, but are not limited to, borrower net worth, project presales, experience with the borrower, project location, debt serviceability and loan to value ratio.

The internal risk ratings presented below are defined as follows:

- **Insured Performing:** Mortgages that are insured by a federally regulated mortgage insurer that are not in arrears or default.
- **Very Low/Low**: Mortgages that have below average probability of default with credit risk that is lower than the Company's risk appetite and risk tolerance levels.
- **Normal/Moderate:** Mortgages that have a standard probability of default with credit risk that is within the Company's risk appetite and risk tolerance levels.
- **High/Higher:** Mortgages that may have a higher probability of default but are within the Company's risk appetite or have subsequently experienced an increase in credit risk. The proportion of mortgages originated in this category is managed to the Company's overall risk appetite and tolerance levels.
- **Monitored/Arrears:** For residential mortgages, mortgages that are past due but less than 90 days in arrears or mortgages for which an escalated concern has arisen. For construction, commercial and uninsured completed inventory loans, mortgages where the performance trend is negative or where debt serviceability may be in jeopardy.
- **Impaired/Default**: Mortgages that are over 90 days past due or mortgages for which there is objective evidence of impairment.

The table below shows the credit quality of the Company's non-securitized mortgage portfolio based on the Company's internal risk rating system and stage classification. The Company's policy that outlines whether ECLs are calculated on an impaired or performing basis are set out in Note 4.

[1] Represents the change in the allowance related to changes in model parameters, inputs and assumptions. This includes remeasurement between 12-month and lifetime ECLs following stage transfers, changes to forward-looking macroeconomic conditions, changes in the level of risk and changes to other parameters used in the ECL model.
[2] Reflects the decrease in the allowance related to mortgages that were repaid or derecognized during the period.
[3] Represents movements between ECL stages and excludes the impact to the allowance of remeasurement between 12-month and lifetime ECLs, and changes in risk.
[4] Reflects the increase in allowance related to mortgages newly recognized during the period. This includes mortgages that were newly originated, purchased or re-recognized following a modification of terms.

ECLs are calculated through three probability-weighted forward-looking scenarios: base, favourable and unfavourable. ECLs are sensitive to the macroeconomic variables used in the three forward-looking scenarios and the probability weights assigned to those forecasts. The macroeconomic variables used in these scenarios are projected over the specified forecast period and could have a material impact in determining ECLs.

All mortgages are secured by real estate property located in Canada. Insured residential mortgages also qualify for insurance that mitigates the risk of credit loss. For past due but not impaired, and impaired mortgages, there may be no ECL if there is sufficient collateral value and quality to cover the maximum credit exposure. Appraised values for collateral held against mortgages are obtained initially at the time of origination and updated when a mortgage is individually assessed as credit impaired.

At December 31, 2025, the maximum credit exposure was $2,502,490 (December 31, 2024 - $2,477,293) for all mortgages.

The following table represents the average values of the macroeconomic variables used in these forecasts:

At December 31, 2025	Base		Favourable		Unfavourable	
Macroeconomic Variables	Next 12 Months [1]	2 to 5 Years [1]	Next 12 Months [1]	2 to 5 Years [1]	Next 12 Months [1]	2 to 5 Years [1]
Housing Price Index (annual change)						
Canada	2.51%	3.03%	10.91%	4.05%	0.49 %	2.77%

[1] *The numbers represent the average values over the quoted period.*

Historical regression methodology is used to relate ECL to key macroeconomic indicators including housing price indices, gross domestic product, unemployment rate and interest rates. Economic forecasts are determined based on a combination of external information and internal management judgments and estimates at the reporting date. The current geopolitical environment has increased the level of uncertainty with respect to management's judgments and estimates including the probability weights assigned to each scenario, the impacts of monetary policy on macroeconomic indicators and the mortgage portfolio. Since December 31, 2025, forecasts around these uncertainties have continued to evolve. Any new forward-looking information subsequent to December 31, 2025, will be reflected in the measurement of provisions for credit losses in future periods, as appropriate. This may add significant variability to provisions for credit losses in future periods.

The base scenario represents management's best estimate using all available economic forecasts in light of the current geopolitical environment. It assumes the unemployment rate will decrease while gross domestic product and housing prices are expected to increase. The favourable scenario assumes a larger increase in housing prices, lower unemployment and a larger increase to gross domestic product compared to the base scenario. The unfavourable scenario assumes a more pronounced increase to the unemployment rate, a slight increase in housing prices and modest increase in gross domestic product growth in the short term followed by a recovery in the mid to long term.

Assuming a 100% base case economic forecast with the incorporation of the impact of the migration of mortgages between stages, with all other assumptions held constant, the ECL for non-securitized mortgages at December 31, 2025 would be approximately $23,382 (December 31, 2024 - $13,219) compared to the reported ECL for non-securitized mortgages of $22,902 (December 31, 2024 - $13,202).

Assuming a 100% unfavourable economic forecast with the incorporation of the impact of the migration of mortgages between stages, with all other assumptions held constant, the ECL for non-securitized mortgages at December 31, 2025 would be approximately $24,976 (December 31, 2024 - $14,250) compared to the reported ECL for non-securitized mortgages of $22,902 (December 31, 2024 - $13,202).

(d) Mortgage arrears

Mortgages past due but not impaired are as follows:

At December 31, 2025	1 to 30 Days	31 to 60 Days	61 to 90 Days	Total
Residential mortgages				
Insured	$ 949	$ 15	$ 267	$ 1,231
Uninsured	29,720	16,622	4,403	50,745
Construction loans	15,443	8,500	—	23,943
	$ 46,112	**$ 25,137**	**$ 4,670**	**$ 75,919**

At December 31, 2024	1 to 30 Days	31 to 60 Days	61 to 90 Days	Total
Residential mortgages				
Insured	$ 992	$ 92	$ 271	$ 1,355

(f) Other information

Outstanding commitments for future fundings of mortgages are as follows:

At December 31	2025	2024
Residential mortgages		
Insured	$ 167,072	$ 63,674
Uninsured	81,197	31,201
Uninsured - completed inventory	5,752	6,994
Construction loans	275,305	327,996
Commercial loans		
Other	690	—
	$ 530,016	**$ 429,865**

Of the total outstanding commitments for future fundings, only a portion issued are expected to fund. Accordingly, these amounts do not necessarily represent future cash requirements of the Company.

The fair value of the non-securitized mortgage portfolio at December 31, 2025 is $2,502,511 (December 31, 2024 - $2,483,036). Fair values are calculated on a discounted cash flow basis using the prevailing market rates for similar mortgages.

At December 31, 2025, insured residential mortgages include $37,835 (December 31, 2024 - $46,299) of mortgages that had been securitized through the market MBS program; however, the underlying MBS security has been retained by the Company for liquidity purposes.

8. Non-marketable Securities

At December 31	2025	2024
Real Estate Debt Funds	$ 78,065	$ 74,296
Other Real Estate Limited Partnerships	48,527	43,132
	$ 126,592	**$ 117,428**

The Company holds investments in Real Estate Debt Funds with investment interests ranging from 2.4% to 6.2% (December 31, 2024 – 2.2% to 5.9%). At December 31, 2025, the Company's total remaining commitments relating to its Real Estate Debt Funds are $34,344, consisting of $5,500 available for capital advances and $28,844 that supports credit facilities throughout the life of one of the Real Estate Debt Funds. The Company advances its proportionate share as the Real Estate Debt Funds invest in a diversified portfolio of mortgage loans, including mezzanine, subordinate and bridge mortgages, secured by Canadian residential and commercial real estate.

The Company holds investments in Other Real Estate Limited Partnerships with partnership interests ranging from 4.8% to 34.8% (December 31, 2024 – 5.7% to 34.8%). At December 31, 2025, the Company's total remaining commitments relating to its Other Real Estate Limited Partnerships are $34,000. The Company advances its proportionate share as the Other Real Estate Limited Partnerships acquire, develop, re-develop, lease, manage and reposition real estate properties across Canada.

For details of net gains and losses on non-marketable securities, refer to Note 20.

9. Equity Investment in MCAP Commercial LP

At December 31, 2025, the Company holds a 13.89% equity interest in MCAP (December 31, 2024 - 13.88%), representing 4,000,000 units held by MCAN (December 31, 2024 - 4,000,000) of the 28,796,809 total outstanding MCAP partnership units (December 31, 2024 - 28,813,772).

The Company recognizes equity income from MCAP on a one-month lag such that equity income from MCAP is based on MCAP's net income for the years ended November 30 adjusted for the impacts of significant transactions or events up to the date of our financial statements.

Amongst the interparty rights in the MCAP partnership agreement, the majority partner in MCAP has the right to acquire MCAN's entire partnership interest in MCAP at fair market value, which would be determined by an independent valuator agreed upon by both parties.

At December 31	**2025**	**2024**
Balance, beginning of year	$ 122,265	$ 111,367
Equity income	33,444	28,803
Dilution gain	—	680
Distributions received	(21,714)	(18,585)
Balance, end of year	**$ 133,995**	**$ 122,265**

Selected MCAP financial information is as follows:

At November 30	**2025**	**2024**
MCAP's balance sheet:		
Assets	$ 75,403,669	$ 66,971,617
Liabilities	74,461,830	66,113,046
Equity	941,839	858,571

Years Ended November 30	**2025**	**2024**
MCAP's revenue and net income:		
Revenue	$ 1,123,817	$ 1,187,445
Net income	240,790	208,774

10. Other Assets

At December 31	2025	2024
Intangible assets, net	$ 3,427	$ 1,610
Capital assets, net	5,662	3,835
Right-of-use asset, net	5,510	5,939
Prepaid expenses	2,053	1,587
Other loans	6,451	5,742
Related party receivable - MCAP	682	1,629
Receivables	3,139	3,884
Foreclosed real estate	220	321
	$ 27,144	**$ 24,547**

Intangible and capital assets are initially recognized at cost and are amortized over their estimated useful lives (typically 5 years) on a straight-line basis.

During the year ended December 31, 2025, the Company recognized $363 (2024 - $370) of depreciation expense on the right-of-use asset.

The related party receivable from MCAP consists primarily of net principal and interest collected by MCAP in its role as a mortgage servicer, which is remitted to MCAN on the next business day.

The capital assets and intangible assets continuity is as follows:

	Furniture & Fixtures	Computer Hardware	Leasehold Improvements	Capital Asset Total	Intangible Assets
Cost					
At January 1, 2024	$ 835	$ 2,223	$ 2,003	$ 5,061	$ 6,936
Additions	1,362	595	1,710	3,667	1,133

At December 31, 2025	**$ 1,083**	**$ 502**	**$ 4,077**	**$ 5,662**	**$ 3,427**

At December 31, 2025, the Company has a $3,946 revolving promissory note receivable including accrued interest (December 31, 2024 - $3,404) with an Other Real Estate Limited Partnership (refer to Note 8), The net carrying amount, inclusive of an allowance for ECL of $2,521 (December 31, 2024 - $nil), is $1,420 (December 31, 2024 - $3,404). The revolving promissory note receivable matures on June 30, 2026 with $nil remaining available to be drawn.

11. Securitization Activities

The Company is an NHA MBS issuer, which involves the securitization of insured mortgages to create and sell MBS through Canada Mortgage and Housing Corporation (“CMHC”) market MBS and Canada Mortgage Bonds (“CMB”) programs.

The Company may sell MBS to third parties and may also sell the net economics and cash flows from the underlying mortgages (“interest-only strips”) to third parties. The MBS portion of the mortgage represents the core securitized mortgage principal and the right to receive coupon interest at a specified rate. The interest-only strips represent the right to receive excess cash flows after satisfying the MBS coupon interest payment and any other expenses such as mortgage servicing.

Pursuant to the NHA MBS program, MBS investors receive monthly cash flows consisting of interest and scheduled and unscheduled principal payments. CMHC makes principal and interest payments in the event of any MBS default by the issuer, thus fulfilling the timely payment guarantee to investors. All MBS issuers (including the Company) are required to remit scheduled mortgage principal and interest payments to Computershare, the designated Central Payor and Transfer Agent ("CPTA") for the program, even if these mortgage payments have not been collected from mortgagors. Similarly, at the maturity of the MBS pools that have been issued by the Company, any outstanding principal must be paid to the CPTA. If the Company fails to make a scheduled principal and interest payment to CPTA, CMHC may enforce the assignment of the mortgages included in all MBS pools in addition to other assets backing the MBS issued. In the case of mortgage defaults, MCAN is required to make scheduled principal and interest payments to the CPTA until legal enforcement proceedings are terminated, at which time MCAN is required to transfer the full amount of any outstanding principal to the CPTA as part of the timely payment obligation and then place the mortgage/property through the insurance claims process to recover any losses. These defaults may result in cash flow timing mismatches that may marginally increase funding and liquidity risks.

During 2025, MCAN securitized $1,413,219 insured residential mortgages through the market MBS and CMB programs (2024 - $802,713).

During 2025, MCAN bought, from a related party, and securitized $603,879 of insured multi-family mortgages (2024 - $94,312). With respect to the insured multi-family securitization, at the time of securitization the Company derecognized the mortgages from its consolidated balance sheet and recorded an upfront gain of $2,000 (2024 - $128).

MCAN has an agreement with a Canadian Schedule I Chartered bank to participate in an uninsured residential mortgage securitization program sponsored by the bank. Under this agreement, MCAN can sell qualifying uninsured residential mortgages that meet certain requirements into the program and they remain in the program until maturity. During 2025, MCAN securitized $339,541 of uninsured residential mortgages through this bank-sponsored securitization program (2024 - $nil).

Transferred financial assets that are not derecognized in their entirety

Since MCAN neither transfers nor retains substantially all of the risks and rewards of ownership on sale and retains significant continuing involvement through the provision of the timely payment obligation with respect to the majority of the market MBS program, CMB program and uninsured residential mortgage securitization transactions, MCAN continues to recognize the securitized mortgages (Note 12) and financial liabilities from securitization (Note 17) on its consolidated balance sheet.

Transferred financial assets that are derecognized in their entirety but where the Company has a continuing involvement

MCAN securitizes insured multi-family mortgages through the market MBS program and CMB program, and in some cases, sells MBS and the associated interest-only strips to third parties. In these instances, where MCAN transfers control of the asset or substantially all risks and rewards on sale, MCAN derecognizes the mortgages from its consolidated balance sheets. MCAN's continuing involvement is the ongoing obligation in its role as MBS issuer to service the mortgages and MBS until maturity.

In these circumstances, the derecognized MBS balance related to the market MBS program and CMB program are not reflected as an asset or liability on MCAN's consolidated balance sheets. The derecognized MBS mature as follows:

	2026	2028	2029	2030	2034	Total
At December 31, 2025	$ 7,606	$ 79,485	$ 105,820	$ 632,120	$ 66,224	**$ 891,255**

12. Mortgages - Securitized

(a) Summary

At December 31, 2025	Gross Principal	Allowance Stage 1	Allowance Stage 2	Allowance Stage 3	Allowance Total	Net Principal

	$ 2,419,871	**$ —**	**$ —**	**$ —**	**$ —**	**$ 2,419,871**

(b) Mortgages by risk rating

The Company's internal risk rating system involves judgment and combines multiple factors to arrive at a borrower-specific score to assess the borrower's probability of default and ultimately classify the mortgage into one of the categories listed in the table below. For residential mortgages, these factors include, but are not limited to, the loan-to-value ratio, the borrower's ability to service debt, property location and credit score. For a definition of internal risk ratings, refer to Note 7.

The table below shows the credit quality of the Company's securitized mortgage portfolio based on the Company's internal risk rating system and stage classification. The Company's policy that outlines whether ECLs are calculated on an impaired or performing basis is discussed in Note 4.

At December 31	2025 Stage 1	2025 Stage 2	2025 Stage 3	2025 Total	2024 Stage 1	2024 Stage 2	2024 Stage 3	2024 Total

Allowance, end of year	**$ 222**	**$ 181**	**$ —**	**$ 403**	**$ —**	**$ —**	**$ —**	**$ —**

[1] Represents the change in the allowance related to changes in model parameters, inputs and assumptions. This includes remeasurement between 12-month and lifetime ECLs following stage transfers, changes to forward-looking macroeconomic conditions, changes in the level of risk and changes to other parameters used in the ECL model.
[2] Reflects the decrease in the allowance related to mortgages that were repaid or derecognized during the period.
[3] Represents movements between ECL stages and excludes the impact to the allowance of remeasurement between 12-month and lifetime ECLs and changes in risk.
[4] Reflects the increase in allowance related to mortgages newly securitized during the period.

(d) Mortgage arrears

Securitized insured residential mortgages past due but not impaired are as follows:

	1 to 30 days	31 to 60 days	61 to 90 days	Total
At December 31, 2025	$ 12,319	$ 432	$ 1,104	**$ 13,855**
At December 31, 2024	$ 2,819	$ 1,020	$ —	**$ 3,839**

Impaired securitized insured residential mortgages are as follows:

At December 31	2025	2024
Ontario	$ —	$ 264
	$ —	**$ 264**

There were no securitized uninsured residential mortgages past due or impaired at December 31, 2025 and December 31, 2024.

(e) Geographic analysis

At December 31	2025		2024	
Ontario	$ 2,583,860	74.6 %	$ 1,995,326	82.5 %
Alberta	493,764	14.3 %	260,743	10.8 %
British Columbia	148,697	4.3 %	73,408	3.0 %
Quebec	3,198	0.1 %	5,631	0.2 %
Atlantic Provinces	109,448	3.2 %	51,295	2.1 %
Other	119,704	3.5 %	33,468	1.4 %
	$ 3,458,671	**100.0 %**	**$ 2,419,871**	**100.0 %**

(f) Other information

Capitalized transaction costs are included in securitized mortgages and are amortized using the EIM. At December 31, 2025, the unamortized capitalized transaction cost balance is $18,624 (December 31, 2024 - $16,529).

The fair value of the securitized mortgage portfolio at December 31, 2025 is $3,531,286 (December 31, 2024 - $2,447,952).

At December 31, 2025, securitized assets - cash held in trust of $71,856 (December 31, 2024 - $47,249) represents restricted cash held in trust in connection with the Company's insured residential mortgage securitization activities. These deposits include cash held at a Canadian Schedule I Chartered bank that hold principal and interest payments collected from securitized loans awaiting payment to their respective investors.

Other securitized assets of $42,093 at December 31, 2025 (December 31, 2024 - $20,128) includes interest-only strips of $23,194 (December 31, 2024 - $9,550) from the Company's CMB-insured multi-family securitizations.

13. Derivative Financial Instruments

Cash Flow Hedging Relationships

The Company may enter into Government of Canada bond forward contracts to hedge interest rate risk arising from the impact of (i) movements in interest rates between the time insured residential mortgages are funded and the time that these mortgages are securitized; and (ii) movements in interest rates between the time term deposit funding is forecasted to be required and the time that the actual funding occurs. Realized gains or losses on these derivatives are reclassified from OCI to interest on financial liabilities from securitization and term deposit interest and expenses on the consolidated statements of income over the expected life of the underlying hedged item.

At December 31, 2025, the Company had $201 of unrealized fair value gains on derivative financial assets outstanding relating to cash flow hedges (December 31, 2024 - $nil).

The following table provides a reconciliation of OCI related to cash flow hedges:

Years Ended December 31	2025	2024
Liabilities - Interest Rate Risk		
Accumulated OCI at the beginning of the year	$ (1,624)	$ 98
OCI	1,505	(1,722)
Accumulated OCI at the End of the Period	$ (119)	$ (1,624)
OCI on designated hedges	$ 1,505	$ (1,722)

Fair Value Hedging Relationships

The Company may enter into interest rate swaps to hedge interest rate risk arising from fair value changes in our fixed-rate term deposits due to movements in interest rates. Hedges are structured such that the fair value movements of the hedge instruments offset, within a reasonable range, the changes in fair value of the pool of term deposits due to interest rate fluctuations. The terms of our fair value hedges are generally less than two years but may go up to five years. The derivative instruments are settled at the time of maturity of the pool of term deposits. The Company applies fair value hedge accounting to these derivative transactions with the intention to recognize the effective matching of the fair value gain or loss on the derivative transactions with the fair value gain or loss on the pool of term deposits, within a reasonable range. Any unmatched fair value is recorded in term deposit interest and expenses as hedge ineffectiveness.

At December 31, 2025, the Company had $1,660 of net unrealized fair value gains on derivative financial assets and liabilities outstanding relating to fair value hedges (December 31, 2024 - $2,508 unrealized fair value gains). In 2025, we had unrealized fair value hedge gains of $2,064 (2024 - $566) recorded in term deposit interest and expenses in the consolidated statements of income.

The following table presents the effects of fair value hedges on the consolidated balance sheets and the consolidated statements of income:

Years Ended December 31	2025	2024
Liabilities - Interest Rate Risk		
Change in value of hedged item for ineffectiveness measurement	$ 2,881	$ 86
Change in value of hedging item for ineffectiveness measurement	(2,741)	9
Hedge Ineffectiveness	140	95
Carrying amounts for hedged items	$ 629,656	$ 788,157
Accumulated amounts of fair value hedge adjustments on hedged items	$ (641)	$ 2,170

The following table presents outstanding derivative financial instruments designated in qualifying fair value hedging relationships:

At December 31, 2025	Notional Amount	Average Rate on Interest Rate Swaps[1]	Derivative Asset	Derivative Liability	Net Fair Market Value
Interest Rate Risk - Fair Value Hedges					
Within 1 year	$ 133,900	2.87 %	$ 532	$ —	$ 532
1 to 5 years	503,400	2.68 %	1,174	$ 46	1,128
Total Derivatives in Qualifying Hedging Relationships	$ 637,300	2.72 %	$ 1,706	$ 46	$ 1,660

[1]Average rate on interest rate swaps represents the weighted average received fixed rate

The notional amount is not recorded as an asset or liability as it represents the face amount of the contract to which the rate or price is applied in order to calculate the amount of cash exchanged. Notional amounts do not represent the potential gain or loss associated with market risk and are not indicative of the credit risk associated with the derivatives.

At December 31, 2025, the Company had restricted cash on interest rate swaps of $1,786 (December 31, 2024 - $930), which represents deposits held as collateral by third parties for its interest rate swap transactions. The terms and conditions of these arrangements with counterparties are governed by the International Swaps and Derivatives Association, Inc. agreements.

Derivative-related Risks

The potential for derivatives to increase or decrease in value as a result of changes in relevant factors, such as interest rate changes is referred to as market risk. Credit risk on derivatives, also known as counterparty credit risk, is the risk of a financial loss occurring as a result of the failure of a counterparty to meet its obligation to the Company. The risks are actively monitored and managed by the Company.

14. Term Deposits

At December 31	2025	2024
Maturity Date		
Within 3 Months	$ 324,785	$ 301,555
> 3 Months to 1 Year	904,888	813,428
> 1 to 3 Years	826,183	755,448
> 3 to 5 Years	284,627	417,795
	$ 2,340,483	**$ 2,288,226**

The estimated fair value of term deposits at December 31, 2025 was $2,361,053 (December 31, 2024 - $2,356,668) and is determined by discounting the contractual cash flows using market interest rates currently offered for deposits of similar remaining maturities.

15. Income Taxes

The composition of the provision for (recovery of) income taxes is as follows:

Years Ended December 31	2025	2024
Income before income taxes	$ 74,622	$ 76,554
Statutory rate of tax [1]	0 %	0 %
Tax provision (recovery) before the following:	$ —	$ —
Provision related to income subject to tax in subsidiaries	(249)	(1,032)
	$ (249)	**$ (1,032)**

[1] MCAN is subject to tax at a statutory tax rate of 38% to the extent that it does not pay sufficient dividends to eliminate its taxable income. As MCAN has historically paid sufficient dividends such that it does not have taxable income, a 0% tax rate is used above.

Years Ended December 31	2025	2024
Current tax		
Current tax provision	$ (28)	$ 62
Deferred tax provision (recovery)		
Relating to loss carryforward benefit	(245)	(539)
Other	24	(555)
	(221)	(1,094)
	$ (249)	**$ (1,032)**

A summary of temporary differences by type is as follows:

At December 31	2025	2024
Deferred tax assets		
Loss carryforward benefit	$ 980	$ 735
Other	670	695
	$ 1,650	**$ 1,430**

At December 31, 2025, deferred tax assets and liabilities were assessed for each entity and are presented as deferred tax assets of $1,650 (December 31, 2024 - $1,430) and deferred tax liabilities of $nil (December 31, 2024 - $nil) on the consolidated balance sheets.

The loss carryforward benefit reflected in the deferred tax asset relates to losses in subsidiaries to which the Company has attributed a future benefit.

At December 31, 2025, the Company has loss carryforward amounts in the non-consolidated MIC entity of $5,656 (December 31, 2024 - $13,037), the benefit of which has not been recorded in deferred tax assets. This balance only includes assessed fiscal years. The tax loss carryforward amounts expire beginning in 2044.

16. Other Liabilities

At December 31	2025	2024
Accounts payable and accrued charges	$ 14,020	$ 15,668
Premises lease liability	8,181	6,061
Dividends payable	16,571	15,078
	$ 38,772	**$ 36,807**

During 2025, the Company recognized $321 (2024 - $128) of interest expense and $511 (2024 - $484) of payments relating to the premises lease liability. During 2025, the Company received $2,310 of lease incentives.

The maturity of the premises lease liability is as follows:

At December 31	2025
Within 1 year	$ 70
> 1 to 5 years	2,124
> 5 years	5,987
Total premises lease liability	**$ 8,181**

17. Financial Liabilities from Securitization

Total financial liabilities from securitization mature as follows:

At December 31	2025	2024
2025	$ —	$ 411,487
2026	762,237	709,301
2027	539,848	540,766
2028	904,274	262,822
2029	463,550	498,860
2030	763,974	—
	$ 3,433,883	**$ 2,423,236**

18. Share Capital

At December 31	2025		2024	
	Number of Shares	Share Capital	Number of Shares	Share Capital
Balance, January 1	38,717,004	$ 456,683	35,431,938	$ 406,528
Issued				
Dividend reinvestment plan	497,470	9,353	938,713	14,779
At-the-market equity program	1,120,565	22,456	404,100	6,987
Overnight marketed offering	—	—	1,868,750	27,153
Executive Share Purchase Plan	136,035	2,523	73,503	1,236
Balance, December 31	**40,471,074**	**$ 491,015**	**38,717,004**	**$ 456,683**

The authorized share capital of the Company consists of unlimited common shares with no par value.

The Company issues shares under the dividend reinvestment plan (“DRIP”) out of treasury at the weighted average trading price for the five days preceding such issue less a discount of 2%.

The Company has a (i) Base Shelf prospectus; and (ii) at-the-market equity program (“ATM Program”) established pursuant to a Prospectus Supplement to its Base Shelf prospectus allowing the Company to issue up to $75,000 common shares to the public from time to time over a two year period at the market prices prevailing at the time of sale. The volume and timing of distributions under the ATM Program are determined at MCAN’s sole discretion. In 2025, the Company sold 1,120,565 common shares at a weighted average price of $20.90 for gross proceeds of $23,419 and net proceeds of $22,456 including $467 of agent commission paid and $496 of other share issuance costs under the ATM Program.

For details on the Executive Share Purchase Plan, refer to Note 21.

The Company had no potentially dilutive instruments at December 31, 2025 or December 31, 2024.

19. Dividends

On February 23, 2026, the Board declared a quarterly regular cash dividend of $0.43 per share to be paid on March 31, 2026 to shareholders of record as of March 13, 2026.

20. Net gain (loss) on securities

Years Ended December 31	2025	2024
Net realized gain (loss) on marketable securities	$ 2,572	$ —
Net change in unrealized gain (loss) on marketable securities	964	802
Net realized gain (loss) on non-marketable securities	512	1,041
Net change in unrealized gain (loss) on non-marketable securities	(1,939)	(8,186)
	$ 2,109	**$ (6,343)**

During 2025, the Company sold $15,842 of marketable securities for a net gain of $2,572. Net change in unrealized gains on marketable securities fluctuate with share prices of the underlying securities. The Company also recorded a (i) $512 realized gain related to the sale of underlying property investments with value-add activity; and a (ii) $1,939 net unrealized loss on non-marketable securities mainly related to underlying properties from general commercial real estate headwinds increasing capitalization rates as well as increased debt servicing costs that impact overall returns.

21. Related Party Disclosures

Transactions with MCAP

In 2025, the Company entered into related party transactions with MCAP as follows:

- Purchase of mortgage origination and administration services of $9,209 (2024 - $8,269).
- Purchase of uninsured residential mortgages of $nil (2024 - $8,138).
- Purchase of construction loans of $19,792 (2024 - $nil) and sale of construction loans at par of $nil (2024 - $3,480) with no gain or loss on sale.
- Purchase of insured multi-family residential mortgages of $603,878 (2024 - $94,312).
- Purchase of insured residential mortgages of $499,628 (2024 - $nil).
- The Company has an agreement with MCAP Securities Limited Partnership, a wholly owned subsidiary of MCAP, whereby the Company can sell to MCAP Securities Limited Partnership insured residential mortgage commitments. The Company sold commitments of $7,549 (2024 - $1,956) under this agreement and received revenue of $93 (2024 - $56) recorded in interest on cash and other income on the consolidated statements of income.

All related party transactions noted above were in the normal course of business.

Compensation

Key management personnel of the Company consist of individuals that have authority and accountability for planning, directing and controlling the activities of the Company, directly or indirectly. Key management personnel include the members of the Board.

The compensation of key management personnel is as follows:

Years Ended December 31	2025	2024
Short term benefits (salaries, benefits and director fees)	$ 6,133	$ 6,085
Share-based payments (RSU, PSU)	1,011	2,109
Termination benefits	860	2,301
	$ 8,004	**$ 10,495**

Executive Share Purchase Plan

The Company has an Executive Share Purchase Plan (the “Share Purchase Plan”) whereby the Board can approve loans to senior management for the purpose of purchasing the Company’s common shares. The maximum amount of loans approved under the Share Purchase Plan is limited to 10% of the issued and outstanding common shares.

Dividend distributions on the common shares are used to reduce the principal balance of the loans as follows: 50% of regular distributions and 75% of capital gain distributions. Common shares are issued out of treasury for the Share Purchase Plan. The granting of awards under the Share Purchase Plan may only be done before a black-out period begins or after the sixth day following the end of a black-out period.

At December 31, 2025, $3,868 of loans were outstanding under the Share Purchase Plan (December 31, 2024 - $1,947). During 2025, the Company advanced new loans under the Share Purchase Plan of $2,523 (2024 - $1,236). The loans under the Share Purchase Plan bore interest at 5.45% at December 31, 2025 (December 31, 2024 - 6.45%), which represents prime plus 1% and have a five-year term. The shares are pledged as security for the loans and had a fair value of $5,610 at December 31, 2025 (December 31, 2024 - $2,448). In 2025, MCAN recognized $216 of interest income (2024 - $133) on the Share Purchase Plan loans.

Employee Share Ownership Plan

The Company has an Employee Share Ownership Plan whereby team members can elect to purchase common shares of the Company up to 6% of their annual earnings. The Company matches 50% of each team member's contribution amount. During each pay period, all contributions are used by the plan's trustee to purchase the common shares in the open market. The common shares acquired with the Company's contributions fully vest immediately. The Company's contributions are expensed as paid and totalled $276 for 2025 (2024 - $234).

Share Unit Plans

Deferred Share Units Plan

The Company has a Deferred Share Units Plan (the "DSU Plan") whereby the Board grants units under the DSU Plan to certain members of senior management of the Company (the "DSU Participants"). Each unit is equivalent in value to one common share of the Company. The DSU Participants are entitled to receive cash for each unit following their individual retirement or termination dates, whichever is earlier. The individual unit values are based on the average market value of the Company's common shares for the five days preceding the retirement/termination date. During 2025 and 2024, there were no DSU Plan units outstanding.

Restricted Share Units Plan

The Company has a Restricted Share Units Plan (the "RSU Plan") whereby the Board grants units under the RSU Plan to certain members of senior management of the Company (the "RSU Participants"). Each unit is equivalent in value to one common share of the Company. The RSU Participants are entitled to receive cash for each unit three years subsequent to the awarding of the units subject to continued employment with the Company. The individual unit values are based on the value of the Company's common shares at the time of payment. In addition, the RSU Participants are entitled to receive dividend distributions in the form of additional units. All RSU units vest after three years.

During 2025, the Company paid the RSU Participants $591 (2024 - $502) upon vesting of 31,970 RSU Plan units (2024 - 31,971 units).

Performance Share Units Plan

The Company has established a Performance Share Units Plan (the "PSU Plan") whereby the Board grants units under the PSU Plan to certain members of senior management of the Company (the "PSU Participants"). Each unit is equivalent in value to one common share of the Company. Issuances prior to 2019 vest three years subsequent to the awarding of the units subject to continued employment with the Company. Units issued in 2019 and thereafter vest annually over a three-year period; however, these units are not payable until three years from the issuance date. The individual unit values are based on the value of the Company's common shares at the time of payment. In addition, the PSU Participants are entitled to receive dividend distributions in the form of additional units. At the time of vesting, a "Performance Factor" of 0-200% is applied to the number of units awarded, which is based on earnings per share and other performance metrics in the years subsequent to the grant date.

The units granted under the PSU Plan may be either PSU units or Performance Deferred Share Units ("PDSU units"). Holders of PSU units issued prior to 2019 are paid in cash at the time of vesting. Holders of PSU units issued in 2019 and thereafter are paid in cash three years from the issuance date. Holders of PDSU units are paid in cash at their individual retirement or termination, whichever is earlier, provided that the units have vested. Additionally, the PDSU units earn dividends subsequent to vesting until the retirement or termination, whichever is earlier.

During 2025, the Company paid the PSU Participants $1,219 (2024 - $713) upon vesting of 39,297 PSU Plan units (2024 - 32,458). At December 31, 2025 and 2024, the Company recorded a liability on all outstanding units as it expected to payout on these units.

Activity related to the RSU Plan and PSU Plan is as follows:

At December 31	2025		2024	
	RSU	PSU	RSU	PSU
Units outstanding, beginning of year	113,714	175,313	119,371	140,876
New units granted	58,413	109,568	49,125	97,411
Units issued as dividends	11,465	19,053	11,145	15,286
Units vested	(31,970)	(39,297)	(31,971)	(32,458)
Units forfeited	(18,365)	(33,008)	(33,956)	(45,802)
Units outstanding, end of year	**133,257**	**231,629**	**113,714**	**175,313**
Compensation expense for the year	$ 1,073	$ 1,335	$ 648	$ 2,071
Outstanding liability, end of year	$ 1,588	$ 3,018	$ 1,106	$ 2,903

22. Credit Facilities

The Company has a secured demand revolver facility from a Canadian Schedule I Chartered bank bearing interest at prime plus 0.25% (December 31, 2024 - prime plus 0.25%), with a facility limit of $220,000 (December 31, 2024 - $220,000). The facility is due and payable upon demand. At December 31, 2025, the outstanding loan principal payable was $12,000 (December 31, 2024 - $nil).

Under the facility, there is a sublimit for issued letters of credit. Letters of credit have a term of up to one year from the date of issuance, plus a renewal clause providing for an automatic one-year extension at the maturity date subject to the bank's option to cancel by written notice at least 30 days prior to the letters of credit expiry date. The letters of credit are for the purpose of supporting developer obligations to municipalities in conjunction with residential construction loans. If the developer defaults in its obligation to the municipalities, the municipalities may draw on the letters of credit, in which case the Company is obligated to fund the letters of credit. At December 31, 2025, there were letters of credit in the amount of $41,934 issued (December 31, 2024 - $44,295) and additional letters of credit in the amount of $24,540 committed but not issued (December 31, 2024 - $24,429).

The Company has an agreement with a Canadian Schedule I Chartered bank that enables the Company to execute repurchase agreements for liquidity purposes. This facility allows the Company to encumber certain eligible securities for financing purposes. As part of the agreement, the Company may sell assets to the counterparty at a specified price with an agreement to repurchase at a specified future date. The interest rate on the borrowings is driven by market spot rates at the time of borrowing. At December 31, 2025, the outstanding facility balance was $nil (December 31, 2024 - $nil).

The Company has a demand loan credit agreement with a Canadian Schedule I Chartered bank for a senior secured mortgage warehouse facility with a limit of $100,000 (December 31, 2024 - $100,000) at either prime plus 0.05% or bankers' acceptance rate plus 1.05%. The facility is used to fund insured residential mortgages prior to securitization activities. At December 31, 2025, the outstanding loan principal payable was $7,200 (December 31, 2024 - $nil).

23. Capital Management

The Company's primary capital management objectives are to maintain sufficient capital for regulatory purposes and to earn acceptable and sustainable risk-weighted returns. Through the Company's risk management and corporate governance framework, assessments of current and projected asset growth, economic conditions, housing market activity, the interest rate environment and changes to credit quality are made to determine appropriate levels of capital. The Company expects to pay out all of MCAN's non-consolidated taxable income over time through dividends subject to final review and declaration by the Board. Capital growth is achieved through retained earnings, the DRIP, Executive Share Purchase Plan, rights offerings, public share offerings and stock dividends. Our capital management is primarily driven by the guidelines set out by the Tax Act and OSFI.

For further information, refer to the "Capital Management" section of the MD&A.

Regulatory capital

As a loan company under the Trust Act, OSFI oversees the adequacy of the Company's capital. For this purpose, OSFI has imposed minimum capital to risk-weighted asset ratios and a minimum leverage ratio. OSFI expects all federally regulated financial institutions to meet the minimum capital to risk-weighted asset ratios of 7% common equity tier 1 capital, 8.5% tier 1 capital and 10.5% total capital.

For further information on the Company's regulatory capital management, refer to the "Regulatory Capital" subsection of the "Capital Management" section of the MD&A.

Income tax capital

As a MIC under the Tax Act, the Company is limited to an income tax liabilities to capital ratio of 5:1 (or an income tax assets to capital ratio of 6:1), based on the non-consolidated balance sheet in the MIC entity measured at its tax value. For further information on the Company's income tax capital management, refer to the "Income Tax Capital" subsection of the "Capital Management" section of the MD&A.

Other Capital Management Activity

In conjunction with the annual strategic planning and budgeting process, the Company completes an Internal Capital Adequacy Assessment Process ("ICAAP") in order to ensure that it has sufficient capital to support its business plan and risk appetite. The ICAAP assesses the capital necessary to support the various inherent risks that the Company faces, including liquidity and funding, credit, interest rate, market, operational, regulatory compliance, strategic and reputational risks. The Company's business plan is also stress-tested under various adverse scenarios to determine the impact on results from operations and financial condition. The ICAAP is reviewed by both management and the Board and is submitted to OSFI annually. In addition, the Company performs stress testing on its internal forecasts for capital adequacy on a quarterly basis, and the results of such testing are reported to the Board.

24. Financial Instruments

The majority of the Company's consolidated balance sheet consists of financial instruments, and the majority of net income is derived from the related income, expenses, gains and losses. Financial instruments include cash and cash equivalents, cash held in trust, marketable securities, mortgages, non-marketable securities, other loans, financial liabilities from securitization, term deposits and demand loans payable.

To measure financial instruments that are carried at fair value on the consolidated balance sheets, or for which fair value is disclosed, the following fair value hierarchy is used based on the inputs to the valuation:

Level 1: Quoted market prices observed in active markets for identical assets and liabilities.
Level 2: Directly or indirectly observable inputs for the assets or liabilities not included in Level 1.
Level 3: Unobservable market inputs.

Financial instruments are classified at the lowest level of the hierarchy for which a significant input has been used. The fair value hierarchy requires the use of observable market inputs whenever obtainable.

There were no transfers between levels during the years ended December 31, 2025 and 2024.

The following tables summarize the fair values of financial assets measured at FVPL and financial assets and liabilities measured at amortized cost for which fair values are disclosed.

At December 31, 2025	Level 1	Level 2	Level 3	Total	Carrying Value
Assets measured at FVPL					
Marketable securities - real estate investment trusts	$ 39,025	$ —	$ —	$ 39,025	$ 39,025
Derivative financial instruments [2]	—	1,706	—	1,706	1,706
Non-marketable securities - Real Estate Debt Funds [1]	—	—	78,065	78,065	78,065
Non-marketable securities - Other Real Estate Limited Partnerships [8,9]	—	—	48,527	48,527	48,527
	$ 39,025	**$ 1,706**	**$ 126,592**	**$ 167,323**	**$ 167,323**
Liabilities measured at FVPL					
Derivative financial instruments [2]	**$ —**	**$ 46**	**$ —**	**$ 46**	**$ 46**
Assets measured at FVOCI					
Derivative financial instruments [2]	**$ —**	**$ 201**	**$ —**	**$ 201**	**$ 201**
Assets measured at amortized cost for which fair values are disclosed					
Cash and cash equivalents	$ 79,828	$ —	$ —	$ 79,828	$ 79,828
Marketable securities - Government of Canada bonds	15,121	—	—	$ 15,121	15,121
Mortgages - non-securitized [3]	—	—	2,502,511	2,502,511	2,479,588
Other assets - other loans [4]	—	—	6,451	6,451	6,451
Securitization program cash held in trust	71,856	—	—	71,856	71,856
Mortgages - securitized [3]	—	—	3,531,286	3,531,286	3,458,671
	$ 166,805	**$ —**	**$6,040,248**	**$6,207,053**	**$6,111,515**
Liabilities measured at amortized cost for which fair values are disclosed					
Term deposits [6]	$ —	$ —	$2,361,053	$2,361,053	$2,340,483
Demand loans payable [5]	—	—	19,438	19,438	19,438
Other liabilities - non-securitized [5]	—	—	38,772	38,772	38,772
Financial liabilities from securitization [7]	—	—	3,447,417	3,447,417	3,433,883
	$ —	**$ —**	**$5,866,680**	**$5,866,680**	**$5,832,576**

At December 31, 2024	Level 1	Level 2	Level 3	Total	Carrying Value
Assets measured at FVPL					
Marketable securities	$ 66,345	$ —	$ —	$ 66,345	$ 66,345
Derivative financial instruments [2]	—	2,508	—	$ 2,508	2,508
Non-marketable securities - Real Estate Debt Funds [1]	—	—	74,296	$ 74,296	74,296
Non-marketable securities - Other Real Estate Limited Partnerships [8,9]	—	—	43,132	$ 43,132	43,132
	$ 66,345	**$ 2,508**	**$ 117,428**	**$ 186,281**	**$ 186,281**
Assets measured at amortized cost for which fair values are disclosed					
Cash and cash equivalents	$ 61,703	$ —	$ —	$ 61,703	$ 61,703
Mortgages - non-securitized [3]	—	—	2,483,036	2,483,036	2,464,091
Other assets - other loans [4]	—	—	5,742	5,742	5,742
Securitization program cash held in trust	47,249	—	—	47,249	47,249
Mortgages - securitized [3]	—	—	2,447,952	2,447,952	2,419,871
	$ 108,952	**$ —**	**$4,936,730**	**$5,045,682**	**$4,998,656**
Liabilities measured at amortized cost for which fair values are disclosed					
Term deposits [6]	$ —	$ —	$2,356,668	$2,356,668	$2,288,226
Demand loan payable [6]	—	—	107	107	107
Other liabilities - non-securitized [5]	—	—	36,807	36,807	36,807
Financial liabilities from securitization [7]	—	—	2,411,721	2,411,721	2,423,236
	$ —	**$ —**	**$4,805,303**	**$4,805,303**	**$4,748,376**

[1] *Fair value is based on the redemption value.*
[2] *Fair value based on swap curves adjusted for credit risks.*
[3] *Fair value of* non-securitized *and securitized fixed rate mortgages are calculated based on discounting the expected future cash flows of the mortgages, adjusting for credit risk and prepayment assumptions at current market rates for offered mortgages based on term, contractual maturities and product type. For insured adjustable rate residential mortgages, fair value is assumed to equal their carrying amount since there are no fixed spreads. The Company classifies its mortgages as Level 3 given the fact that although many of the inputs to the valuation models used are observable, non-observable inputs include the discount rate and the assumed level of prepayments.*
[4] *Fair value is assumed to be the carrying value as underlying loans are variable rate.*
[5] *The carrying value of the asset/liability approximates fair value.*
[6] *As term deposits are non-transferable by the deposit holders, there is no observable market. As such, the fair value of the term deposits is determined by discounting expected future cash flows of the deposits at current offered rates for deposits with similar terms.*
[7] *Fair value of financial liabilities from securitization is determined using current market rates for CMB and MBS.*
[8] *Fair value based on recent transaction price.*
[9] *Fair value based on the net asset value of the underlying partnerships.*

The following table shows the continuity of Level 3 financial assets measured at FVPL:

At December 31	2025	2024
Balance, beginning of year	$ 117,428	$ 109,943
Advances/Purchases	12,189	17,349
Repayments/Dispositions	(1,086)	(1,678)
Changes in unrealized fair value, recognized in net income	(1,939)	(8,186)
Balance, end of year	**$ 126,592**	**$ 117,428**

Risk management

The types of risks to which the Company is exposed include but are not limited to liquidity and funding risk, credit risk, interest rate risk and market risk. The Company's enterprise risk management framework includes policies, guidelines and procedures, with oversight by senior management and the Board. These policies are developed and implemented by management and reviewed and approved periodically by the Board. For the nature of these risks and how they are managed, please refer to the shaded sections of the "Risk Factors" section of the MD&A. The shaded sections of the MD&A relating to liquidity and funding, credit, interest rate and market risks inherent in financial instruments form an integral part of these consolidated financial statements.

25. Commitments and Contingencies

For the nature of the Company's commitments and contingencies, please refer to the shaded sections of the "Off-balance Sheet Arrangements" section of the MD&A. The shaded section of the MD&A relating to off-balance sheet arrangements forms an integral part of these consolidated financial statements.

26. Comparative Amounts

Certain comparative amounts have been reclassified to conform to the presentation adopted in the current year. There was no impact to the financial position or net income as a result of these reclassifications.

DIRECTORS AND EXECUTIVE OFFICERS

DIRECTORS

Bonnie Agostinho
Corporate Director, MCAN
Chair of Information Technology Governance Committee
Member of Conduct Review, Corporate Governance and Human Resources Committee
Member of Enterprise Risk Management and Compliance Committee
Director since May 2022

Brian Chu
Corporate Director, MCAN
Chair of Conduct Review, Corporate Governance and Human Resources Committee
Member of Enterprise Risk Management and Compliance Committee
Director since May 2021

John Coke
Corporate Director, MCAN
Chair of Audit Committee
Member of Conduct Review, Corporate Governance and Human Resources Committee
Director since May 2021

Glenn Doré
President, Teff Administration Inc.
Member of Audit Committee
Member of Conduct Review, Corporate Governance and Human Resources Committee
Director since May 2020
